ITE Excerpts

Land Use: 157
High-Cube Cold Storage Warehouse

Description

A high-cube warehouse (HCW) is a building that typically has at least 200,000 gross square feet of floor area, has a ceiling height of 24 feet or more, and is used primarily for the storage and/or consolidation of manufactured goods (and to a lesser extent, raw materials) prior to their distribution to retail locations or other warehouses. A typical HCW has a high level of on-site automation and logistics management. The automation and logistics enable highly-efficient processing of goods through the HCW. A high-cube warehouse can be free-standing or located in an industrial park.

A high-cube cold store warehouse has substantial temperature-controlled environments for frozen food and other perishable products.

A high-cube warehouse may contain a mezzanine. In a HCW setting, a mezzanine is a free-standing, semi-permanent structure that is commonly supported by structural steel columns and that is lined with racks or shelves. The gross floor area (GFA) values for the study sites in the database for this land use do NOT include the floor area of the mezzanine. The GFA values represent only the permanent ground-floor square footage.

The amount of office/employee welfare space that is provided within a HCW can be highly variable but is typically an insignificant portion of the overall building square footage. Within the trip generation database, common values are between 3,000 and 5,000 square feet for a Cold Storage HCW and between 5,000 and 10,000 square feet for Transload, Fulfillment Center, and Parcel Hub HCW (all of which are less than one percent of total GFA for a site). Therefore, for the trip generation data plots, any office space that is part of the normal operation of the warehouse is included in the total GFA.

Warehousing (Land Use 150), high-cube transload and short-term storage warehouse (Land Use 154), high-cube fulfillment center warehouse (Land Use 155), and high-cube parcel hub warehouse (Land Use 156) are related land uses.

Additional Data

The High-Cube Warehouse/Distribution Center-related land uses underwent specialized consideration through a commissioned study titled “High-Cube Warehouse Vehicle Trip Generation Analysis,” published in October 2016. The results of this study are posted on the ITE website at http://library.ite.org/pub/a3e6679a-e3a8-bf38-7f29-2961becdd498.

The sites were surveyed in the 2000s and the 2010s in California.

NCHRP Reports

Intersection #3 - Lake View & Mayflower / Project Driveway
AM Peak Hour

Figure 2 - 6. Guideline for determining the need for a major-road right-turn bay at a two-way stop-controlled intersection.

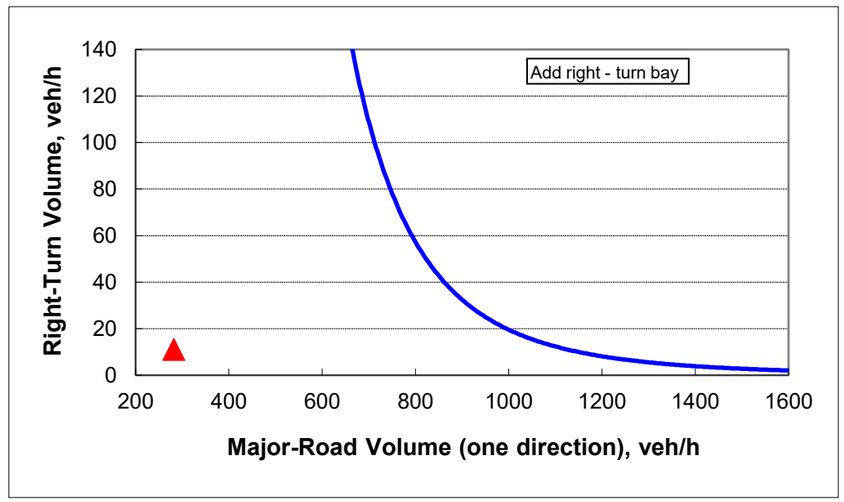
INPUT

Roadway geometry:	2-lane roadway

Variable	Value
Major-road speed, mph:	30
Major-road volume (one direction), veh/h:	282
Right-turn volume, veh/h:	11

OUTPUT

Variable	Value
Limiting right-turn volume, veh/h:	8713
Guidance for determining the need for a major-road right-turn bay for a 2-lane roadway:	
Do NOT add right-turn bay.	



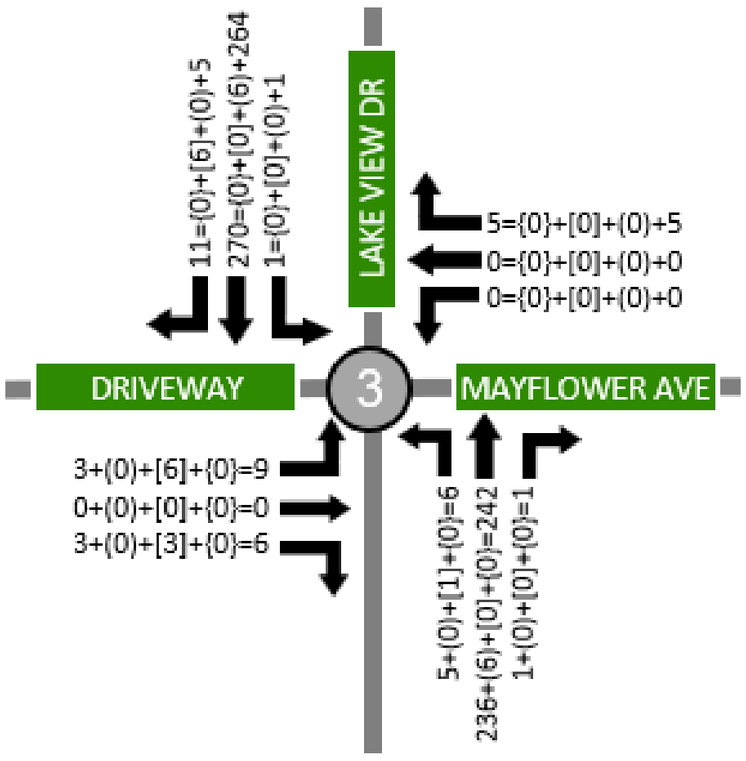


Figure 2 - 6. Guideline for determining the need for a major-road right-turn bay at a two-way stop-controlled intersection.

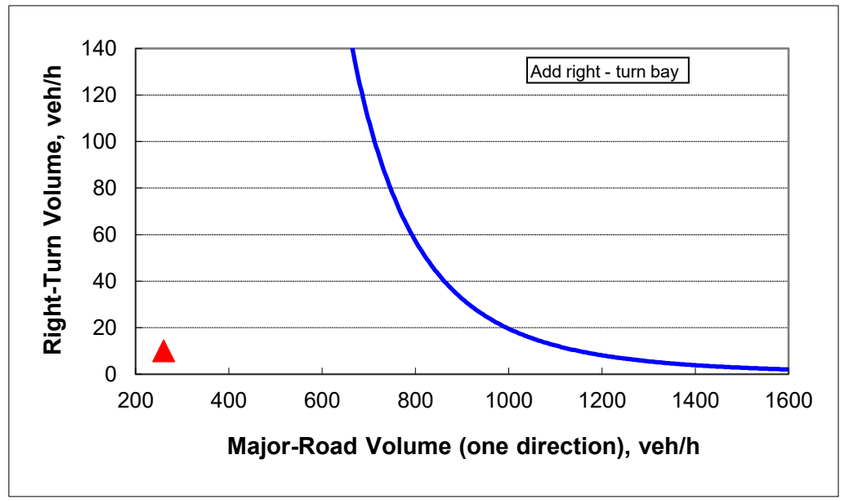
INPUT

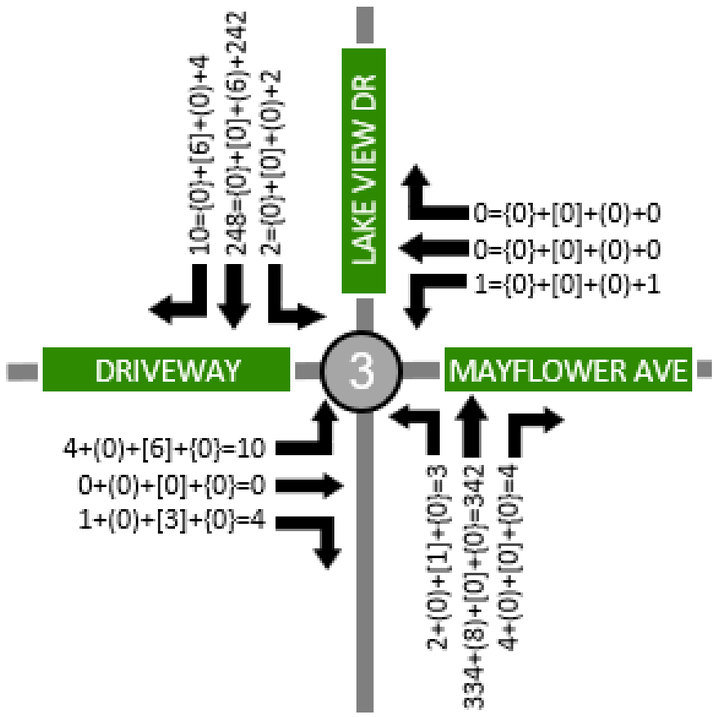
Roadway geometry:	2-lane roadway

Variable	Value
Major-road speed, mph:	30
Major-road volume (one direction), veh/h:	260
Right-turn volume, veh/h:	10

OUTPUT

Variable	Value
Limiting right-turn volume, veh/h:	12887
Guidance for determining the need for a major-road right-turn bay for a 2-lane roadway:	
Do NOT add right-turn bay.	





Intersection #3 - Lake View & Mayflower / Project Driveway

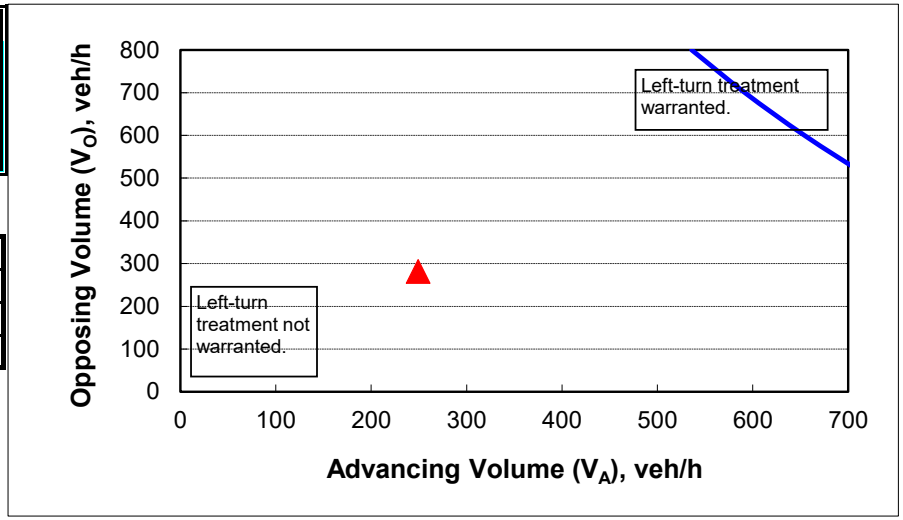
AM Peak Hour

Figure 2 - 5. Guideline for determining the need for a major-road left-turn bay at a two-way stop-controlled intersection.

2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	30
Percent of left-turns in advancing volume (V_A), %:	2%
Advancing volume (V_A), veh/h:	249
Opposing volume (V_O), veh/h:	282

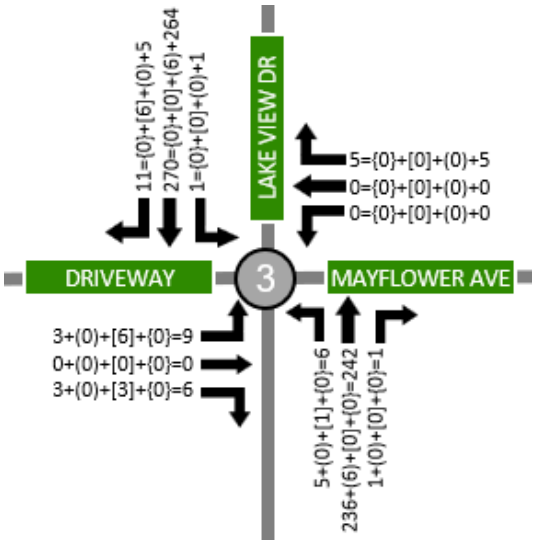


OUTPUT

Variable	Value
Limiting advancing volume (V_A), veh/h:	914
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	

CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9



Intersection #3 - Lake View & Mayflower / Project Driveway

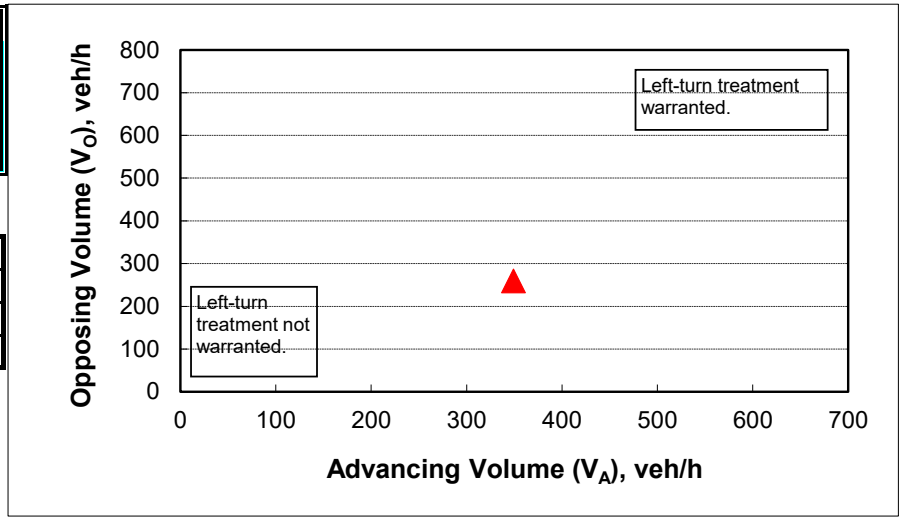
PM Peak Hour

Figure 2 - 5. Guideline for determining the need for a major-road left-turn bay at a two-way stop-controlled intersection.

2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	30
Percent of left-turns in advancing volume (V_A), %:	1%
Advancing volume (V_A), veh/h:	349
Opposing volume (V_O), veh/h:	260



OUTPUT

Variable	Value
Limiting advancing volume (V_A), veh/h:	1555
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	

CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

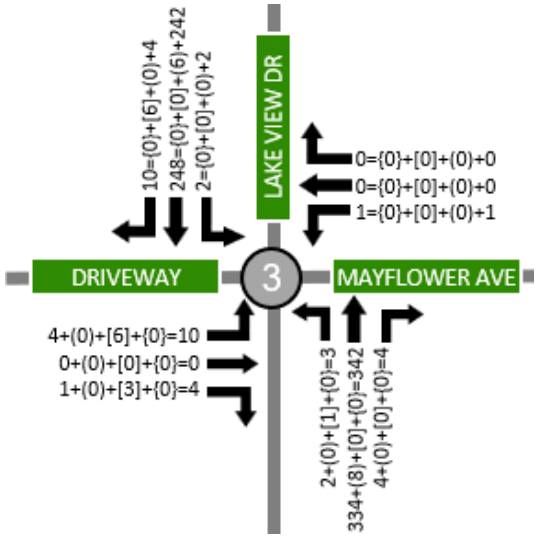


Figure 2 - 6. Guideline for determining the need for a major-road right-turn bay at a two-way stop-controlled intersection.

INPUT

Roadway geometry:	4-lane roadway

Variable	Value
Major-road speed, mph:	45
Major-road volume (one direction), veh/h:	1154
Right-turn volume, veh/h:	3

OUTPUT

Variable	Value
Limiting right-turn volume, veh/h:	23
Guidance for determining the need for a major-road right-turn bay for a 4-lane roadway:	
Do NOT add right-turn bay.

1.0 SUMMARY

1. Colella & Associates, Inc. performed a Phase I Environmental Site Assessment (ESA) for the subject property (Site) located at 2560 W. Orange Blossom Trail in Apopka, Florida (see Figure 1), as requested by Mr. Jamie Pardo of the Mandich Group to determine its pre-sale environmental status. A Phase I ESA was performed on the Site (Parcel No. 06-21-28-7172-02-011), a commercially developed property that covered approximately 27.63 acres and was occupied by a cold storage and warehousing facility (Cold Link Logistics). Cold Lik Logistics leased portions of the buildings to Eastern Quality Foods (protein food provider) and Circet USA (telecommunications contractor) and ground storage area to Circet USA. The Phase I ESA was performed to identify recognized environmental conditions (conditions indicative of releases or threatened releases of hazardous and petroleum substances) on the Site. Colella & Associates, Inc. performed a Phase I ESA and prepared the report in accordance with the ASTM Standard E 1527-21.

2. The objective of the Phase I ESA was to determine if recognized environmental conditions (REC), conditions indicative of releases or threatened releases of hazardous and petroleum substances, exist on the Site that were associated with the on-site operations, current and historic, and/or by the operations on the adjoining and surrounding properties. To achieve this objective, the scope of services included a walk-through inspection of the Site, an inspection inside the buildings, a curbside evaluation of the adjoining and surrounding properties' land uses, a review of federal, state, and local regulatory files (environmental databases) applicable to the Site and surrounding area, a review of historical land use resources, and interviewing individuals knowledgeable of the Site.

3. Mr. Pardo authorized the Phase I ESA on April 21, 2025, and Colella & Associates, Inc. conducted the Site walk and observed the adjoining/surrounding properties' land uses on May 7, 2025. The Florida Department of Environmental Protection (FDEP) and the Orange County Environmental Protection Division (OCEPD) offices were contacted through the internet on April 22, 2025.

4. The Site was in a commercially developed area along W. Orange Blossom Trail and W. Orange Avenue in Apopka, Florida.

5. The Phase I ESA of the Site was performed in conformance with the scope and limitations of ASTM Standard E 1527-21. Any exceptions to or deletions from this assessment are described in Section 2.0 of this report. A cursory summary of the findings and conclusions is provided below. It should be recognized that details were not included or fully developed in this section and the remainder of the report and appendices must be read in its entirety for a comprehensive understanding of the information presented below.

6. The assessment has revealed the following information regarding the presence of a likely REC and/or a REC on the Site:
    - Historic Site Assessment
        - The readily available information on the historic land uses of the Site has not revealed a REC.

- Current Site Assessment
  - The readily available information of the current land uses of the Site has not revealed a likely REC or REC .
- Historic Adjoining Property Assessment
  - The readily available information about the historic land uses on the adjoining properties did not identify environmental conditions that could result in a likely REC or a REC on the Site.
- Current Adjoining Property Assessment
  - The assessment of the readily available information of the current land uses on the adjoining properties did not identify environmental conditions that could result in a likely REC or a REC on the Site.
- Historic Surrounding Property Assessment

  The readily available information of the historic land uses did not identify environmental conditions that could result in a likely REC or a REC on the Site.
- Current Surrounding Property Assessment
  - The assessment of the current land uses on the surrounding properties did not identify environmental conditions that could result in a likely REC or a REC on the Site.
- De-Minimis Conditions (Current)
  - Site -- De-minimis conditions (oil-stained areas) were noted.

7. A Controlled Recognized Environmental Condition (CREC) was not identified on the Site.

8. A Historical Recognized Environmental Condition (HREC) was not identified on the Site.

9. Business environmental risks on the Site were evaluated, and the following presents our opinion regarding any concern about their impact on the Site:
   - Current On-Site Business Activity -- No concern.
   - Historic On-Site Business Activity -- No concern.

10. Non-operational business environmental (exposure) risks, asbestos and lead, in suspect asbestos-containing building materials (ACBM) and paint coating on construction materials, respectively, and PFAS were evaluated for the Site:
    - ACBM -- Suspect ACBMs exist in the buildings. The buildings were reportedly built prior to the ban (circa 1980) on asbestos in building materials. The presence of suspect ACBM in the building is considered possible.
    - Lead-Based Paint -- The buildings had painted surfaces. The presence of lead in the observed paint coatings is considered possible because the buildings were built/maintained prior to the ban on the use of lead in paints (1980).
    - Per- and Polyfluoroalkyl Substances (PFAS) -- The Site and properties in the surrounding area were not identified in any of the EPA or FDEP PFAS databases.

11. Based on the information reviewed, the potential for vapor migration on or onto the Site does not exist.

12. The following data gaps are identified as part of this Phase I ESA:
    - The historical research did not satisfy the 5-year interval period. This inability is considered a deviation from the ASTM 1527-21 standard and constitutes a data failure. For the purposes and intent of this report, this data failure is not considered significant.
    - The user did not provide a chain of title for the Site. This is considered a deviation from the ASTM 1527-21 standard and constitutes a data failure. The environmental professional is not responsible for the acquisition of the chain-of-title.
    - All the land uses on the Site may not be identified because of the limited reasonably available resources. For the purposes and intent of this report, this data failure is considered significant, but with the absence of readily available resources, data gaps cannot be resolved.
    - The historical research did not extend to 1940. This inability is considered a deviation from the ASTM 1527-21 standard and constitutes a data failure. The earliest aerial photograph (1947) indicates that the Site and the surrounding area had citrus groves with limited commercial and rural residential development . It is our opinion that a resource is not reasonably available to address the land use(s) and possible environmental concerns before 1947. Based on the 1947 aerial, the Site and the surrounding area most likely would be primarily undeveloped with citrus groves.
13. During the performance of the Phase I ESA, general observations (non-testing) of other non-scope issues (not part of the ASTM E-1527-21) such as identifying wetlands (review of National Wetlands Inventory database), mold (visible presence), and/or water intrusion (visible presence), were provided. Other possible non-scope considerations not identified or requested were not included and Colella & Associates, Inc. is not responsible for their inclusion in the performance of the Phase I ESA. Colella & Associates, Inc. has identified the following for the Site:
    - Floodplains -- The Site is in Flood Zone “X,” outside the 100-year flood zone.
    - Wetlands -- Wetland conditions were not observed, and the U. S. Fish & Wildlife National Wetlands inventory did not show a wetland on the Site.
    - Water Intrusion -- None noted.
    - Mold -- No obvious conditions were noted.

2.0 INTRODUCTION

2.1 PURPOSE

1. A Phase I Environmental Site Assessment (ESA) was requested by Mr. Jamie Pardo of the Mandich Group for the subject property (Site) located at 2560 W. Orange Blossom Trail in Apopka, Florida (see Figure 1). The Site (Parcel No. 06-21-28-7172-02-011) covered approximately 27.63-acres and was commercially developed with an active cold storage and warehouse facility (Cold Link Logistics) with tenants (Eastern Quality Foods (protein food provider) and Circet USA (telecommunications contractor). The Phase I ESA was requested to determine the pre-sale environmental status of the Site.

2. Mr. Pardo authorized Colella & Associates, Inc. to perform the Phase I ESA on April 21, 2025.

3. The purpose of the Phase I ESA was to determine if recognized environmental conditions (REC) were associated with operations, historic and current, on the Site, and/or if environmental concerns from operations on Adjoining and/or surrounding properties resulted in a REC or likely REC on the Site. The following terms define our performance in identifying a REC as per the Standard Practice for Environmental Site Assessments, Phase I Environmental Site Assessment Process (ASTM E 1527-21):

    - Recognized Environmental Condition (REC) -- (1) The presence of any hazardous substances or petroleum products in, on, or at the subject property due to any release to the environment; (2) the likely presence of any hazardous substances or petroleum products in, on, or at the subject property due to any release or likely release to the environment; or (3) the presence of any hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.
    - De-minimis Condition-- A release that generally does not present a material risk of harm to the public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A de minimis condition is not a REC.
    - Release -- Any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment**,** including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous substances orpollutants, or a contaminant.
    - Environment -- Includes the navigable waters, the waters of the contiguous zone, and the ocean water and any other surface water, groundwater, drinking water supply, land surface or subsurface strata.
    - Material Threat -- Physically observable and/or obvious through documented resources that are reasonably likely to lead to a release that is threatening and might result in an impact to public health and/or the environment.
    - Historical REC (HREC) -- A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority (e.g., as evidenced by the issuance of a “No Further Action” (NFA) letter or equivalent, or meeting risk-based criteria established by regulatory authority) without subjecting the property to any required controls

(e.g., property use restrictions, activity and use limitations (AUL), institutional controls, or engineering controls).

- Controlled REC (CREC) -- A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a "No Further Action" (NFA) letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations (AUL), institutional controls, or engineering controls).

2.2 DETAILED SCOPE OF WORK

1. The Phase I ESA included the following scope of services:
    - A visual evaluation of the Site was performed with the purpose of identifying the presence of stored, spilled, or otherwise managed hazardous and/or non-hazardous industrial or commercial grade solid/liquid substances, petroleum products (fuels and oil) and associated wastes, waste products or related visible residue such as hydrocarbon (petroleum) based materials, chemicals, or PCBs. Colella & Associates, Inc. recorded any typical surface expressions of underground storage tanks (USTs) or related holding units that may have been observed at the time of the inspection. Appendix A contains photographic documentation of the observations made during the inspection.
    - A cursory drive-by review of adjoining and surrounding properties was performed, and general land use activities were noted, as they related to a possible impact to the Site.
    - A review of past and present aerial photographs of the land usage was performed. Appendix B contains copies of portions of the aerial photographs (2025, 2019, 2013, 2007, 1999, 1990, 1987, 1978, 1969, 1954, and 1947) of the Site and surrounding area. Aerials were available through the Orange County Property Appraiser, Florida Department of Transportation (FDOT), and the University of Florida Library websites. In addition, ERIS compiled aerials (current and historic) for Colella & Associates, Inc. to use in performing the review of the Site and adjoining/surrounding properties. Appendix C contains a copy of the ERIS Historical Aerials Report.
    - A review of the federal (such as the Environmental Protection Agency, EPA) state (Florida Department of Environmental Protection, FDEP), and/or local agencies' environmental management databases was conducted. The purpose of this review was to identify the presence of facilities where fuels, oils and hazardous substances and/or materials and wastes are being stored, treated, disposed, generated, or transported and which have a registered underground storage tank (UST) and/or an aboveground storage tank (AST) on the Site and within a designated area around the Site. ERIS compiled information from numerous federal, state, and/or local databases and prepared an environmental database report for Colella & Associates, Inc. to use in performing the review. Appendix C contains a copy of the ERIS environmental database report.
    - A review of topographic, hydrologic, geologic, and soil information and water supply well locations in the area was performed. ERIS provided a Physical Setting report for Colella & Associates, Inc. to use in performing the review. Appendix C contains a copy of the ERIS Physical Setting Report.

- A review of available city directories of the past and present occupants of the Site, and of the adjoining and surrounding properties was performed to potentially identify historic land uses and the possible presence of a REC on the Site and/or an off-site environmental concern that could impact the Site. ERIS identified available city directories for the area and prepared a City Directory Report for Colella & Associates, Inc. to use in performing the review. Appendix C contains a copy of the City Directory Report.
- A review of available historic fire insurance maps was performed to potentially identify historic land uses of the Site and adjoining and surrounding properties to possibly identify the presence of an associated REC on the Site and/or an off-site environmental concern that could impact the Site. ERIS identified available fire insurance maps for the area and prepared a Fire Insurance Map Report for Colella & Associates, Inc. to use in performing the review. Appendix C contains a copy of the Fire Insurance Map Report.
- A visual inspection for business environmental (exposure) risks (asbestos and lead) as suspect asbestos-containing building materials (ACBM) and/or paint coating being lead-based, respectively, was performed because the Site was developed.
- A review (online database and/or record search request) of State and County regulatory files for registrations and violations associated with the Site and adjoining properties was performed.
- A visual inspection of the Site conditions associated with business environmental risks such as the potential of flooding, presence of wetlands, water intrusion, and mold was performed. The conditions, location, and/or the age of the associated structures were used to provide an opinion regarding the presence of a business risk. No other non-scope ASTM E1527-13/21 issue was addressed in this Phase I ESA by request from the Mandich Group, or from implication by Colella & Associates, Inc.
- Site ownership was developed from the Orange County Property Appraiser and Clerk of Court websites to determine the historic property owners and possibly the associated land uses

2. The formal governmental identification and delineation of wetlands, endangered or protected plant and animal species, or historical/archaeological sites, as well as the identification and evaluation of geological and/or geotechnical hazards were beyond this scope of work.

2.3 SIGNIFICANT ASSUMPTIONS

1. There were no significant assumptions associated with the performance of this Phase I ESA. There is a possibility that even with the proper application of described assessment methodologies there may exist conditions that could not be identified within the scope of this assessment, or which were not reasonably identifiable from the readily available information. Colella & Associates, Inc. believes that the information obtained from the readily available records, observations, aerial photographs, and interviews concerning the Site is reliable. However, Colella & Associates, Inc. cannot and does not warrant or guarantee that the information provided by all resources used in the preparation of a Phase I ESA report is accurate and/or complete. The methodologies of this assessment are not intended to produce “all-inclusive” or “comprehensive” results, but rather to provide the Mandich Group with information relating to the general environmental status of the Site as per the Standard Practice for Environmental Site Assessments, Phase I Environmental Site Assessment Process (ASTM E 1527-21).

2.4 LIMITATIONS AND EXCEPTIONS

1. Colella & Associates, Inc.'s professional services have been performed, our findings obtained, and our conclusions prepared in general accordance with customary principles and practices of environmental science and engineering reflecting the Site's conditions when observed and/or from resources reviewed. This warranty is in lieu of all other warranties either expressed or implied. Colella & Associates, Inc. is not responsible for the independent conclusions, opinions, and/or recommendations made by others based on the data presented in this report. The performance of this Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential presence of a REC associated with the Site.

2. This report (including all attached documents) shall be the sole property of Colella & Associates, Inc. until payment for services rendered has been paid in full. The client shall not have a proprietary interest in this report and attached documents until payment is made in full. Colella & Associates, Inc. has the absolute right to request the return of any and all copies of this report when nonpayment occurs.

3. It should be noted that all environmental assessments are inherently limited in the sense that conclusions are drawn from readily available information obtained from limited research and a Site evaluation.

4. Subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the observations and review of available resources.

5. The passage of time after the visual inspection may result in a change in the environmental characteristics at this Site and surrounding properties.

6. It should be noted that environmental concerns may be documented in public records that were not reviewed because they were not readily available.

7. No Phase I ESA can wholly eliminate uncertainty regarding the potential for REC in connection with the Site. Performance of the Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for a REC. The limitations presented herein must be considered when the user of this report formulates opinions and/or draws conclusions as to the environmental risks associated with the Site. The identification of an environmental risk may be further evaluated through additional research and/or site assessment (sampling/analysis) to reduce and/or understand the magnitude of the REC.

8. The Phase I ESA and report shall not be construed as a compliance audit.

9. The Phase I ESA has been prepared in general accordance with the procedures detailed in the current ASTM Standards on Environmental Site Assessments for Commercial Real Estate, Standard E 1527-21, except as noted below. The specialized terms, definitions of terms, and acronyms are defined in Section 3.0 of the referenced ASTM Standard.

10. In accordance with ASTM Standard E 1527-21, Colella & Associates, Inc. is utilizing the following approximate minimum search distances for conducting the Phase I ESA of the following government records to address current and historical land uses:

    - Federal National Priority List (NPL) -- 1.0 mile.
    - Federal Delisted NPL Sites -- 0.5 mile.

- Federal Sites Subject to CERCLA Removals and CERCLA Orders -- 0.5 mile.
- FEDERAL CERCLA Sites with NFRAP -- 0.5 mile.
- FEDERAL RCRA Facilities undergoing Corrective Action -- 1.0 mile.
- Federal RCRA TSD Facilities -- 0.5 mile.
- Federal RCRA Generators -- Subject property and adjoining properties.
- Federal Institutional control/engineering control Registries --Subject property.
- Federal Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) List -- 0.5 mile.
- Federal Resource Conservation Recovery Act (RCRA) Treatment, Storage, and Disposal (TSD) Facilities List -- 1.0 mile.
- Federal RCRA Generators List -- Site and Adjoining properties only.
- State and tribal Brownfield Sites -- 0.5 mile.
- Federal Emergency Response Notification System (ERNS) List -- Subject property.
- Federal Institutional/Engineering Control Registry -- Subject property.
- Federal Institutional/Engineering Control Registry -- Subject property.
- Federal PFAS Concerns -- 0.5 mile
- State Institutional/Engineering Control Registry -- Subject property.
- Brownfield Sites -- 0.50 mile.
- State Lists of Hazardous Waste Sites identified for investigation or remediation (NPL & CERCLIS equivalent) -- 1.0 mile.
- State Landfill and/or Solid Waste Disposal Sites List -- 0.50 mile.
- State Leaking Underground Storage Tank (LUST) List -- 0.50 mile.
- State Registered Underground Storage Tank (UST) List -- Site and Adjoining properties only.
- State Registered Aboveground Storage Tank (AST) List -- Site and Adjoining properties only.
- State PFAS Concerns -- 0.5 mile.

2.5 SPECIAL TERMS AND CONDITIONS

1. There were no special terms and conditions associated with the performance of this Phase I ESA.

2.6 USER RELIANCE

1. This Phase I ESA report was prepared on behalf and solely for the use of the Mandich Group (and its principals). This report, and the findings contained herein, shall not, in whole or part, be disseminated or conveyed to or used by any other party without the prior written consent of Colella & Associates, Inc. and approval from Mandich Group is received. Any unauthorized party using or relying upon this Phase I ESA Report shall be liable to Colella & Associates, Inc. for equitable compensation and appropriate punitive damages, and shall be responsible to reimburse Colella & Associates, Inc. and indemnify, defend, and hold Colella & Associates, Inc. harmless from and against any and all costs, claims, liabilities, expenses, lost profits and damages arising as a direct or indirect result of such unauthorized use or reliance.

3.0 SITE DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

1. Based on the information provided by Mr. Pardo, the Site (Parcel No. 06-21-28-7172-02-011) was located at 2560 W. Orange Blossom Trail in Orlando, Florida (see Figure 1), covered approximately 27.63-acres, and was commercially developed.

2. Appendix D contains a copy of the Orange County Property Appraiser's information on the Site.

3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

1. The Site was situated in a commercial land use area along W. Orange Blossom Trail in Apopka. The adjoining and surrounding properties land development at the time of the inspection included:
    - North -- Road followed by commercially developed properties.
    - South -- Railroad track (active) followed by commercially developed properties.
    - East -- Undeveloped (wooded or covered with ground cover) properties followed by a road followed residentially and commercially developed properties.
    - West -- Commercially developed properties.
2. Based on the Physical Setting Maps (Figures 2, 3, 4, 5, and 6), the topography of the general area had a mild slope to the southeast. The ground surface elevation was approximately 125-feet above Mean Sea Level (MSL).

3. The Site has an irregular shape with a general northwest-southeast orientation.

3.3 CURRENT USE OF THE PROPERTY

1. The Site was being used by Cold Link Logistics for dry and cold storage warehousing.

2. Cold Link Logistics also has the following tenants
    - Cold storage and offices -- Eastern Quality Foods (protein foods).
    - Ground Storage and offices -- Circet USA (telecommunications contractor).

3.4 DESCRIPTIONS OF STRUCTURES, ROADS, AND SITE IMPROVEMENTS

1. The following structures/improvements of the Site were noted at the time of the inspection on May 7, 2025:
    - Concrete block warehouses (dry (6) and refrigerated (cooler (4) and freezer (4)) storage).
    - Office building.
    - Concrete block building Fire Pump House (fire water supply well system).
    - Railroad spur tracks.
    - Asphalt pavement.
    - Emergency generator.
    - Irrigation water well system.
    - Water supply well system.
    - Septic systems (5).
    - Buried storm water sewer system.
    - Pad-mounted transformer.

- Cyclone fence around boundary.
- Interior cyclone fenced area (eastern portion of the Site being used by Circet USA).

3.5 CURRENT USES OF ADJOINING PROPERTIES

1. The land uses of the current adjoining properties included the following:
    - North -- W. Orange Blossom Trail (4-lanes with a median) followed by undeveloped and commercially developed properties (realtor, vertical blinds, Perfect Car Corp. (used cars sales), Best Automotive (used car sales), church campus, H&M Electrical & Utilities Contractor, Getsemani Temple, Heritage, and residential).
    - South -- Railroad track (active CSX) followed by commercially developed properties (warehouses/offices (Minute Maid and Coca-Cola)).
    - East -- Undeveloped properties (tree covered and/or cleared with exposed soil).
    - West -- Commercially developed property (Herc Rentals).

4.0 USER PROVIDED INFORMATION

For the user of this Phase I ESA Report to qualify for the EPA's Landowner Liability Protections, the user (Mandich Group) must provide relevant knowledge of the Site through their own observations, discussions with the property owner and/or any associated business operation(s), and/or review of other resources. Mr. Jamie Pardo, representing the Mandich Group, provided a completed User Questionnaire (Appendix E) that addressed the following concerns associated with Limited Liability Protection (LLP) provided under EPA's Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

4.1 TITLE RECORDS

1. Mr. Pardo did not provide a chain-of-title for the Site to attempt to identify the land uses, land use limitations, and/or possible presence of a REC.

4.2 ENVIRONMENTAL LIENS/ACTIVITY AND USE INFORMATION

1. Mr. Pardo did not provide nor identify the existence of any environmental liens and/or limitations of use.

4.3 SPECIALIZED KNOWLEDGE

1. Mr. Pardo indicated no specialized knowledge associated with the Site.

4.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

1. Mr. Pardo indicated the Site was already owned.

4.5 COMMONLY KNOWN INFORMATION OF THE PROPERTY

1. Mr. Pardo addressed the following for the Site that could identify conditions indicative of a release or threatened release:
    - Past Uses -- No knowledge.
    - Specific chemicals currently present or once present -- No knowledge.
    - Spills or chemical releases -- No knowledge.
    - Environmental cleanups -- No knowledge.

4.6 OBVIOUS OR LIKELY PRESENCE OF CONTAMINATION

1. Mr. Pardo indicated no knowledge of any contamination on the Site.

4.7 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

1. Based on the deed from the Orange County Clerk of Courts website, the current owner of the Site was MG88 Central Cold Storage II, LLC.
2. The Site was occupied by Cold Link Logistics (offices, dry and cold storage warehouses) who leased offices and/or ground storage to Eastern Quality Foods (offices and cold warehouse storage) and Circet USA (offices and ground storage).

4.8 REASON FOR PERFORMING PHASE I ESA

1. The Mandich Group requested the Phase I ESA be performed to assess the pre-sale environmental status of the Site.

4.9 USER PROVIDED DOCUMENT(S)

1. The Mandich Group provided a September 2019 Phase I ESA Report (selected pages in Appendix F) prepared by Colella & Associates, Inc. that included the Site and other parcels. The Mandich Group was given reliance to use the report in February 2020. The following summarizes the findings/conclusions of the September 2019 Phase I ESA Report:
    - Site
        - The historic land uses of the Site did not reveal the potential of a REC.
        - The current land uses of the Site revealed no REC's.
    - Adjoining Properties
        - Historic -- No obvious REC's but the potential exists as the southern and western adjacent properties were heavily developed with commercial and/or industrial operations. In addition, a railroad track was located along the site's southern boundary.
        - Current -- No obvious REC's but the potential exists as southern and western adjacent properties were heavily developed with commercial and/or industrial operations with active businesses. In addition, an active railroad track was located along the site's southern boundary.
    - Surrounding Properties
        - Historic -- The surrounding properties may have environmental conditions but were at a distance minimizing the potential to impact the site.
        - Current -- The surrounding properties may have environmental conditions, but were at a distance minimizing the potential to impact the site.
    - CREC -- None.
    - Suspect ACM -- Office (ceiling tiles, flooring, wallboard/joint compound, and window/door caulking) and pipe wrapping.
    - LBP -- All the buildings had suspect lead-based paint as they had painted surfaces and were built/maintained prior to the ban of LBP.
    - Vapor Migration -- The potential for vapor migration on or to the Site does not appear to exist
2. Cold Link Logistics provided the following documents (Appendix G):
    - Facilities map.
    - Waste Manifests (hazardous and non-hazardous) of recently removed wastes.
        - The hazardous wastes were associated with aerosol paint cans and classified as ignitable (D001), spent solvents (F003 and F005) with other sodium hydroxide liquid wastes being corrosive (D002).

5.0 RECORDS REVIEW

5.1 STANDARD ENVIRONMENTAL RECORDS (FEDERAL AND STATE)

1. Federal, state, and local regulatory files were assessed regarding information, if any, pertinent to environmental concerns related to the subject site and adjoining/surrounding properties as defined in Section 2.4 of this report. A search was performed of the environmental records/listings summarized in an environmental database report prepared by and obtained from Environmental Risk Information Services (ERIS). ERIS relies on government agency sources for the various listings/records associated with the applicable environmental regulations and their updates. Neither ERIS nor Colella & Associates, Inc. warrant the accuracy or reliability of the information provided in the ERIS' database report (Appendix C) regarding environmental databases as they are maintained by the respective government (federal, state, and local) agencies.

2. Colella & Associates, Inc. has conducted a limited field inspection and environmental regulatory agency file review to confirm the findings of the Environmental Database Report, particularly regarding the Site and adjoining properties.

3. The Executive Summary: Report Summary section of the environmental database report in Appendix C lists the databases that were searched.

5.1.1 FEDERAL

1. The following federal databases were reviewed for properties/facilities located within the identified search distances.
    - National Priorities List (NPL) -- The NPL was researched with regard to properties/facilities which have been assessed by the EPA and determined to represent a possible threat to public health or the environment.
        - The Site was not found in the NPL list.
        - No Adjoining/surrounding properties were found in the NPL list.
    - Superfund Enterprise Management System (SEMS), formerly the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) -- EPA SEMS records were researched to determine if a facility is listed that has the potential for releasing hazardous substances into the environment.
        - The Site was not found in the SEMS list.
        - No adjoining/surrounding properties were found in the SEMS list.
    - Superfund Enterprise Management System Archive (SEMS-ARCHIVE), formerly CERCLIS NFRAP, records sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a property has been completed and that EPA has determined no further steps will be taken to list the property on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.
        - The Site was not found in the SEMS-Archive list.

- No adjoining/surrounding properties were found in the SEMS-Archive list.

2. Resource Conservation and Recovery Act (RCRA) files were assessed regarding the listing of properties associated with the generation, transportation, storage, and disposal of hazardous waste. The designation of a particular facility as a "RCRA Site" does not necessarily mean that the property represents an immediate environmental concern for Adjoining landowners. A property is designated as an RCRA facility if site activity at that property includes the generation, treatment, storage, transportation, and/or disposal of hazardous waste. The following categories (1, 2, and 3) are applied to those facilities which generate reportable quantities of hazardous waste.

   - **Class 1 (Large Quantity Generator, LQG) -** Facilities which generate at least 1,000 kilograms (2,200 pounds) per month (kg/mo) of non-acutely hazardous waste or 1 kg/mo of acutely hazardous waste.
   - **Class 2 (Small Quantity Generator, SQG) -** Facilities which generate at least 100 kg (220 pounds)/mo, but less than 1,000 kg (2,200 pounds)/mo, of non-acutely hazardous waste.
   - **Class 3 (Conditionally Exempt Small Quantity Generator, CESQG) -** Facilities which generate less than 100 kg (220 pounds)/mo of non-acutely hazardous waste. This designation has been renamed to **Very Small Quantity Generator (VSQG)**.

   Information regarding Class 1, 2, or 3 generators within the identified search distance is as follows:

   - The Site was not found in the RCRA Generators list.
   - The following western adjoining properties were found in the RCRA Generators list. For details of both the adjoining properties, see the report in Appendix C.
     - 2501 W. Orange Avenue (Coca-Cola, flavor manufacturing). The database indicated the facility had ID FLR000047506 and was a SQG (of hazardous waste (ignitable (D001), chloroform (D022), spent halogenated solvents (F022), spent halogenated solvents (F002 and F003), spent nonhalogenated solvents (F005), and/or acetaldehyde (U001)) and had violations or undetermined details associated with compliance monitoring and enforcement as of January 2025.
     - 2659 W. Orange Avenue (Coca-Cola North America). The database indicated the facility had ID FLD053393039 and was a VSQG of hazardous waste (ignitable (D001), mercury (D009), silver (D011) spent halogenated solvents (F002 and F003), and spent nonhalogenated solvents (F005)) and had violations or undetermined details associated with compliance monitoring and enforcement as of January 2025.
   - Two (2) surrounding properties were found in the RCRA Generators list as VSQG of hazardous waste. For details of all the RCRA Generators on the surrounding properties, see the report in Appendix C.

3. Information regarding the presence of any RCRA Transportation, Storage, and Disposal (TSD) facilities within the search distance is as follows:

   - The Site was not found in the RCRA TSD list.
   - No Adjoining/surrounding properties were found in the RCRA TSD list.

4. Emergency Response Notification System (ERNS) was researched with regard to the site having experienced an incident that required emergency response activities.
    - The Site was not found in the ERNS list
5. FED Brownfields are abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination.
    - The Site was not found in the FED Brownfields list.
6. FED Engineering Controls (FED ENG) are databases of all contaminated properties in the state of Florida that are subject to engineering controls. Engineering controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property.
    - The Site was not found on the US ENG lists.
7. FED Institutional Controls (FED INST) are databases of all contaminated properties in the state of Florida that are subject to institutional and engineering controls.
    - The Site was not found on the US INST list.
8. The Facility Index System/Facility Registry System (FINDS) database identifies sites/properties subject to environmental regulations or interest.
    - The Site, 2560 W. Highway 441 aka Orange Blossom Trail (Cold Link Logistics), was found on the FINDS/FRS and had ID 110000704569.
9. Tier 2 database lists facilities that submit a chemical inventory report to the applicable regulatory agencies:
    - The Site, 2560 W. Highway 441 aka Orange Blossom Trail (Mid-Florida Freezer Warehouses Ltd), was found in the Tier 2 database for ammonia anhydrous. The database indicated the facility had ID 6142164.
    - The Site, 2560 W. Highway 441 aka Orange Blossom Trail (Cold Link Logistics), was found in the Tier 2 database for ammonia anhydrous. The database indicated the facility had ID 6697545.
    - For details, see the report in Appendix C.
10. Federal PFAS Databases
    - The Site was not found in the Federal PFAS databases.
    - No Adjoining properties were found in the Federal PFAS databases.
    - Four (4) surrounding properties were found in the Industry Sector of the Federal PFAS databases. The closest surrounding PFAS industry property was at least 990-feet west-northwest of the Site. For details, see the report in Appendix C.

5.1.2 STATE

1. Colella & Associates, Inc. personnel reviewed the following environmental records maintained by the FDEP and incorporated into the environmental database (Appendix C):
    - The listings maintained by the FDEP's Hazardous Waste Enforcement and Cleanup Programs regarding facilities regulated by the RCRA regulations.
    - The listing maintained by the FDEP's Solid Waste Management Division (SWF/LF) regarding facilities that dispose or treat solid waste (i.e. landfills, recycling facilities, etc.).

- The listing and file records maintained by the FDEP's Tanks Program regarding facilities with leaking underground storage tanks (LST).
- The FDEP maintains a list, DWM Contaminated Sites (DWM CONTAM) of facilities (primarily petroleum and dry-cleaning) that need cleanup but are not actively being worked on because the agency has insufficient funding.
- The listing and file records maintained by the FDEP's Tanks regarding facilities with a registered underground storage tank (UST) and/or an aboveground storage tank (AST).
- The listing maintained by the FDEP's Drycleaner Solvent Cleanup Program (DRYCLN) regarding drycleaning facilities (use and/or storage of the solvent).
- The listing maintained by the FDEP of properties included in the Voluntary Cleanup Program (VCP) regarding properties that have had a release and are being addressed voluntarily.
- The listing of properties having Engineering (ENG) / Institutional (INST) Controls.
- The listing of properties classified as Brownfields.
- The listings maintained by the FDEP in Groundwater Contamination Areas (GW CONTAM) include agricultural pesticide ethylene dibromide (EDB), a soil fumigant, and records regarding the presence of EDB in drinking water wells.
- The listings maintained by FDEP SPILLS regarding inland oil and hazardous materials incidents.
- The listings maintained by the EPA Tier 2 records of facilities that store or manufacture hazardous materials that submit a chemical inventory report.
- PFAS Aqueous Foam (AF) List (a list of firefighter training facilities).
- PFAS List (an AFFF and/or a potential source or environmental impact related to PFAS).

2. Within the designated search distances (Section 2.4), the following information was found in the respective database for the Site and adjoining and surrounding properties.
    - State Hazardous Waste Site (SHWS)
        - The Site was not found in the SHWS list.
        - No adjoining/surrounding properties were found in the SHWS list.
    - Solid Waste Landfill List (SWF/LF)
        - The Site, 2400 Mayflower Avenue (McGee Waste Tire), was found in the SWF/LF list. This address is currently the eastern portion of the Site being leased to Circet USA. The database indicated the facility had ID 100377, had a unauthorized disposal/processing complaint of used tires, and has a No Further Action status.
        - No adjacent properties were found in the SWF/LF list.
        - Five (5) surrounding properties were found in the SWF/LF list. All were associated with storing/processing waste tires. See the report in Appendix C for details.

- LST
  - The Site was not found in the LST list.
  - The following western adjoining properties were found in the LST database. For details of both adjoining LST properties, see the report in Appendix C.
    - 2659 Orange Avenue (Coca-Cola Foods). The database indicated the facility had ID 9200827, was a non-retail fuel user, had a discharge in April 1992 that required cleanup activities, was eligible for the FDEP Petroleum Cleanup Program's Abandoned Tank Restoration Program, and received a "No Further Action" determination as of May 1997.
    - 2659 Orange Avenue (Coca-Cola North America). The database indicated the facility had ID 9200233, was a non-retail fuel user, had a discharge in November 1995 that required cleanup activities, was not eligible for any of the FDEP Petroleum Cleanup Programs, and received a "No Further Action" determination as of August 2006.
  - Three (3) surrounding properties were found in the LUST list. The closest LUST surrounding property was located at 2901 W. Orange Blossom Trail (Diamond Food Mart, Facility ID 8513126). The report identified a petroleum discharge occurred in July 1990 and cleanup was ongoing. For details of the three (3) LUST surrounding properties, see the report in Appendix C
- DWM CONTAM
  - The Site was not found on the DWM CONTAM list.
  - The following western adjoining properties were found in the DWM CONTAM database. For details of all the adjoining DWM CONTAM properties, see the report in Appendix C.
    - 2501 Orange Avenue (Coca-Cola Special Projects AST 306). The database indicated the facility had ID ERIC_12758, and the cleanup status was classified "open".
    - 2501 Orange Avenue (Coca-Cola Special Projects Department). The database indicated the facility had ID ERIC_12702, and the cleanup status was classified "closed".
    - 2651 Orange Avenue (Coca-Cola Company). The database indicated the facility had ID ERIC_12867, and the cleanup status was classified "closed".
    - 2659 Orange Avenue (Coca-Cola Foods). The database indicated the facility had ID 9200827, had a discharge in April 1992 that required cleanup activities, was part of the petroleum program, and received a "No Further Action" determination as of May 1997.
    - 2659 Orange Avenue (Coca-Cola North America). The database indicated the facility had ID 9200233, had a discharge in November 1995 that required cleanup activities, was part of the petroleum program, and received a "No Further Action" determination as of August 2006.
  - Eight (8) surrounding properties were found in the DWM CONTAM list and were at least 990-feet away from the Site. For details of all the surrounding DWM CONTAM properties, see the report in Appendix C.

- UST
  - The Site was not found in the UST list.
  - The following western adjoining properties were found in the UST database. For details of both adjoining UST properties, see the report in Appendix C.
    - 2651 Orange Avenue (Coca-Cola Company). The database indicated the facility had ID 9200236, was an industrial plant, had an open status, and had a 550-gallon waste oil UST that was removed as of April 2019.
    - 2659 Orange Avenue (Coca-Cola Foods). The database indicated the facility had ID 9200827, was a non-retail fuel user, had a closed status, and had a 400-gallon kerosene UST and a 250-gallon unleaded gasoline UST that were both removed as of March 1992.
    - 2659 Orange Avenue (Coca-Cola North America). The database indicated the facility had ID 9200233, was a non-retail fuel user, had an open status, and had a 200-gallon kerosene UST that was removed as of June 1993.
    - For details of all the LST adjoining properties, see the report in Appendix C.
  - Five (5) surrounding properties, over 990-feet from the Site, were found in the UST database. For details of all the surrounding UST properties, see the report in Appendix C.
- AST
  - The Site, 2560 US 441 N (FL Express Trucking Inc.), was found in the AST database. The database indicated the facility had ID 8513283, was a non-retail fuel user, had a closed status, and had a 12,000-gallon leaded gasoline AST that was removed as of December 1996.
- BROWNFIELDS
  - The Site was not found in the BROWNFIELDS list.
- VCP
  - The Site was not found in the VCP list.
  - No adjoining/surrounding properties were found in the VCP list.
- DRYCLEANERS
  - The Site was not found in the DRYCLEANERS list.
  - No adjoining/surrounding properties were found in the DRYCLN list.
- PRIORITY CLEAN
  - The Site was not found in the PRIORITY CLEAN list.
  - No adjoining/surrounding properties were found in the PRIORITY CLEAN list.
- Tier 2 database lists facilities that submit a chemical inventory report to the applicable regulatory agencies:
  - The Site had the following listings in the Tier 2 database. For details, see the report in Appendix C.
    - 2560 W. Orange Blossom Trail (Mid-Florida Freezer Warehouse Ltd.) -- The database indicated the facility had ID 6142164 and in 2017 and 2018 reported ammonia anhydrous.

  - 2560 W. Orange Blossom Trail (Cold Link Logistics) -- The database indicated the facility had ID 7267404 and in 2022 and 2023 reported ammonia anhydrous and lead acid battery.
  - 2560 W. Highway 441 (Cold Link Logistics Orlando LLC) -- The database indicated the facility had ID 6697545 and in 2019 and 2020 reported ammonia anhydrous.

- PFAS Aqueous Film Forming Foam (AFFF)
  - The Site was not found in the AFFF list.
  - No adjoining/surrounding properties were found in the AFFF list.
- PFAS
  - The Site was not found in the PFAS list.
  - No adjoining/surrounding properties were found in the PFAS list.

3. The FDEP maintains petroleum storage systems, Brownfields, and OCULUS internet databases. The Oculus database covers environmental programs associated with storage tanks, hazardous waste, waste cleanup, Brownfields, solid waste facilities, and others. The databases were assessed to determine if the Site, adjoining, and surrounding properties had a file. The Site and the western adjoining property had files in various FDEP environmental programs.

4. Appendix H contains copies of the following documents or selected pages of the documents associated with the Site (2560 W. Orange Blossom Trail aka Highway 441).
   - May 7, 1991, Pollutant Storage Tank Inspection Report
     - Facility name -- FL Express Trucking, Inc.
     - ID -- 8944489.
     - Status -- Facility was closed.
     - Tank -- 6,000-gallon vehicular diesel AST (empty, no longer being used).
     - Containment -- Concrete block wall and concrete slab.
   - October 13, 1992, Pollutant Storage Tank Inspection Report
     - Facility name -- FL Express Trucking, Inc. (out of business for over 3-years).
     - ID -- 8513283.
     - Status -- Facility was being operated by Mid-Florida Freezer.
     - Tank -- 12,000-gallon leaded gasoline AST was removed prior to F.A.C. 17-761. No records of the removal were available.

5. Appendix I contains copies of the following documents or selected pages of the documents associated with the western adjoining properties (2501, 2651, and 2659 W. Orange Avenue).
   - 2501 W. Orange Avenue (Coca-Cola Company Flavor Manufacturing) -- June 21, 2022, FDEP Hazardous Waste Inspection Report
     - Compliance Status -- Out of compliance (administrative issues).
   - 2501 W. Orange Avenue (Coca-Cola Company Flavor Manufacturing) -- March 2024 Semi-Annual Groundwater Sampling Report and No Further Action without Conditions Request
     - A citrus product had a discharge near Tank No. 306.

- Groundwater flow in May and November 2011 was south-southeast, and easterly in 2013 and 2024.
- Isopropylbenzene (cumene) was the only compound that exceeded its Groundwater Cleanup Target Level (GTCL) and its Natural Attenuation Default Concentration (NADC).
- Recommendation -- No Further Action without Conditions.

- 2501 W. Orange Avenue (Coca-Cola Company Flavor Manufacturing) -- November 26, 2024, FDEP Site Rehabilitation Completion Order (SRCO)
  - Released from any further obligation to conduct site rehabilitation.
- 2651 W. Orange Avenue (Coca-Cola Company) -- April 25, 2019, UST Closure Report prepared by Wood Environmental & Infrastructure, Inc.
  - Single-walled 550-gallon UST removed in March 2019 during redevelopment of an area.
  - UST did not have any breaches
  - Soil and groundwater sampling and analysis were performed.
  - UST was cleaned and the pit was vacuumed. A total of approximately 110-gallons of oily water and/or sludge was removed.
  - Recommended No Further Action.
- 2501 W. Orange Avenue (Coca-Cola Company Flavor Manufacturing) -- July 4, 2019, FDEP Site Rehabilitation Completion Order without Conditions (SRCO)
  - Released from any further obligation to conduct site rehabilitation.
- 2659 W. Orange Avenue (Coca-Cola North America) -- March 2023 FDEP Hazardous Waste Generator Classification and Number
  - Classified -- LQG.
  - ID -- FLD053393039.
  - Hazardous Wastes -- Ignitable (D001), mercury (D009), methyl ethyl ketone (D035), and spent nonhalogenated solvents (F005) mercury (D009), and (F005).
- 2659 W. Orange Avenue (Coca-Cola North America) -- October 18, 2024, FDEP Hazardous Waste Generator Classification and Number
  - Classified -- VSQG.
  - ID -- FLD053393039.
  - Hazardous Wastes -- Ignitable (D001), mercury (D009), methyl ethyl ketone (D035), and spent nonhalogenated solvents (F005) mercury (D009), and (F005).

6. The Site had fuel ASTs that had been removed and no reported discharge. The western adjoining properties had citrus product and petroleum releases and the FDEP issued a No Further Action or SRCO for the releases.

5.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

5.2.1 LOCAL

1. The Orange County Environmental Protection Department (OCEPD) monitors and maintains the associated files for storage tank facilities (compliance and remediation) in Orange County. A records search was requested through the OCEPD for any environmental related files for the Site. The OCEPD research found files in the Petroleum

Restoration, Storage Tank Compliance, and Compliance Waste Management programs environmental departments. Appendix J contains the records search results and relevant information is summarized below:

- Petroleum Restoration and Storage Tank Compliance -- Had IDs of 8513283 and 8944489.
- Compliance Waste Management -- Odor complaint.

5.2.2 LAND RECORDS

1. Orange County Land Records were not reviewed to determine the activity and use limitations of the Site. The Orange County Property Appraiser's internet website was reviewed for the Site's ownership information and identified the owner MG88 Central Florida Cold Storage II, LLC.

2. The resource identified the land use as cold storage, which could develop a REC from the release of refrigeration oils and/or the refrigerant from the operating equipment.

5.3 PHYSICAL SETTING SOURCE(S)

5.3.1 U. S. G. S. TOPOGRAPHIC MAP

1. The U.S.G.S. topographic map presents general development and improvements in the area the map covers, in addition to the topography. The 2024 Apopka, Florida, U.S.G.S. Quadrangle Map (Figure 2) did not show any development symbols on the Site.

2. The map indicated the ground surface elevation of the Site was approximately 125-feet above the MSL.

5.3.2 REGIONAL GEOLOGY AND HYDROGEOLOGY

1. Orange County consists of unconsolidated sand with varying lenses/layers of clay. The area has soils that drain moderately to well. Based on the Site Assessment Reports, the Site has silty fine sand to approximately 21-feet BGS and then grades into a hard green-gray clay to approximately 40-feet BGS.

2. The surficial aquifer (0- to approximately 25-feet BGS) is a source of small quantities of water.

3. Groundwater from the Floridan Aquifer is the primary source of potable water.

5.4 HISTORICAL USE OF THE SITE

1. The historic uses of the Site were investigated through the review of aerial photographs, fire insurance maps, property tax files, land title records, U.S.G.S. maps, city directories, building department records, and/or zoning use records. The objective is to develop a history of the previous uses of the Site to identify the likelihood of past uses having led to a REC on the Site.

5.4.1 AERIAL PHOTOGRAPHS

1. Aerial photographs of the Site and area (Section 06, Township 21, Range 28) were readily available for review on the Orange County Property Appraiser's website. Aerial photographs were also obtained from the Florida Department of Transportation and the University of Florida Library websites, and from ERIS (Appendix C).

2. The aerial photographs provide a means to evaluate the site's land use history and development. An unrecorded REC, if any, related to the Site's land use could be reflected in the aerial photographs. Appendix B provides a copy of a portion of aerial photographs (2025, 2019, 2013, 2007, 1999, 1990, 1987, 1978, 1969, 1954, and 1947) of the Site.

3. The review of the aerial photographs revealed the following regarding the conditions of the Site:
    - 1947 -- The Site had a commercial warehouse building straddling the western boundary and remnants of former citrus groves were noted on the remainder of the Site.
    - 1954 -- Additional buildings (office and warehouse) were present east of the existing western building. The eastern portion appeared to have a residential land use (trailer/mobile homes) along roads on the Site that extend from the north (Albrecht and Shepard Avenues). The central portion had ground cover.
    - Circa 1969 to 2025 -- Commercially developed with numerous warehouse buildings as viewed on May 7, 2025. The eastern area appeared to be used for ground storage and parking, unimproved with ground cover followed by dense tree cover along the eastern boundary.
4. The aerial photographs indicated the Site's use was storage and/or manufacturing, with the number of large warehouses between 1954 and 2025, trailer parking, and ground storage.

5.4.2 FIRE INSURANCE MAPS

1. ERIS reviewed available fire insurance maps and concluded they were not developed (Appendix C) for this area of Apopka, Florida, for review to possibly identify the historic land uses of the Site.

5.4.3 PROPERTY TAX FILES

1. The property tax files were not reviewed to identify historic land uses of the Site, but to identify the current land use and, if possible, an associated REC.
2. The Orange County Property Appraiser's records for the Site were reviewed through their internet website. Appendix D contains a copy of the file of the Site and is summarized below:
    - Owner -- MG88 Central Florida Cold Storage II, LLC.
    - Land Size -- Approximately 27.63-acres.
    - Land Use -- Industrial cold storage.
    - Building(s)
        - Warehouses (4) were built between 1953 and 1963.
        - Office -- 1951.
    - Extra Features -- Paved asphalt.
3. The resource identified the possible land use as cold storage, which could develop a REC from the release of refrigeration oils and/or the refrigerant from the operating equipment

5.4.4 LAND TITLE RECORDS

1. Colella & Associates, Inc. developed the following ownership information from the deeds obtained from the Orange County Clerk of Records website:
    - February 2020 -- MG88 Central Florida Cold Storage II, LLC.
    - December 2019 -- Mid-Florida Freezer Properties, LLC.
    - December 1988 -- Mid-Florida Warehouses, LTD.
    - March 1986 -- Plymouth Citrus Products Cooperative.
    - Prior to March 1986 -- Florida Gas Transmission Company (f/k/a Houston Texas Gas and Oil Corporation).

2. The property owner's names indicate the Site's use as probably storage (warehouse and cold storage) that could include possible citrus trucking (fuel and maintenance) and service of vehicles (fuel and maintenance). A REC associated with any of the operations (cold storage, fuel storage/dispensing, and vehicle maintenance) is possible.

5.4.5 U. S. G. S. MAP

1. The U.S.G.S. topographic map presents general development and improvements in the area the map covers and the topography. ERIS compiled versions of the Lake Jessamine, Florida U. S. G. S. map (Appendix C). The Apopka, Florida, U.S.G.S. topographic maps (versions 1960, 1960 (photo-revised 1980), 2012, 2015, 2018, and 2021) were reviewed and provided the following information:
    - 2012 -- The map provided no development information.
    - 2018, Figure 3 -- The map provided no development information.
    - 2015 -- The map provided no development information.
    - 2012 (Figure 4) -- The map provided no development information.
    - 1960 (Photo-revised 1980), Figure 5
        - Developed with numerous buildings (warehouses and offices) with black, black cross-hatch, and purple colors. The black indicates development occurred before 1960, and the purple after 1960.
        - Mayflower Avenue extended into the Site and connected to Albrecht Avenue, which extended from the north.
        - Small black building symbols were noted near the intersection of the roads on the Site. The black color indicates development occurred before 1960. A cross was noted by one of the buildings indicating a church.
    - 1960, Figure 6
        - Developed with numerous buildings (warehouses and offices) with a black and black cross-hatch color. The black indicates that development occurred before 1960.
        - Mayflower Avenue extended into the Site and connected to Albrecht and Shepard Avenues, which extended from the north.
        - Numerous small black building symbols were noted along the roads on the Site, indicating a residential land use. The black color indicates development occurred before 1960. A cross was noted by one of the buildings indicating a church.
2. The resource identified that the Site was developed commercially before 1960 and retained the same development through at least 1980. The eastern portion of the Site had roads that extended from off the Site and had some residential land use during the 1960s and before.

5.4.6 STREET DIRECTORIES

1. ERIS reviewed available city directories covering various years between 1969 and 2023 for listings of the Site's address (2560 W. Orange Blossom Trail) and for a former Shepard Avenue on the Site and prepared a City Directory Report (copy in Appendix C).

2. The report indicated the following listings for the 2560 W. Orange Blossom Trail:
    - Mid-Florida Freezer Warehouses (1996, 2003, 2008, 2012, 2016, 2020, and 2023).

- McGee Tire Co. (2016, 2020, and 2023).
- Absolute Warehouse Services Mid-Florida (2012, 2016, and 2020).
- Absolute Storage Products (2012).
- Associated Hardwoods Inc. (2008 and 2012)
- Specialty Timbers (2008, 2012, and 2016).
- Cady Industries (2003, 2008, and 2012).
- Cargill Salt (2000, 2003, 2008, and 2012).
- Akzo Nobel Salt, Inc. (1996).
- Weyerhaeuser Building Products (1996).
- Plymouth Citrus Products Co-op. (1980 and 1985).

3. The report indicated residential listings on Shapard Avenue on the Site.
4. The resource identified business names on the Site that could have or had operations (trucking with fueling and/or vehicle service/maintenance) that have the potential to result in a REC on the Site.

5.4.7 BUILDING DEPARTMENT RECORDS

1. This resource was not investigated to determine the historic land uses of the Site.

5.4.8 ZONING RECORDS

1. This resource was not investigated to determine the historic land uses of the Site.

5.4.9 HISTORICAL USE COMPLETENESS

1. The historical research of the Site's land use was completed to 1947. Resources were not readily available to address the Site's land uses and possible presence of a REC before 1947. Based on the 1947 aerial photograph, the Site's land use before 1947 would appear to have been primarily as a citrus grove with some commercial development in the western area and residential development in the eastern area. The historical use assessment of the Site is complete and has met the objective.

5.5 HISTORICAL USE OF THE ADJOINING/SURROUNDING PROPERTIES

1. The historic uses of the subject area were investigated by reviewing aerial photographs, fire insurance maps, property tax files, land title records, U.S.G.S. maps, city directories, building department records, and/or zoning use records. The objective is to develop a history of the previous uses of the Adjoining and surrounding area to identify the likelihood of past uses having led to an environmental condition that could result in a likely REC or REC on the Site.

5.5.1 Aerial Photographs

1. Aerial photographs of the Site's area (Section 06, Township 21, Range 28) were readily available for review on the Orange County Property Appraiser's website. Aerial photographs were also obtained from the Florida Department of Transportation and the University of Florida Library websites and from ERIS (Appendix C).
2. The aerial photographs provide a means to evaluate the Site's land use history and development. Unrecorded environmental concerns, if any, related to the land uses in the area surrounding the Site could be reflected in the aerial photographs. Appendix B contains a copy of a portion of aerial photographs (2025, 2019, 2013, 2007, 1999, 1990, 1987, 1978, 1969, 1954, and 1947) of the area around the Site.

3. The review of the aerial photographs revealed the following regarding the Adjoining and surrounding properties to the Site:
    - North
        - 1947, 1954 -- Road (current location of W. Orange Blossom Trail), 2-lanes, followed by citrus groves and developed properties, but the land uses could not be identified.
        - 1969, 1973, 1978 -- Road (current location of W. Orange Blossom Trail), 4-lanes, followed by citrus groves, a large parking lot, and residential and commercial developed properties in the former citrus groves. In 1978, the large parking lot was vacant of vehicles.
        - 1987 to 2025 -- Road (current location of W. Orange Blossom Trail), 4-lanes, followed by undeveloped and/or commercially developed properties.
    - South
        - 1947 to circa 1954 -- -- Railroad track followed by a commercially developed property, but the land use could not be identified. In 1954, additional commercial (warehouse buildings) development was noted.
        - 1969 to 2025 -- Large commercial development (multiple warehouses and ASTs) as viewed during the site inspection.
    - East
        - 1947 -- Undeveloped and commercially developed properties.
        - 1954, 1969, 1973, 1978, 1987 -- Same as 1947 with a large citrus grove and residentially developed properties. In 1978, additional commercial buildings were noted along Orange Blossom Trail. In 1987, the residential buildings were not present.
        - 1990 to 2025 -- Citrus grove with commercially developed properties along Orange Blossom Trail. In 1999, the citrus grove was overgrown with native trees. In 2025, the commercial buildings along Orange Blossom Trail were removed.
    - West
        - 1947, 1954, 1969 -- Commercially developed property with numerous buildings.
        - 1973 to 2025 -- Commercial development (warehouse/office). In 1990, a few buildings had been removed. In 1999, additional buildings had been removed, and a spur railroad track was noted. After 199, ground storage was noted in different areas.
4. The resource identified the adjoining and surrounding properties being commercially, but the land uses could not be identified to determine the potential presence of an environmental condition.

5.5.2 FIRE INSURANCE MAPS

1. ERIS reviewed available fire insurance maps and concluded they were not developed (Appendix C) for this area of Apopka, Florida, for review to possibly identify the historic land uses of the adjoining/surrounding properties.

5.5.3 PROPERTY TAX FILES

1. The property tax files were not reviewed to identify historic land uses of the adjoining/surrounding properties to identify the presence of any environmental condition that could result in a likely REC or REC on the Site.

5.5.4 LAND TITLE RECORDS

1. Orange County Land Records were not reviewed to determine the activity and use limitations of the adjoining and surrounding properties to the Site.

5.5.5 U. S. G. S. MAP

1. The U.S.G.S. topographic map presents general development and improvements in the area the map covers, in addition to the topography. The Apopka, Florida U.S.G.S topographic maps (versions 1960, 1960 (photo-revised 1980), 2012, 2015, 2018, 2021, and 2024) were reviewed to potentially identify the development and/or land uses of the adjoining and surrounding properties to the Site over time.

2. The 2024 (Figure 2), 2021, 2018 (Figure 3), and 2015 Apopka, Florida U.S.G.S. topographic maps provided the following information about the adjoining/surrounding properties:
    - North -- The map did not present any development information on the adjoining and surrounding properties, but did show improvement as a road (W. Orange Blossom Trail, US 441, or County Road 500) on the adjoining property.
    - South -- The map did not present any development information on the adjoining and surrounding properties, but did show improvement as a railroad track on the adjoining property and as a road (County Road 437 or W. Orange Avenue) on the surrounding property.
    - East -- The map did not present any development information on the adjoining and surrounding properties, but did show improvement as a road (Boy Scout Boulevard) on the surrounding property.
    - West -- The map did not present any development information on the adjoining and surrounding properties.

3. The 2012 Apopka, Florida U.S.G.S. topographic map (Figure 4) provided the following information about the adjoining/surrounding properties:
    - North -- The map showed improvement as a road (US 441) on the adjoining property, but did not present any development information on the surrounding properties.
    - South -- The map did not present any development information on the adjoining properties, but did show improvement as a road (W. Orange Avenue) on the surrounding property.
    - East -- The map did not present any development information on the adjoining and surrounding properties.
    - West -- The map did not present any development information on the adjoining and surrounding properties.

4. The 1960 (photo-revised 1980) Apopka, Florida U.S.G.S. topographic map (Figure 5) provided the following information about the adjoining/surrounding properties:
    - North -- The map showed improvement as a road (US 441 or County Road 500) on the adjoining property, followed by developed properties with a black or purple building symbol (black indicates development before 1960 and purple after 1960).
    - South -- The map showed an improvement as a railroad track on the adjoining property, followed by a commercially developed property with purple and black building symbols (black indicates development before 1960 and purple after 1960).

- East -- The map did not present any development information on the adjoining properties, but it showed development with black and purple building symbols (black indicates development before 1960 and purple after 1960) on the surrounding properties.
- West -- The map showed a commercially developed property on the adjoining property with black and purple buildings (black indicates development before 1960 and purple after 1960).

5. The 1960 Apopka, Florida U.S.G.S. topographic maps (Figure 6) provided the following information about the adjoining/surrounding properties:
    - North -- The map showed improvement as a road (US 441 or County Road 500) on the adjoining property, followed by a citrus grove and a few developed properties with black or purple building symbols (black indicates development before 1960 and purple after 1960).
    - South -- The map showed an improvement as a railroad track on the adjoining property, followed by a commercially developed property with black building symbols (black indicates development before 1960) and water tanks.
    - East -- The map did not present any development information on the adjoining properties, but it showed development with black building symbols (black indicates development before 1960) on the surrounding properties.
    - West -- The map showed a commercially developed property on the adjoining property with black buildings (black indicates development before 1960).
6. The adjoining and surrounding properties as viewed from the resources were developed prior to and after 1960, but the land uses could not be identified to determine the potential presence of an environmental condition.

5.5.6 STREET DIRECTORIES

1. ERIS reviewed available city directories covering various years between 1969 and 2023 for listings on the adjoining road (W. Orange Blossom Trail) and surrounding roads (Lake View Drive, Mayflower Avenue, Shepard Avenue, and W. Orange Avenue). Colella & Associates, Inc. reviewed the ERIS prepared City Directory Report (Appendix C). The following listings of the adjoining and surrounding properties could have environmental conditions that could be considered a significant threat to cause an environmental concern to the Site:
    - Northern Adjoining Property -- 2428 W. Orange Blossom Trail
        - ASAP Blinds (2016, 2020, and 2023).
        - Real Estate office (2016).
        - Paw Paws Barn, thrift shop (2003, 2008, and 2012).
    - Northern Adjoining Property -- 2424 W. Orange Blossom Trail
        - Residential (1980, 1990, 1996, 2000, 2020, and 2023).
    - Northern Surrounding Property -- 2601 W. Orange Blossom Trail
        - Winfield Solutions, agricultural products (2012, 2016, 2020, and 2023).
        - Pro Source One (2003, 2008, and 2012).
        - Apopka Plastics, used merchandise (1996 and 2008).
        - Falcon Growers, Inc. (1990).

- Northern Surrounding Property -- 2591 W. Orange Blossom Trail
  - Lotus Financial and Lotus Insurance & Mortgages (2012, 2016, 2020, and 2023).
  - U-Haul Co. (2008 and 2012).
  - Elite Car Connection, used cars (2008 and 2012).
  - Forsyth Auto Group (2000, 2003, and 2008).
  - Ryder Truck Rental (2003).
- Northern Surrounding Property -- 2551 W. Orange Blossom Trail
  - HM Electrical & Underground, utility contractors (1996, 2000, 2003, 2008, 2012, 2016, 2020, and 2023).
  - Apopka Truck Brokerage (1985).
  - Elite Car Connection, used cars (2008 and 2012).
- Northern Surrounding Property -- 2457 W. Orange Blossom Trail
  - Elite Car Connection (2016, 2020, and 2023).
  - Millennium Autosales (2016, 2020, and 2023).
  - WW Gay Mechanical Contractors (2020 and 2023).
  - FL Auto Wholesellers (2012).
  - FL Gator Motors Inc. (1996, 2000, and 2003).
- Northern Surrounding Property -- 2455 W. Orange Blossom Trail
  - Spectrum Electric (1996, 2000, 2003, 2008, 2012, 2016, 2020, and 2023).
  - Carter Electric (2008, 2012, and 2016).
  - Penske Truck Rental (1990).
- Northern Surrounding Property -- 2409 W. Orange Blossom Trail
  - Sunshine State Homes (2003).
- Northern Surrounding Property -- 2385 W. Orange Blossom Trail
  - Lizardo's Auto Sales (2008, 2012, and 2016).
  - Crown Sales (2003).
  - Comanche Pottery (1985 and 1990).
- Southern Adjoining Property -- 2501 (aka 321) W. Orange Avenue
  - Coca Cola Special Products (1969, 1972, 1976, 1980, 1996, and 2023).
- Eastern Adjoining Property -- 2322 W. Orange Blossom Trail
  - Robs Custom Car Audio (2016, 2020, and 2023).
  - Good News Auto Sales (2016).
  - Jim Martin Machine Shop (2003, 2008, and 2012).
  - Soil Systems Inc., lawn & garden equipment (2003, 2008, and 2012).
- Eastern Surrounding Property -- 2300 W. Orange Blossom Trail
  - La Parada Mexicana Deli Mart (1969, 1972, 2012, 2016, 2020, and 2023).
  - Fiesta Mercado (2008).
  - First Antioch Missionary (1996, 2000, and 2003).

2. The historic land uses of the adjoining and surrounding properties from the resource identified various businesses that typically have operations that could result in an environmental condition on the respective property.

5.5.7 BUILDING DEPARTMENT RECORDS

1. This resource was not investigated to determine historic land uses of the area.

5.5.8 ZONING RECORDS

1. This resource was not investigated to determine historic land uses of the area.

5.5.9 HISTORICAL USE COMPLETENESS

1. The historical research of the adjoining and surrounding properties was complete to circa 1947. Resources were not readily available to address the land uses and possible presence of an environmental condition on the adjoining and surrounding properties that could result in a likely REC or REC on the Site prior to 1947. Based on the 1947 aerial photograph, the adjoining and surrounding properties before 1947 would appear to be similar, residential and commercially developed properties, and citrus groves.

6.0 SITE RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

1. James C. Colella, P. E. of Colella & Associates, Inc. conducted an inspection of the Site on May 7, 2025. The inspection included a walk-through along the Site's boundary lines, within the dry storage and office buildings, and various paths across the Site. Recognizing that food items were being stored in the refrigerated and freezer warehouse, an interior inspection was not performed. A curb-side reconnaissance of the surrounding area was also conducted in a one-quarter mile radius.

2. Emphasis of the inspection was placed on locating storage tanks, electrical equipment containing Polychlorinated Biphenyl (PCBs) dielectric fluid, petroleum and/or chemical waste disposal practices and/or petroleum and/or chemical usage throughout the Site. Additionally, surface water conditions, stressed vegetation, point and non-point sources of wastewater discharge, waste disposal areas, and other areas of environmental concern were identified and inspected, if present. Notes were recorded during all phases of the field inspection and photographs (Appendix A) were taken of the areas of interest related to a likely REC and/or a REC.

3. The performance of the Phase I ESA cannot wholly eliminate the uncertainty regarding the potential existence of a REC on the Site. The Site's limiting conditions which could cover a REC included natural grass/vegetation ground cover, asphalt/concrete pavements, loading/unloading ramp, and the building.

4. Colella & Associates, Inc.'s methodology to address the presence of a REC within any of these limiting conditions included reviewing historic aerial photographs and interviewing those individuals knowledgeable of the Site.

6.2 GENERAL OBSERVATIONS

1. The Site was in an area of commercially developed properties along W. Orange Blossom Trail and W. Orange Avenue. Site conditions as noted during the inspection consisted of the following:
    - Access was from W. Orange Blossom Trail and Mayflower Avenue (deliveries or exiting loaded trucks).
    - The Site had an irregular configuration with a northwest-southeast orientation.
    - The Site was developed as follows:
        - 1-story office building (Cold Link Logistics and Eastern Quality Foods).
        - Three (3) large warehouse buildings.
            - Western Building -- Dry storage, forklift room, maintenance room, battery charging area, refrigeration equipment/motor room, and employee break room.
            - Northern Building (adjacent to W. Orange Blossom Trail) -- Subdivided into freezer, refrigerated, or dry storage units plus an office area (Circet USA) and a refrigeration equipment room.
            - Southern Building (adjacent to the railroad spur tracks) -- Subdivided into freezer and refrigerated storage units.
            - Office trailer -- Manage traffic in and out of the Site at the Mayflower Avenue entrance.
        - Fire Water Pump Building -- Diesel powered water pump engine with a ~300-gallon diesel AST. A localized area on the floor within the building was covered with an absorbent indicating a release had occurred. There was no indication the release drained out of the building.

- The eastern portion of the Site was undeveloped with dense trees, and an improved area (asphalt pavement and gravel over) was being used for ground storage (Circet USA, tenant).
- Railroad spur tracks (2) were noted along the southern boundary serving the Site.
- Asphalt pavements were between the north and south buildings and in the western and eastern areas of the Site.
- Stormwater catch basins were noted throughout the Site.
- An emergency generator with self-contained fuel storage was located south of the office building.
- An irrigation water well was located west of the office building.
- An inactive AST within a concrete secondary containment structure was west of the office building. Some rainwater had collected in the containment structure.
- A water supply well and vertical storage AST was noted in the northwestern portion of the Site.
- Five (5) septic systems were noted as follows:
  - East and west sides of the office building.
  - West side of the emergency generator.
  - East side of the Southern Building.
  - East side of the Northern Building.
- Concrete pads, loading docks and pavements on the north and west sides of the western building.
- Floor drains were noted in the dry storage warehouses and on docks supporting the units in the Southern Building.
- A solid waste roll-off box was noted on the south side of the Northern Building and two (2) were noted on the west side of the Western Building. No unusual materials were noted in the boxes. No stains were noted on the roll-off box or the ground surface.
- Six (6) unlabeled drums were staged on a concrete slab in the southwest corner of the Site near the western boundary. Some staining was noted on the concrete.
- An oil-stained area was noted south of the staged drums on a paved surface.
- There was no evidence of illegal dumping of any waste materials.
- A pad transformer was noted near the southeast corner of the office building and a pole mounted transformer was near the Fire Water Pump Building. There was no indication a release had occurred from the transformers.
- Three (3) flammable storage cabinets were in the maintenance room (Western Building). Various forklift service/maintenance and building maintenance products were noted in each cabinet. The were no significant stains on the concrete floor by the cabinets.
- A large horizontal gas (chemical or natural) tank was noted on the north side of the Western Building by the maintenance room.
- Two (2) plastic ASTs were noted on the north side of the Southern Building collecting condensate from the two (2) roof top condensers.
- Air compressors were noted in the Western and Southern Buildings.
- A drum of refrigeration oil was noted in the motor room (Western Building).

- The offices on the east side of the Northern building and a portion of the eastern area (ground storage) of the Site were leased to Circet USA.

6.3 EXTERIOR OBSERVATIONS

1. The following sections identified the following information from the May 7, 2025, inspection of the Site.

6.3.1 HAZARDOUS SUBSTANCES/MATERIALS

1. Hazardous substances/materials, as defined by the Resource Conservation and Recovery Act (RCRA), were noted in the flammable cabinets in the maintenance room (Western Building) as equipment and building maintenance products. Ammonia, supporting the refrigeration system, was also present in the Western and Northern Buildings.

6.3.2 PETROLEUM PRODUCTS

1. Petroleum products as refrigeration oil (55-gllon drum) in the motor room (Western Building) and diesel fuel (Fire Water Pump Building) in a ~300-gallon AST were noted.

6.3.3 STORAGE TANKS

1. A diesel fuel AST (~300-gallon) in the Fire Water Pump Building and a horizontal tank (chemical or natural gas) on the east side of the Western Building were noted.
2. Absorbent material was noted on the concrete floor of the Fire Water Pump Building indicating a release had occurred.

6.3.4 ODORS

1. No odors were noted.

6.3.5 POOLS OF LIQUIDS

1. No pools of liquid were noted.

6.3.6 DRUMS

1. A drum (55-gallon) of refrigeration oil was noted in the motor room.
2. Drums (6) of unknown materials were staged on a pavement in the southwest corner of the Site near the western boundary.

6.3.7 HAZARDOUS WASTES AND/OR UNIDENTIFIED SUBSTANCES/CONTAINERS

1. Unlabeled staged drums (6) along the western boundary may be classified as containing hazardous waste based on the waste profile and manifests provided (Appendix G) by Cold Link Logistics for a recent removal of other similar containers.

6.3.8 PCBs

1. A utility company's transformers (pole mounted (near Fire Water Pump Building) and pad (southeast corner of the office building)) were noted. No leakage was noted from either transformer.

6.3.9 PITS, PONDS, OR LAGOONS

1. No pits, ponds, and/or lagoons were noted.

6.3.10 STAINED SOIL/PAVEMENT

1. No significant soil staining was noted.

2. Some asphalt staining was noted throughout the Site with a larger stained area noted in the southwest corner of the Site.

6.3.11 STRESSED VEGETATION

1. No stressed vegetated areas were noted.

6.3.12 SOLID WASTE

1. Solid waste roll-off boxes were noted on the Site. No unusual materials were noted, and no stains were noted on the asphalt.

6.3.13 WASTEWATER

1. No wastewater was generated.

6.3.14 WELLS

1. Two (2) water supply wells were noted. An irrigation well was noted west of the office building. A water supply well for use in the operations was noted in the northwest corner of the Site.

6.3.15 SEPTIC SYSTEMS AND CESSPOOLS

1. Five (5) septic system features servicing the Site were noted.
    - East and west sides of the office building.
    - West side of the emergency generator.
    - East side of the Southern Building.
    - East side of the Northern Building.

6.3.16 HEATING/COOLING BUILDINGS

1. The office building, employee break room, and office trailer had heat pumps for heating and cooling. The dry storage warehouse areas did not appear to be heated/cooled.

6.3.17 STAINS OR CORROSION ON FLOORS, WALLS, OR CEILINGS

1. No conditions of corrosion nor stains were noted.

6.3.18 DRAINS AND SUMPS

1. No floor drains or sumps were noted in the building except for the restrooms.

6.3.19 POTABLE WATER SUPPLY

1. The municipal water supply serviced the Site.

6.3.20 SEWAGE DISPOSAL SYSTEM

1. The septic systems (5) serviced the Site.

6.3.21 OTHER CONDITIONS OF CONCERN

1. During the site inspection, the following observations were made regarding other conditions of possible concern:
    - Drainage Paths -- The Site appears to have been developed with catch basins to drain stormwater runoff to the east.
    - Railroads -- Two (2) spur tracks were along the southern boundary supported the Site.
    - Heavy Equipment -- Forklifts.
    - Landfills, Dumping or Burial Activities -- No dumping and/or burial activities were noted.

- Monitoring Wells or Remedial Activities -- None were observed.
- Chemical Spills/Releases -- A release appeared to occur in the Fire Water Pump Building and on the pavement in the southwest corner of the Site (staging area for waste drums).
- Evidence of Groundwater and/or Surface Water Impacts -- None were observed.
- Oil/Gas Well Exploration, Production/Refinery Activities -- None were observed.

6.4 INTERIOR OBSERVATIONS

1. Internal observations were made of the office and dry storage buildings on May 7, 2025.
    - Dry Storage Buildings -- Walls (concrete block), ceiling (roof system) and floor (concrete)
    - Office Area -- Walls (painted wallboard), ceiling (suspended tiles), and floor (ceramic and vinyl tile/mastic).

6.5 BUSINESS ACTIVITY & ENVIRONMENTAL (EXPOSURE) RISKS

1. Business environmental risks were assessed regarding the potential to cause a REC to the Site through the business activity. The Site provides storage (ground, dry, refrigerated, and freezer) and has limited fuel (diesel) storage for the operation of the fire water pump. Current maintenance and management protocols appear to have minimized an environmental condition from the potential sources.
2. During the inspection on May 7, 2025, the presence of business environmental (exposure) risks, asbestos and lead, in suspect asbestos containing building materials (ACBM) and paint coatings, respectively, were assessed. The buildings had suspect ACBM (flooring/mastic, wallboard and joint compound, flooring/mastic, pipe wrapping, and/or window/door caulking). The buildings had painted surfaces.
3. During the inspection on May 7, 2025, the manufacturing of per- and polyfluoroalkyl substances (PFAS) compounds or the manufacturing of products with PFAS compounds was assessed. PFAS was not being produced, nor were products using PFAS compounds being manufactured/produced.

6.6 SITE PLAN

1. The conditions of the Site as observed on May 7, 2025, are provided in Figure 7.

6.7 ADJOINING PROPERTIES

1. During the inspection on May 7, 2025, the adjoining properties were viewed to identify the land uses and observe an environmental condition that could result in a likely REC or REC on the Site. The adjoining properties' land uses included:
    - North -- W. Orange Blossom Trail (4-lanes with median) followed by undeveloped and commercially properties (realtor, vertical blinds, Perfect Car Corp. (used cars sales), Best Automotive (used car sales), church campus, H&M Electrical & Utilities Contractor, Getsemani Temple, Heritage, and residential). No obvious environmental conditions that could result in a concern to the Site were observed from the curd-side inspection.
    - South -- Railroad track followed by commercially developed (warehouse type buildings) properties (Minute Maid and Coca-Cola). No obvious environmental conditions that could result in a concern to the Site were observed from the curd-side inspection.
    - East -- Undeveloped properties followed by Lake View Drive. No obvious environmental conditions that could result in a concern to the Site were observed from the curd-side inspection.

- West -- Commercially developed property (Herc Rentals). No obvious environmental conditions that could result in a concern to the Site were observed from the curd-side inspection.

7.0 INTERVIEWS

1. During the performance of the Phase I ESA, Colella & Associates, Inc. attempted to interview various individuals (owner, site manager, occupants, local government officials, and/or others) to understand the land use of the site.

7.1 OWNER

1. The Regional Maintenance Manager of Cold Link Logistics, Mr. Doug Barber, was interviewed and provided the following information:
    - Purchased Site -- 2019/20.
    - Associated with the Site -- 2.5-years.
    - Land Use Prior to Purchase -- Same, operated by Mid-Florida Freezer Warehouses.
    - Land Use -- Cold Link Logistics provides dry, refrigerated, and freezer storage warehouses and ground storage and leases buildings and ground area.
    - Tenants -- Eastern Quality Foods (office area and freezer space) and Circet USA (office area and ground storage). Tenants not allowed to perform maintenance on their vehicles on the Site.
    - Site Development -- Nothing new after 2019/20.
    - Monitoring Wells -- Not aware of any.
    - Drums
        - Refrigeration oil -- 55-gallon drum.
        - Wastes
            - Refrigeration Oil -- Drummed and disposed as needed.
            - Remnants -- The facility was cleaned of any unused and/or previously stored wastes, and other materials. Drums and containers of various wastes (hazardous and non-hazardous) were staged on a pavement/slab in the southwest corner of the Site and were removed on May 2, 2025, by Clean Earth. Other waste drums (6) were staged near the western boundary for removal in the next week. The pavement where the drums were staged became stained and will be cleaned.
    - ASTs
        - ~300-gallon diesel AST in the Fire Water Pump Building. A fuel release, approximately 5-gllons on May 2, 2025, from a malfunctioning float occurred and was addressed with an absorbent. It will be cleaned up by May 8, 2025. No fuel drained out of the building.
        - Horizontal gas (chemical or natural) was purchased by the previous owner and was not installed to any operation. Cold Link Logistics does not plan to use it and plans to remove it from the Site.
    - USTs -- None.
    - Plastic Vertical Tanks -- Located on the north side of the Southern Building to collect condensate from the condensers on the roof.
    - Emergency Generator -- Has a fuel storage base. Fuel is topped off as needed. Not aware of any release from the emergency generator or the fuel filling service, or overfilling.
    - Environmental Liens -- None.
    - Environmental Violations -- None known.

- Unusual Materials (drums, containers, debris) Discovered on the Site -- None known.
- Sewage Service -- Septic systems (5).
- Water Supply -- Municipal and wells (irrigation and operational use).
- Electrical Service -- Duke Energy.
- Fires -- None during last 2.5-ytears.
- Vehicle Maintenance -- Company vehicle maintenance performed off the Site.
- Stormwater -- Catch basins drain to the municipal stormwater system.
- Flood -- Site has not flooded.
- Floor Drains -- Drain to municipal stormwater system.

7.2 SITE MANAGER

1. See Section 7.2.

7.3 OCCUPANTS

1. The Site had tenants, Eastern Quality Foods (protein food supplier) and Circet USA (telecommunications contractor). A Cercit USA representative was interviewed and stated vehicle maintenance is not performed on the Site and only household cleaners and aerosol cans of paint are stored in their office. No chemical or petroleum products are stored on the Site in their leased ground storage area.

7.4 GOVERNMENT AGENCIES

1. The following agencies were contacted and provided the following information:
    - Orange County EPD -- FDEP Oculus Database.
        - No files were found for the Site in the database.
    - Orange County EPD -- Records Request.
        - Files were found in the Petroleum Restoration, Storage Tank Compliance, and Compliance waste Management for the Site's address (2650 W. Orange Blossom Trial. Appendix J contains the response from OCEPD.
    - Central District FDEP, Waste Cleanup -- FDEP OCULUS website.
        - No files were found for the Site.
    - Central District FDEP, Tanks -- Internet website and FDEP OCULUS website.
        - Files (Appendix H) were found for the Site's address.
        - Files (Appendix I) existed for the southern adjoining property
    - Central District FDEP, Hazardous Waste -- FDEP OCULUS website and Telephone Request.
        - No files were found for the Site.

7.5 OTHERS

1. No one else was interviewed.

8.0 FINDINGS

1. Colella & Associates, Inc. performed a Phase I ESA of the Site to determine if any environmental concerns exist due to current or previous on-site operations and/or by activities on adjoining and surrounding properties located within the Central Florida Industrial Park. Our findings regarding a REC, a HREC, a CREC and/or de-minimus conditions on the Site and environmental conditions on adjoining and surrounding properties that could impact the Site, and business activity and environmental (exposure) risks are presented below.

8.1 CURRENT LAND USES

1. Based on the resources reviewed and inspection performed, the current land use(s) of the Site and relevant environmental conditions are:
    - Land Use
        - The Site was commercially developed (western portion) prior to 1947.
        - By circa 1969 the Site was developed as viewed on May 7, 2025.
        - Various businesses (trucking, dry and cold storage, ground storage) operated on the Site.
    - Environmental Conditions
        - The Site's address (2560 W. Orange Blossom Trail) was found in the tank regulatory database as FL Express Trucking having two (2) ASTs. The ASTs were removed from the Site. No records were discovered that indicated a release had occurred from the ASTs.
        - Fuel (emergency generator and Fire Water Pump) and used refrigeration oil (new and waste) is stored. Fuel (diesel) is replaced as needed. Refrigerant oil (55-gallondrum) is bought as needed and the non-hazardous waste oil disposed in a timely manner.
        - Unused product and waste oil in drums and containers were recently staged along the western boundary for appropriate disposal and have been recently removed from the Site. Staining on the pavement/slab was noted where the drums/containers were staged. The stained area was being cleaned.
        - A small (~5-gallons) diesel release occurred in the Fire Water Pump Building and was controlled and cleaned up.
        - An inactive AST was in secondary containment.

2. Based on the resources reviewed and inspection performed, the current land uses and relevant environmental conditions of the adjoining properties were:
    - North --W. Orange Blossom Trail (4-lanes with median) followed by undeveloped and commercially properties (realtor, vertical blinds, Perfect Car Corp. (used cars sales), Best Automotive (used car sales), church campus, H&M Electrical & Utilities Contractor, Getsemani Temple, Heritage, and residential). No environmental conditions were identified from the resources reviewed or by observation.
    - South -- Railroad track followed by commercially developed (warehouse type buildings) properties (Minute Maid and Coca-Cola). No environmental conditions were identified from the resources reviewed or by observation.

- East -- Undeveloped properties followed by Lake View Drive. No environmental conditions were identified from the resources reviewed or by observation.
- West -- Commercially developed property (Herc Rentals). No environmental conditions were identified from the resources reviewed or by observation.

3. Based on the resources reviewed and inspection performed, the current land uses and relevant environmental conditions of the surrounding properties were
    - North -- Single-family residentially developed. No environmental conditions were identified from the resources reviewed or by observation.
    - South -- Commercially developed. No environmental conditions were identified from the resources reviewed or by observation.
    - East -- Single-family residentially developed. No environmental conditions were identified from the resources reviewed or by observation.
    - West -- Commercially developed. No environmental conditions were identified from the resources reviewed or by observation.

8.2 HISTORIC LAND USES

1. Based on the resources reviewed, the historic land use of the Site appears to have been a citrus grove. No environmental conditions were identified from the resources reviewed or by observation to determine if management products were stored and/or mixed on the Site. Management of a citrus grove uses pesticide, herbicide, and fertilizer products. The storage and mixing areas are typically areas of a possible environmental condition.
2. Based on the resources reviewed, the historic land uses and relevant environmental conditions of the adjoining properties were:
    - North -- Rural residential properties and citrus groves. No environmental conditions were identified from the resources reviewed or by observation.
    - South -- Undeveloped and residentially developed properties. No environmental conditions were identified from the resources reviewed or by observation.
    - East -- Undeveloped and residentially developed properties. No environmental conditions were identified from the resources reviewed or by observation.
    - West -- Commercially developed properties. Undeveloped and residentially developed properties. No environmental conditions were identified from the resources reviewed or by observation.
3. Based on the resources reviewed, the historic land uses and relevant environmental conditions of the surrounding properties were:
    - North -- Rural residential properties and citrus groves. No environmental conditions were identified from the resources reviewed or by observation.
    - South -- Undeveloped properties with natural ground cover and no business activity. No environmental conditions were identified from the resources reviewed or by observation.
    - East -- Undeveloped properties with natural ground cover. Rural residential properties and citrus groves. No environmental conditions were identified from the resources reviewed or by observation.

- West -- Commercially developed properties. No environmental conditions were identified from the resources reviewed or by observation.

8.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC)

1. Based on the information obtained and reviewed, a CREC was not identified on the Site.

8.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HREC)

1. Based on the information obtained and reviewed, a HREC was not identified on the Site.

8.5 ON-SITE DE-MINIMUS CONDITIONS

1. Based on observations during the inspection, de-minimus conditions, oil-stained pavements (staged waste drums) and Fire Water Pump Building (diesel release), were noted.

8.6 BUSINESS ACTIVITY & ENVIRONMENTAL (EXPOSURE) RISKS

1. Business environmental risks were assessed and the findings were as follows regarding the potential to be a business risk and/or cause a REC to the site through the business activity and/or its presence:
    - Current On-Site Business Activity -- No concern. The operations appear to be managed to minimize the development of an environmental condition.
    - Historic Business Activity -- No concern. The Site was undeveloped and did not have any business activity.
2. In addition to business activity concerns, business environmental (exposure) risks, asbestos and/or lead, in suspect asbestos construction building materials (ACBM) or in paint coatings of building materials, respectively, were assessed. Accordingly, our findings are:
    - ACBM -- The buildings had suspect ACBM (flooring/mastic, wallboard, pipe-wraps, caulking and joint compound).
    - Lead-Based Paint (LBP) -- The buildings had painted surfaces (interior and exterior).
3. PFAS concerns (manufacturing of PFAS compounds or use of PFAS compounds in manufacturing) were not identified from the current and recent businesses on the Site.

9.0 OPINION

1. Colella & Associates, Inc. performed a Phase I ESA of the Site and presented our findings in Section 8.0. Based on the findings, the following are Colella & Associates, Inc.'s opinion regarding the presence of a REC, CREC, HREC, de-minimus conditions associated with the Site, and the environmental concerns on the adjoining and surrounding properties that could cause an impact to the Site. In addition, our opinion of the business activity and environmental (exposure) risks is presented for the Site.

9.1 CURRENT LAND USES

1. Based on the findings, the available information and observations of the current Site's uses has not identified a condition to cause a significant environmental threat to the Site. The following addresses the environmental conditions noted during the inspection:
    - Diesel release in the Fire Water Pump Building -- No concern. De-minimus amount within the building that did not drain into the environment and was cleaned up on May 12, 2025.
    - Staged waste drums for disposal -- No concern. Reportedly, drums were being removed shortly after the inspection on May 7, 2025.
    - Stained pavement/concrete from former and current (6) staged waste drums -- No concern. Stained area was scheduled for cleaning after removal of the currently staged drums. Staining did not extend off the pavement/concrete and appeared to be surficial, indicating that the stain was relatively recent and was not a result of a continued release.
2. Based on the findings, the available information and observations of the current adjoining properties' land uses did not identify an environmental condition that would cause a significant environmental threat to the Site.
3. Based on the findings, the available information provided adequate justification that the current surrounding properties' land uses have environmental conditions. The available information provided adequate justification that the environmental conditions would not cause a significant environmental threat to the Site because of their distance and/or their location regarding the groundwater flow direction.

9.2 HISTORIC LAND USES

1. Based on the findings, a REC has not been identified from the historic land uses of the Site. The historic land use appears to be commercial (western end), citrus grove, and single-family residential (eastern end). A citrus grove typically uses products (pesticide, herbicide, and fertilizer) to manage and protect the growth of the citrus trees. The storage and mixing of the management products is typically an area where a release could occur. Available resources did not show when the Site was fully a citrus grove and if a building was present that could indicate storage/mixing was performed on the Site. Resources to document the land use prior to 1947 were not readily available to review the conditions of the citrus grove.
2. Based on the findings, environmental conditions have not been identified from the historic land uses of the adjoining properties except for citrus groves. The potential for the storage and mixing of citrus management products exists but readily available resources were not readily available to review the conditions of the citrus grove(s).

3. Based on the findings, environmental conditions have not been identified on the historic surrounding properties' land uses except for citrus groves. The potential for the storage and mixing of citrus management products exists but readily available resources were not readily available to review the conditions of the citrus grove(s).

9.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC)

1. A REC from a CREC was not identified on the Site.

9.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HREC)

1. A HREC was not identified on the Site.

9.5 ON-SITE DE-MINIMUS CONDITIONS

1. De-minimus conditions for the current land use of the Site did exist as oil-stained areas.

9.6 BUSINESS ACTIVITY & ENVIRONMENTAL (EXPOSURE) RISKS

1. Business activity risks were assessed, and the findings were as follows regarding the potential to cause a REC to the Site through the business activity and/or its presence:
    - Current On-Site Business Activity -- No concern, limited chemical and petroleum product use and noticeable good management practices regarding the handling of products that are used and associated wastes that are generated.
    - Historic On-Site Business Activity -- No concern, no business activity except for the management of a citrus grove.
2. The findings of the environmental (exposure) business risks associated with asbestos and/or lead were as follows:
    - ACBM – The buildings were built prior to the ban (1980) of using asbestos in construction materials. No construction debris stockpiles were found on the Site that could contain ACBM. One or more of the following actions may be required to address the potential presence of an ACBM:
        - Asbestos Survey -- Collect representative samples of the suspect ACBM and analyze the samples for the presence of asbestos. If the results show no asbestos fiber detections, no further action is required. If the results show asbestos fibers at a concentration above the regulatory level, subsequent actions, abatement and/or Operations & Maintenance (O & M) Plan, are required for continued use of the building. If the building is to be demolished an asbestos survey would identify the need to abate the identified ACBM prior to demolition activities.
        - Abatement -- If asbestos is detected above the regulatory level, the materials will need to be abated by removal before demolition or will need to be removed and/or sealed/secured for continued operation. If the suspect ACBM is not removed, the material must be posted (asbestos containing) and an Operation & Maintenance (O&M) Plan must be prepared and implemented.
        - O&M Plan -- An O&M Plan identifies the appropriate means to perform the necessary repairs to the suspect materials by employees and/or subcontractors. Employees and subcontractors performing maintenance/repair work will need to be trained in handling the ACBM. If an ACBM survey is not performed, then all suspect ACBM must be considered ACBM. The suspect ACBM must be posted, and all employees and tenants must be informed of the suspect ACBM.

- Lead-Based Paint -- The buildings were built prior to the ban (1980) of using lead in paint. The presence of lead in the observed paint coatings is considered possible. No construction debris stockpiles were found on the Site that could contain painted materials. One or more of the following actions may be required to address the potential presence of a lead-based paint coating.
  - Renovations -- If the paint coating is to be removed, the paint coating would need to be sampled and analyzed for the presence/absence of lead. The results will provide the information necessary to determine the appropriate removal and disposal requirements.
  - Demolition -- If a building is to be demolished, the debris should be disposed of in an environmental landfill, not a construction/debris landfill.
  - Continued current operations -- No actions required. If the existing buildings were to be used for residential and/or childcare, the painted surface would need to be analyzed for the presence of lead and the subsequent handling.

3. PFAS compounds associated with the businesses on the Site were not present.

9.7 VAPOR MIGRATION

1. Based on the Tier I Screen Guidance of ASTM E 2600-10 for vapor intrusion, the generally acceptable area of concern for petroleum hydrocarbon releases is within 600-feet and for solvent releases is within 1,760-feet of the site. Our opinion of the vapor migration concern is summarized below:
   - Site -- No concern exists, as there is no potential source.
   - Adjoining Properties -- No concern exists, as there is no known potential source.
   - Surrounding Properties -- No concern exists, as potential vapor sources are located outside the area of concern.

9.8 FURTHER ASSESSMENT

1. Further assessment of the Site is not warranted based on the observed conditions and resources reviewed.

10.0 CONCLUSIONS

1. Colella & Associates, Inc. performed a Phase I ESA of the Site and presented our findings in Section 8.0. Based on the findings, the following conclusions regarding the presence of a REC, CREC, and vapor migration are presented below for the Site, and adjoining and surrounding properties.

10.1 CURRENT LAND USES

1. Based on the findings of the current land uses of the Site, a REC or likely REC has not been identified.
2. Based on the findings, no conditions have been identified on the adjoining properties that could result in a likely REC or REC on the Site.
3. Based on the findings, some of the current surrounding properties' land uses have identified environmental conditions. Because the associated surrounding properties are located at a distance to the Site, they do not present conditions to result in a likely REC or REC on the Site.

10.2 HISTORIC LAND USES

1. Based on the findings, a REC has not been identified from the historic land use of the Site.
2. Based on the findings, no conditions have been identified from the historic land uses of the adjoining properties to result in a likely REC or REC on the Site.
3. Based on the findings, no conditions have been identified from the historic land uses of the surrounding properties to result in a likely REC or REC on the Site.

10.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC)

1. A CREC was not identified on the Site.

10.4 VAPOR MIGRATION

1. Based on the findings, the potential for vapor migration does not appear to exist from the use of the AST on the Site, and the absence of a source on the adjoining and surrounding properties.

10.5 DATA GAPS

1. The following data gaps are identified as part of this Phase I ESA:
    - The historical research did not satisfy the 5-year interval period. This inability is considered a deviation from the ASTM 1527-21 standard and constitutes a data failure. For the purposes and intent of this report, this data failure is not considered significant.
    - The user did not provide a chain of title for the Site. This is considered a deviation from the ASTM 1527-21 standard and constitutes a data failure. The environmental professional is not responsible for the acquisition of the chain-of-title.
    - All the land uses on the Site may not be identified because of the limited reasonably available resources. For the purposes and intent of this report, this data failure is considered significant, but with the absence of readily available resources, data gaps cannot be resolved.
    - The historical research did not extend to 1940. This inability is considered a deviation from the ASTM 1527-21 standard and constitutes a data failure. The earliest aerial photograph (1947) indicates that the Site and the

surrounding area had limited commercial and rural residential development with citrus groves. It is our opinion that a resource is not reasonably available to address the land use(s) and possible environmental concerns before 1947. Based on the 1947 aerial, the Site and the surrounding area most likely would be primarily undeveloped with citrus groves.

11.0 DEVIATIONS

1. Colella & Associates, Inc. performed a Phase I ESA of the Site in accordance with the ASTM Standard E 1527-21.

11.1 DELETIONS

1. There were no deletions from the ASTM Standard.

11.2 ADDITIONS -- NON-SCOPE CONSIDERATIONS

1. There were no additions to the ASTM Standard.

12.0 ADDITIONAL SERVICES

1. No additional services were requested.

13.0 REFERENCES

1. Reference materials used to assess the Site for a REC included the following:

14.0 SIGNATURE AND QUALIFICATION

May 15, 2025

Mandich Group

Colella & Associates, Inc. has completed a Phase I Environmental Site Assessment (ESA) of the subject property (Site) located at 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) in Apopka, Orange County, Florida. We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional. We have the specific qualifications based on education, training, and/or experience to assess a property of the same nature, history, and setting of the subject property in conformance with the generally accepted Phase I ESA standards and practices.

This Phase I ESA was performed in general accordance with the current ASTM Standard E 1527-21, except as noted in Section 2.4 of this report. This report presents the results of our findings from visual surveys, evaluation of available data, and discussions with personnel knowledgeable of the properties and various governmental agencies.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of this part [40 CFR Part 312]. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

James C. Colella, P.E.
Principal
Florida Registration No. 41545
15 May 25

JAMES C. COLELLA, P. E.

Mr. Colella has over 30 years of experience in assessing, designing, building and negotiating solutions to environmentally sensitive issues/operations. In Florida, Mr. Colella has worked and negotiated with local and state regulatory agencies in preparing permit applications, consent orders, work plans and final reports associated with assessments and remedial actions. Mr. Colella has the experience in understanding the technical issues, the implementability of a solution, the applicable regulatory requirements and the business impact. The integration of these aspects is critical in resolving environmental concerns/issues and achieving regulatory compliance. As Project Manager, Mr. Colella's understanding of these aspects for any project provides the experience required to minimize the work to fulfill the client's objective while complying with regulatory criteria.

EXPERIENCE

November 1995 to Present: Principal, Colella & Associates, Inc.

- Managed/performed tasks associated with a petroleum contamination assessment for a freight transportation facility in Jacksonville, Florida. Tasks included characterizing the subsurface soils by drilling exploratory borings, delineating the impacted ground water plume in a phased process by installing monitoring wells and sampling/analyzing the ground water, reducing the data to determine need for subsequent assessment and/or remedial action tasks. A Contamination Assessment Report was prepared that recommended Monitoring Only based on the site characterization and regulatory standards.
- Managed/performed a consent order RCRA Generator Closure at a manufacturing facility in Volusia County, Florida. The facility was cited for improperly discharging a neutralized wastewater into the soils and ground water on the site. The scope of work included the preparation/submittal of a Quality Assurance Project Plan, an Initial Remedial Action Plan and a Work Plan to demonstrate how work would be performed, the performance of source removal and site assessment activities (exploratory boring, monitoring wells, sampling/analysis), and preparation of a Contamination Assessment Report. The work involved routine interaction with the Florida Department of Environmental Protection (FDEP) Central District to understand their objectives and focus the work. Based on our assessment and site characterization data, a No Further Action recommendation was submitted to the FDEP for approval.
- Managed/performed a consent order RCRA Generator Closure for an airplane maintenance facility in Polk County, Florida. This project involved the ground water sampling and certificates of completion of the identified Plans for Restoration (PFR). Oversight of the activities performed by the client was provided to document and certify the work met the FDEP approved PFR. Ground water sampling was performed to demonstrate the ground water quality was not impacted above regulatory standards/guidances by the former operations. Based on the work performed, certifications were submitted that demonstrated the site met the "Clean Closure" conditions.
- Managed/performed the operation and maintenance (O & M) activities of a soil vapor extraction and ground water extraction/treatment Corrective Action System (CAS) at a site impacted by mineral spirits in Tallahassee, Florida. The CAS and O & M activities were conditions of a RCRA Closure Permit. The O & M activities include system inspections/maintenance, ground water and vapor sampling, and preparing/submitting quarterly reports. The system includes soil vapor vacuum wells, and dewatering, recovery wells, and monitoring wells.
- Managing/performing the operation and maintenance (O & M) activities of a groundwater extraction/treatment system at a site impacted by petroleum hydrocarbons in St. Augustine, Florida. The ground water extraction/treatment system was installed by others in accordance with the approved Remedial Action Plan (RAP). Our activities included monthly inspections of the system with sampling/analysis to confirm the required treatment is being achieved and quarterly sampling/analysis to evaluate the performance of the extraction system to recover the impacted ground water. Reports are prepared quarterly with an annual report presenting trends and recommendations.

- Performed property transaction environmental site assessments (Phases I, II and/or III) for lending institutions, buyers and sellers in accordance with the current ASTM criteria. Properties have included shopping centers, manufacturing facilities, former industrial areas, commercial businesses and vacant/undeveloped land. Phases II and III activities have included sampling/analysis of wastes, installation of ground water monitoring wells, soil vapor surveys, soil and ground water sampling/analysis, and removal activities.
- Provided EPA and OSHA training for confined space, respirator use, hazardous waste operations to manufacturing companies' employees.
- Prepared air permit applications for Title V and non-Title V air emission sources at various manufacturing facilities in Florida.
- Performed clean-up activities of business activities that were abandoned by the operator. Activities include the characterization of various containers and materials, scheduling and managing applicable contractors in the removal and disposal of the materials (hazardous and non-hazardous), and the cleaning of the building for subsequent use.
- Performed an engineering evaluation of chromate copper arsenate pressure treatment drip pad for a wood treating facility in Polk County, Florida. The evaluation was and is performed annually in accordance with the associated EPA drip pad regulations in Subpart W, 40 CFR 265.443(a) through (f).
- Provided regulatory compliance assessments for various manufacturing facilities in Volusia, Orange, and Polk Counties in Florida. The assessments identify violations and shortcomings, and recommendations to achieve compliance.

January 1994 - November 1995: Southeast Regional Manager/Director of Projects, TRC/Environmental Solutions, Inc.

- Responsible for the management and technical performance of projects involving:
  - Permitting; air, water, solid/hazardous waste.
  - Property Environmental Assessments and Facility Environmental Compliance Evaluations.
  - Consent order negotiations.
  - Interpretation of regulations and negotiation of work plans.
  - Investigations/assessments associated with CERCLA and RCRA and non-CERCLA/non-RCRA sites.
  - Engineering analyses (stability, hydrologic, hydraulic) associated with the design of a new storage disposal facilities, closures, and to support remediation activities/corrective measures studies.
  - Engineering design.
  - Preparation of construction plans, specifications, and bid documents for remedial designs.
- Managed/performed over 15 projects associated with the underground and above ground storage tank petroleum regulations. These have included CARs, RAPs, RAP implementations, and Operation and Maintenance and Monitoring.
- Managed technical staff in preparing an Air Permit Application for the painting operation at a steel fabrication facility in Florida. The Jacksonville District Office of the Florida Department of Environmental Protection was the reviewing agency.
- Managed/prepared "Plans For Restoration" for the closure of various areas at an airplane maintenance facility in central Florida. The plans for restoration identify how the cleanup will be achieved within 180 days so that a post-closure permit is not required. The Tampa District and Tallahassee division offices of the Florida Department of Environmental Protection were involved in reviewing this project.
- Managed/performed a contaminated assessment of a solvent spill/release on a barrier island in Florida. The assessment has been performed and a contamination assessment report has been prepared and submitted to the Orlando District office of the Florida Department of Environmental Protection. A "No further Action" or "Monitoring Only Plan" is being recommended.
- Managed/prepared a Corrective Action Plan (CAP) in accordance with RCRA regulations for a site impacted by mineral spirits and solvents. The CAP addressed the clean-up of the ground water by recovery (extraction wells) treatment (air stripping and discharge to a POTW).

- Managed the installation of ground water and soil Corrective Action System at RCRA sites in accordance with associated permits. These systems included soil vapor and ground water extraction and treatment.

1993 - Independent Consultant, Bruder Stephens, Inc.

- Performed an environmental audit of a research/development and chemical analytical laboratory in St. Petersburg, Florida. This audit compliance, operational and management, included the inspection of the builds, operations and files, detailed interviews with key operations and management personnel and an oral presentation of findings/recommendations followed by a written document.
- Performed numerous commercial property transaction audits (Phase I Environmental Site Assessments) within Florida in accordance with client's specific requirements (Barnett Banks, FNC, FDIC, First Union Bank) or ASTM Standard E1527. Recognized environmental conditions, if identified, were assessed (Phase II) to confirm the impact and if necessary, to delineate the extent and/or remediate (Phase III) the impact.
- Prepared and implemented a contamination assessment plan in accordance with the consent order for a site formerly operated as an electronic manufacturer on a barrier island in Florida. The property was identified as being impacted by TCE and PCE. The contamination assessment report is being prepared to define the impact and to identify the need, if any, of any remedial action.
- Prepared and implemented an Interim Remedial Action Plan to remove contaminated soils and construction debris as hazardous waste for TCE and PCE contamination from an electronics' operation facility in Florida.
- Characterized and managed the removal of unknown containerized and stockpiled materials from a steel fabrications operation in Tampa, Florida. Sampling/analyses was performed for disposal characterization. Materials were identified as hazardous (72 drums) and non-hazardous (1500 cubic yards) waste and disposed of in accordance with applicable regulations.
- Negotiated a consent order for the performance of a Contamination Determination Report (CDR) with the Florida Department of Environmental Protection to document the presence/absence of contamination and proposed closure actions at an airplane stripping/painting operation in Lakeland, Florida. Contamination assessment activities and closure action evaluations are being performed to prepare and submit the CDR.

May 1991 - December 1992 - Manager, Florida Environmental Engineering Service, ATEC Associates, Inc.

- Responsible for the technical performance of all environmental projects; environmental sales and sales strategies; proposal and cost estimate preparation and review; project management training; technical/sales presentations; staffing/organization planning; and maximizing profits while minimizing liabilities within Florida. Offices for which this effort was provided included Pensacola, Jacksonville, Orlando, Tampa, West Palm Beach and Miami. Projects ranged from environmental compliance audits, environmental site assessments, contamination assessments, and RCRA investigations.

- Assisted in developing the Tampa Environmental Division; opening of the Pensacola office to provide environmental services and expanding the environmental staff's in the Jacksonville and Tampa offices.

1987 - 1991 - General Manager of Engineering, IT Corporation

- Responsible for the overall management, financial and technical performance of the Tampa office. Projects have included remedial investigations and feasibility studies, site assessments, design and field management, RCRA Part B applications, site closure plans, environmental audits, underground storage tank assessment, waste characterization studies, and computer modeling for hazardous and non-hazardous waste projects. Specific duties/projects include:
  - Established a "green field" office in Tampa with no backlog in 1988 which grew to a staff of 36 with revenues exceeding $5 million in 1991.
  - Management of a staff of 36 personnel located in Tampa, Ocala, and Orlando which provide assessment, engineering analysis and design services for environmental concerns separately or as a "turnkey" effort.
  - Responsible for profit/loss performance of Tampa, Ocala, and Orlando offices.

- Negotiated contract with NAS Southern Division to perform a RI/FS and other environmental studies/programs at NAS Stations in Key West and Jacksonville, Florida.
- Prepared proposals, negotiated contracts and provided technical direction/reviews for CERCLA and RI/FS activities on landfills in Georgia and Florida. In addition, assisted in negotiations with the EPA Region IV for approval of work plans and associated documents.
- Evaluated data, prepared technical and cost proposals for performances of environmental audits, engineering designs, RI/FS and RFA/RFI/CMS projects.

- Performed a senior technical review of an environmental risk audit of a fertilizer manufacturing facility. This audit identified possible spill/release scenarios and existing control with recommendations to establish new/additional preventative programs in the various operations.

1985 - 1987 - Section Manager, Civil Geotechnical Design Engineering, IT Corporation

- Responsible for technical assistance in RI/FS projects and design of landfills (hazardous and non-hazardous) and associated structure. In conjunction, managed numerous projects and performed administrative responsibilities.
- Evaluated data, prepared technical and cost proposals for performances of environmental audits engineering designs, RI/FS and RFA/RFI projects.
- Management of a staff of engineers/scientists in performance of a remedial action design (slurry wall, impermeable cap, ground water extraction and treatment) for a New Jersey Superfund site through the U.S. Corps of Engineers (COE), Kansas City District.
- Management and technical support in a site selection study (design and economic considerations, site conditions, costs) for regional, national, or multiple sightings of a landfill and incinerator to handle various waste streams from an industrial client.
- Interaction with local, state and federal regulatory agencies in the preparation of appropriate permit (Part B, NPDES) and implementation of operational plans according to the regulations.
- Management and technical direction for a Part B permit application for a hazardous Waste Disposal Facility including the detailed engineering designs for electric arc furnace dust.
- As the Section Manager of the Civil/Geotechnical Design Group, managed a staff of engineers/scientists in performing similar projects. These responsibilities include: coordinating and scheduling project work and staffing; providing supervision and direction for the project staff; coordinating subcontractor activities; interfacing with clients; and maintaining corporate quality control procedures in the performance of the project. In addition, evaluated and developed scope of work and associated budgets and prepares proposals for new work.

1984 - 1985 - Project Manager, NUS Corporation, PEC Division

- Developed work plans and budgets and prepared proposals to investigate, evaluate, and/or design hazardous waste sites/disposal facilities. In addition, provided technical assistance in the performance of the project as well as being project manager (budget and schedule tracking). Services as a project manager in the U.S. Environmental Protection Agency (USEPA) Superfund project in areas of supervisory, planning, reviewing, implementation, and technical interpretation of results for the RI/FS. Performed such duties for Superfund sites in EPA Regions III and IV.

1974 - 1983 - Senior Project Engineer, D'Appolonia Consulting Engineers, Inc.

- Developed extensive experience in the design and operation of solid waste disposal facilities for coal reuse, ash wastes, paper waste, steel processing wastes, and hazardous wastes.
- Managed a staff of engineers/scientists and/or performed site investigations, engineering analyses, economic evaluations, and construction supervision for waste disposal facilities (hazardous and non-hazardous).
- Performed surficial and subsurface investigations and engineering analyses for designs, investigations and economic evaluations of over 50 waste disposal projects related to the coal industry in Pennsylvania, Kentucky, Virginia, West Virginia, and Ohio.

- Developed construction plans, specifications, and bid packages to implement the design.
- Provided liaison for clients with regulatory agencies.
- Prepared appropriate state and federal permit applications, National Pollution Discharge Elimination System (NPDES), and portions of Resource Conservation Recovery Act (RCRA) Part B applications.

EDUCATION

Graduate courses toward M.S., Civil Engineering, University of Pittsburgh, Pittsburgh, PA.
B.S., Civil Engineering, University of Pittsburgh, Pittsburgh, Pennsylvania, 1974.
B.A., Mathematics, St. Vincent College, Latrobe, Pennsylvania, 1974

TRAINING

Project Management (40 Hour Course) - IT Corporation; 1990.
Training Technical People into Strong Project Managers, Professional Services Management; 1990.
RCRA - McKoy and Associates; 1992
Total Quality Management Facilitator (40 Hours), ODI; 1992.
OSHA 1910.120 -- 40 Hour, supervisor and refreshers

REGISTRATIONS

Professional Engineer - Pennsylvania (test), Alabama, Georgia, Florida, and Kentucky

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property:	*Mandich Apopka* *2560 West Orange Blossom Trail Apopka FL 32712*
Project No:	*25-115 / 25-115*

Coordinates:

Hazardous Waste Handler Details

Seq No: 1
Receive Date: 19900301
Handler Name: COCA COLA CO PLYMOUTH
Fed Waste Generator: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report

Hazardous Waste Handler Details

Seq No: 200903
Receive Date: 20090324
Handler Name: COCA-COLA NORTH AMERICA
Fed Waste Generator: 2
Generator Code Description: Small Quantity Generator
Source Type: Implementer

Waste Code Details

Waste Code: D001
Waste Code Desc: IGNITABLE WASTE

Waste Code: D009
Waste Code Desc: MERCURY

Waste Code: D035
Waste Code Desc: METHYL ETHYL KETONE

Waste Code: F005
Waste Code Desc: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Handler Details

Seq No: 201002
Receive Date: 20100216
Handler Name: COCA-COLA NORTH AMERICA

FDEP - Registered Tanks from Storage Tank Contamination Monitoring (STCM) Details

Tank No: 4
Size: 10000
Content: Unleaded Gas
Installed: 06/01/1998
Placement: UNDER
Status: In Service
Construction: F - Fiberglass Clad Steel
I - Double Wall
M - Spill Containment Bucket
N - Flow Shut-Off
O - Tight Fill
Piping: J - Pressurized Piping System
K - Dispenser Liners
M - Double Wall - Pipe Jacket
N - Approved Synthetic Material
Monitoring: 1 - Continuous Electronic Sensing
2 - Visual Inspect Pipe Sumps
3 - Electronic Monitor Pipe Sumps
4 - Visual Inspect Dispenser Liners
F - Monitor Dbl Wall Tank Space
H - Mechanical Line Leak Detector
K - Monitor Dbl Wall Pipe Space
L - Automatic Tank Gauging - Usts

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

Deleted NPL: DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

Government Publication Date: Feb 26, 2025

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Feb 26, 2025

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 6, 2025

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Jan 6, 2025

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 6, 2025

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 6, 2025

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 6, 2025

Federal Engineering Controls-ECs: FED ENG

List of Engineering controls (ECs) made availabe by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jan 29, 2025

Federal Institutional Controls- ICs: FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jan 29, 2025

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Nov 20, 2024

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Dec 31, 2024

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Feb 19, 2025

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Jan 9, 2024

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jan 9, 2024

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Oct 31, 2024

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 29, 2025

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Feb 26, 2025

State

Superfund Waste Cleanup & State-Funded Action Sites: SHWS

List of hazardous waste cleanup sites participating in various federal and state funded cleanup programs. Florida's State-Funded Action Sites and Superfund Waste Cleanup Sites lists are maintained and made available by the Florida Department of Environmental Protection (FDEP). This database serves a purpose similar to that of the federal Superfund Enterprise Management System (SEMS), functioning as a state-level counterpart for tracking potential hazardous substance release sites.

Government Publication Date: Mar 14, 2025

Delisted State-Funded Action Sites: DELISTED SHWS

This database contains a list of closed hazardous waste sites of various federal and state funded cleanup programs that were removed from the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Mar 14, 2025

ERIC Waste Cleanup: ERIC

Environmental Restoration Integrated Cleanup (ERIC) is a single database for tracking contaminated site cleanup activities in the Florida Department of Environmental Protection (DEP)'s Division of Waste Management (DWM). Includes records from 11 different DEP data systems, allowing tracking of a contaminated site throughout the course of cleanup regardless of which program area took the lead.

Government Publication Date: Feb 7, 2025

Florida Department of Environmental Protection Cleanup Sites: CLEANUP DEP

This Cleanup Sites dataset is provided by the Florida Department of Environmental Protection (FDEP), and the layer is included on the FDEP's Contamination Locator Map (CLM) tool. The data provides locations and document links for sites currently in the cleanup process and sites awaiting cleanup funding. Cleanup programs include Brownfields, Petroleum, EPA Superfund (CERCLA), Drycleaning, Responsible Party Cleanup, State Funded Cleanup, State Owned Lands Cleanup and Hazardous Waste Cleanup.

Government Publication Date: Mar 31, 2025

Waste Cleanup Responsible Party Sites: WCRPS

List of Open, Closed, and Inactive Waste Cleanup Responsible Party sites made available by the Florida Department of Environmental Protection.

Government Publication Date: Apr 11, 2021

Delisted Waste Cleanup Sites: DELISTED WCP

List of sites which once appeared on - and have since been removed from - the list of Waste Cleanup Sites made available by the Florida Department of Environmental Protection.

Government Publication Date: Mar 31, 2025

Solid Waste Facilities and Landfills: SWF/LF

The Solid Waste Facility Inventory Report made available by the Florida Department of Environmental Protection (FDEP) includes all types of authorized and unauthorized facilities: municipal solid waste, landfills, dumps, construction and demolition disposal, recycling facilities, and more.

Government Publication Date: Dec 6, 2024

Leaking Tanks: LST

This list of leaking storage tanks is sourced from the Florida Department of Environmental Protection (FDEP). The Storage Tank and Petroleum Contamination/Cleanup Monitoring (STCM) section is part of the Petroleum Restoration Program (PRP) in the FDEP's Division of Waste Management. The PRP encompasses the technical oversight, management, and administrative activities necessary to prioritize, assess and clean-up sites contaminated by discharges of petroleum and petroleum products from stationary petroleum storage systems. Over 28,000 facilities have reported discharges of petroleum products from storage tank systems. STCM database reports do not include discharges that are not required for Rule 62-780 as well as discharges that have already been cleaned up. Rule 62-780 applies to site rehabilitation conducted at sites contaminated with pollutants, hazardous substances, drycleaning solvents, petroleum and petroleum products. Florida relies on groundwater for about 92 percent of its drinking water needs and has some of the most stringent rules in the country.

Government Publication Date: Feb 6, 2025

Delisted Leaking Tanks: DELISTED LST

Whereas Leaking Tanks (LST) includes only facilities which currently have contamination as recorded by the Florida Department of Environmental Protection, this list contains facilities which were once included in LST data but no longer appear on the list made available by FDEP. Facilities may be removed from the current LST list because the discharge has been cleaned up, or the discharge is not required for 62-770.

Government Publication Date: Feb 6, 2025

Underground Storage Tanks: UST

List of Underground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity. In an effort to minimize the occurrence and environmental risks of releases and discharges, FDEP administers standards pertaining to the construction, installation, operation, maintenance, repair, closure, and disposal of underground storage tank systems that store regulated substances.

Government Publication Date: Mar 21, 2025

Aboveground Storage Tanks: AST

List of Aboveground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity.The Florida Department of Environmental Protection (FDEP) provides standards for aboveground storage tanks (ASTs) that have individual storage tank capacities greater than 550 gallons. The state also regulates the registration, construction, installation, operation, maintenance, repair, closure, and disposal of storage tank systems that store regulated substances.
Government Publication Date: Mar 21, 2025

Storage Tank Facilities: TANK

List of storage tank facilities made available by the Florida Department of Environmental Protection (FL DEP) for which tank information is not available. In the case of closed facilities - where all tanks have been removed or closed, and there is also no petroleum discharge or on-going cleanup activity - the owner data may not be current, but rather would represent the most recent information made available to FL DEP.
Government Publication Date: Mar 21, 2025

Delisted AST UST Storage Tanks: DEL UST AST TANK

This database contains a list of closed UST and AST storage tank sites that were removed from the Florida Department of Environmental Protection (FDEP) storage tank database.
Government Publication Date: Jul 2, 2015

Delisted Storage Tanks: DEL STORAGE TANK

List of sites that once appeared on - and have since been removed from - the list of UST and AST storage tank facilities made available by the Florida Department of Environmental Protection.
Government Publication Date: Mar 21, 2025

Federal Facilities Listing: FF TANKS

The Florida Department of Environmental Protection (FDEP) Storage Tank Program registers facilities and storage tanks where aboveground or underground storage tanks store pollutants, hazardous substances, and/or mineral acid substances regulated by Chapter 62-761, Florida Administrative Code, or when aboveground storage tanks or compression vessels store a hazardous substance which requires registration according to Chapter 376, Florida Statutes.
Government Publication Date: Mar 11, 2025

Storage Tank/Contaminated Facility Search: STCS

List of facilities and tanks in the Florida Department of Environmental Protection (FDEP) Bureau of Petroleum Storage Systems Storage Tank/Contaminated Facility Search. Note that tank details do not appear for facilities for which all tanks have been removed.
Government Publication Date: Jan 6, 2025

Institutional Controls Registry: INST

The Institutional Controls registry is maintained by the Florida Department of Environmental Protection (FDEP). The registry aims to help preserve adequate protection of contaminated soil regions and help to minimize any chances of exposure.
Government Publication Date: Jan 30, 2025

Engineering Controls: ENG

A listing of all engineering controls that are in place to eliminate or reduce the potential for contaminant migration and exposure to contaminants. These controls may include caps, barriers, guards or fences. The list is maintained by the Florida Department of Environmental Protection (FDEP).
Government Publication Date: Jan 30, 2025

Voluntary Cleanup Sites: VCP

A listing of active and closed voluntary cleanup sites registered by the Florida Department of Environmental Protection (FDEP).
Government Publication Date: Mar 4, 2025

Brownfield Sites: BROWNFIELDS

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of sites within designated Brownfield Areas within Florida where Brownfield Site Rehabilitation Agreement (BSRA)s have been executed between FDEP and a responsible party.
Government Publication Date: Feb 20, 2025

Brownfield Areas: BROWNFIELD AREA

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of Brownfield Areas, defined by the FDEP as contiguous areas of one or more brownfield sites, some of which may not be contaminated, that have been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. Because a variety of sources and methods were used to derive information for this data, locations are approximate.
Government Publication Date: Feb 20, 2025

Hazardous Waste Facility List: HAZ WASTE FAC
List of Hazardous Waste Financial Assurance Facilities made available by the Division of Waste Management of the Florida Department of Environmental Protection (FDEP). The FDEP's Hazardous waste financial responsibility requirements exist to ensure that certain hazardous waste facilities and transporters have the financial resources available to provide for closure, postclosure and corrective action requirements and/or pay for bodily injury or property damage that might result from accidents, spills or other unexpected events, known as liabilities. These closure, postclosure, corrective action and liability requirements are called financial assurance.
Government Publication Date: Jan 3, 2025

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST
This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Nov 18, 2024

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST
This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Nov 18, 2024

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST
Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Nov 18, 2024

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST
Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Nov 18, 2024

County

No County databases were selected to be included in the search.

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data: PFAS GHG
The U.S. Environmental Protection Agency's Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO2e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. Includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures by DSSTox. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time.
Government Publication Date: Aug 5, 2024

On-Scene Coordinator Response Sites: OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Apr 4, 2024

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Aug 1, 2024

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Dec 17, 2024

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

This list of federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS) is made available by the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools data. The EPA outlines that these data are gathered from several federal entities, such as the federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration (NASA), Department of Transportation (DOT), and Department of Energy (DOE). The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2024. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Oct 24, 2024

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Jun 27, 2024

National Response Center PFAS Spills: PFAS ERNS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Mar 24, 2025

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Dec 16, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data: PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jan 13, 2025

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest : PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Mar 23, 2025

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Mar 24, 2025

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 29, 2024

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act: TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Nov 20, 2024

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: Apr 13, 2024

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jan 6, 2025

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Jan 6, 2025

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: May 6, 2024

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Feb 5, 2024

Surface Mining Control and Reclamation Act Sites: SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: May 20, 2024

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Aug 29, 2024

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Feb 29, 2024

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

Power Plants: POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Apr 15, 2024

State

Historic Potential Business Activity Risk: HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this listing does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including Polks, Millers, Mullin Kille, Interstate Directory, and State Directory Co; spanning roughly 1920s through 1960 depending on information available by city.

Government Publication Date: Jan 1, 1960

Priority Ranking List: PRIORITYCLEAN

The Florida Legislature has established a state-funded program to cleanup properties that are contaminated as a result of the operations of a drycleaning facility or wholesale supply facility (Chapter 376, Florida Statutes). The program is administered by the Florida Department of Environmental Protection (FDEP). The statute was sponsored by the drycleaning industry to address environmental, economic, and liability issues resulting from drycleaning solvent contamination. The program provides limited liability protection to the owner, operator and real property owner of drycleaning or wholesale supply facilities for cleanup of drycleaning solvent contamination if the parties meet the eligibility conditions stated in the law.

Government Publication Date: Mar 31, 2025

Dry Cleaning Facilities: DRYCLEANERS

A listing of dry cleaning facilities registered with the Florida Department of Environmental Protection (FDEP). The information contains facility identification number, site location information, related party (owner) information, and facility type and status. Data is taken from the Storage Tank & Contamination Monitoring database, the registration repository of dry cleaner facility data.

Government Publication Date: Dec 16, 2024

Delisted Dry Cleaning Facilities: DELISTED DRYCLEANERS

List of sites removed from the drycleaners database made available by the Florida Department of Environmental Conservation (DEC).

Government Publication Date: Dec 16, 2024

Historical Dry Cleaners: HISTORICAL DRYC

The Florida Department of Environmental Protection (FDEP) provided this historical database of regulated and non-regulated dry cleaning facilities. These facilities were at one time tracked and registered by the FDEP OCULUS Electronic Document Management System as "drums" in the underground storage tank database.

Government Publication Date: Aug 2, 2013

Oil and Hazardous Materials Incidents: SPILLS

Statewide listing of oil and hazardous materials spills and incidents recorded by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Feb 26, 2025

Contaminated Sites: DWM CONTAM

Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM) listing of active or known sites that include sites requiring cleanup but are not actively being worked on due to the agency's lack of funding (primarily petroleum and drycleaning).

Government Publication Date: Mar 3, 2025

Delisted Contaminated Sites: DEL CONTAM SITE

List of sites which were once included on the Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM)'s Contaminated Sites list. As sites on the Contaminated Sites (CS) list are cleaned up or closed under risk based corrective action, they are removed from the CS list.

Government Publication Date: Sep 30, 2015

Aqueous Film Forming Foam (AFFF): PFAS AFFF

A list of fire fighter training facilities that use or possibly used Aqueous Film Forming Foam (AFFF). This list is made available by the Florida Department of Environmental Protection (DEP).

Government Publication Date: Aug 29, 2024

PFAS Investigation at Federal Facilities: PFAS

List of sites - including Federal Facilities - in Florida at which either a) there has been confirmed or suspected usage of Aqueous Film Forming Foam (AFFF), or b) the Division of Waste Management has identified as a potential source or environmental impact related to per- and polyfluoroalkyl substances (PFAS). The Florida Department of Environmental Protection (DEP) is committed to the protection of the groundwater resources of the state and the public health and safety of residents. The DEP will continue its efforts to investigate and understand PFAS in the environment and the ecological and human health risks associated with PFAS contamination. Listings made available by the Florida Department of Environmental Protection (DEP).

Government Publication Date: Apr 9, 2025

Ground Water Contamination Areas: GW CONTAM

List of areas of known groundwater contamination made available by the Florida Department of Environmental Protection (DEP). 38 counties have been delineated primarily for the agricultural pesticide ethylene dibromide (EDB), and to a much lesser extent, volatile organic and petroleum contaminants. Permitted water wells in these areas must meet specific well construction criteria and water testing prior to well use. This dataset only indicates the presence or absence of specific groundwater contaminants and does not represent all known sources of groundwater contamination in the state of Florida.

Government Publication Date: Jul 12, 2023

Underground Injection Control Wells: UIC

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

Government Publication Date: Apr 10, 2025

Well Surveillance Program Facilities: WELL SURVEILLANCE

List of facilities made available by the Florida Health Well Surveillance group. The Well Surveillance group manages several programs to identify and monitor areas in Florida where contaminated drinking water is suspected and may pose a threat to public health. The section coordinates with the County Health Departments (CHDs) to locate potable wells and conduct water sampling for contaminants of concern. The Well Surveillance Section is composed of the State Underground Petroleum Environmental Response Act (SUPER Act), Drinking Water Toxics Program (Toxics), Drycleaner Solvent Cleanup Program (DSCP). Includes locations of known cattle dipping vats.

Government Publication Date: Mar 26, 2025

Cattle Dip Vats: CDV SOUTHEAST

A list of Cattle Dip Vats in Southeast Florida made available by the Florida Department of Environmental Protection.

Government Publication Date: Jan 19, 2017

Tier 2 Report: TIER 2

A list of Tier 2 facilities in the state of Florida. The list tracks the inventory of chemicals within a particular facility. This list is provided by the Florida Division of Emergency Management.

Government Publication Date: Apr 2, 2024

Delisted County Records: DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Mar 20, 2025

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Geologic Information

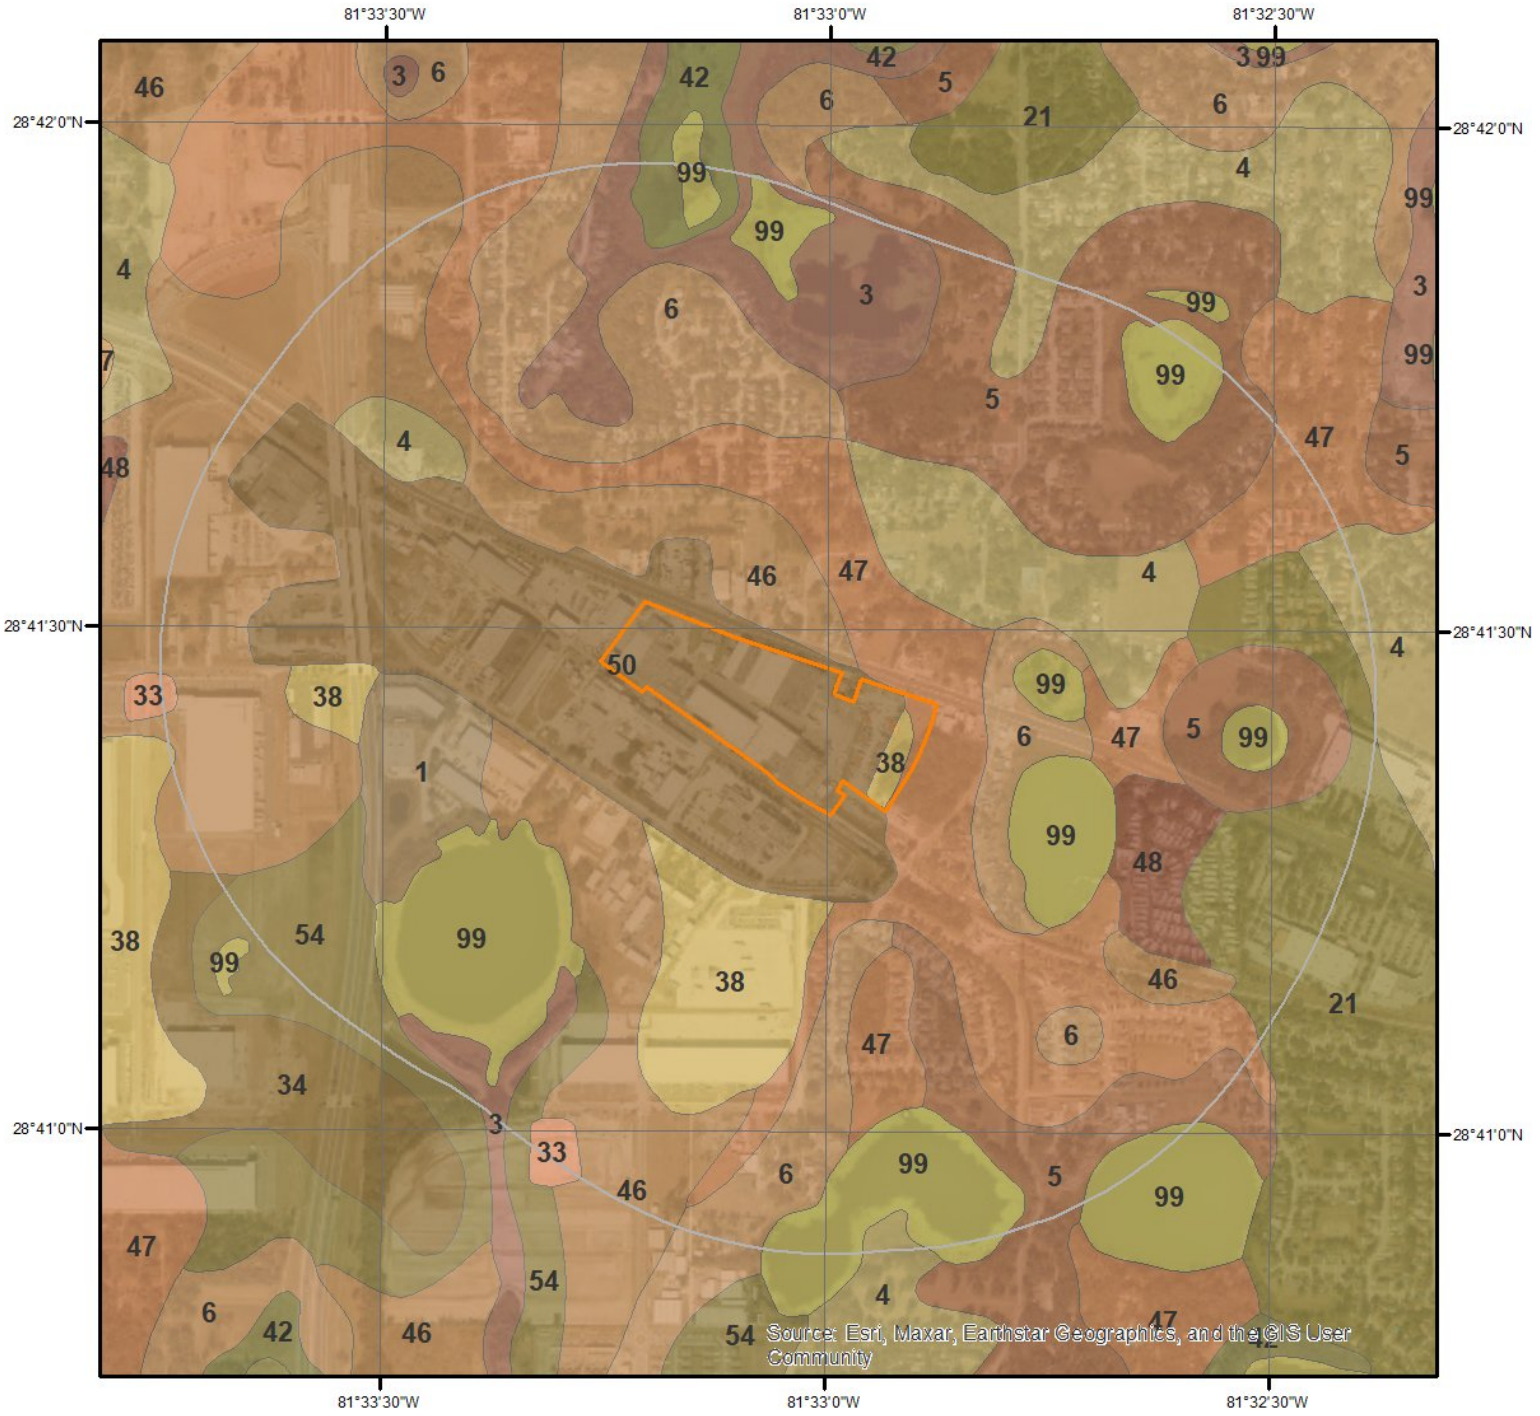
The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Tc

Unit Name:	Cypresshead Formation
Unit Age:	Pliocene
Primary Rock Type:	Sand
Secondary Rock Type:	
Unit Description:	The Cypresshead Formation named by Huddlestun (1988), is composed of siliciclastics and occurs only in the peninsula and eastern Georgia. It is at or near the surface from northern Nassau County southward to Highlands County forming the peninsular highlands. It appears that the Cypresshead Formation occurs in the subsurface southward from the outcrop region and similar sediments, the Long Key Formation, underlie the Florida Keys. The Cypresshead Formation is a shallow marine, near shore deposit equivalent to the Citronelle Formation deltaic sediments and the Miccosukee Formation prodeltaic sediments. The Cypresshead Formation consists of reddish brown to reddish orange, unconsolidated to poorly consolidated, fine to very coarse grained, clean to clayey sands. Cross bedded sands are common within the formation. Discoid quartzite pebbles and mica are often present. Clay beds are scattered and not areally extensive. In general, the Cypresshead Formation in exposure occurs above 100 feet (30 meters) above mean sea level (msl). Original fossil material is not present in the sediments although poorly preserved molds and casts of mollusks and burrow structures are occasionally present. The presence of these fossil "ghosts" and trace fossils documents marine influence on deposition of the Cypresshead sediments. The permeable sands of the Cypresshead Formation form part of the surficial aquifer system.

Soil Information



SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 1 (0.9%)

Map Unit Name:	Arents, nearly level
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	76cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Arents(100%)

horizon AC(0cm to 203cm) Sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 1 - Arents, nearly level

Component: Arents (100%)
The Arents component makes up 100 percent of the map unit. Slopes are 0 to 2 percent. This component is on sanitary landfills, fills, rises on marine terraces on coastal plains. The parent material consists of altered marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is very high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 30 inches during June, July, August, September. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 6s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Map Unit 21 (10.46%)

Map Unit Name:	Lake fine sand, 0 to 5 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Lake(85%)

horizon A(0cm to 23cm) Fine sand
horizon C(23cm to 203cm) Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 21 - Lake fine sand, 0 to 5 percent slopes

Component: Lake (85%)
The Lake component makes up 85 percent of the map unit. Slopes are 0 to 5 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of eolian deposits or sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent.

Soil Information

Nonirrigated land capability classification is 4s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Arredondo (8%)
Generated brief soil descriptions are created for major soil components. The Arredondo soil is a minor component.

Component: Tavares (5%)
Generated brief soil descriptions are created for major soil components. The Tavares soil is a minor component.

Component: Jonesville (2%)
Generated brief soil descriptions are created for major soil components. The Jonesville soil is a minor component.

Map Unit 3 (4.11%)

Map Unit Name:	Basinger fine sand, frequently ponded, 0 to 1 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	0cm
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	A/D - These soils have low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Basinger(90%)

horizon A(0cm to 13cm)	Fine sand
horizon E(13cm to 36cm)	Fine sand
horizon Bh/E(36cm to 91cm)	Fine sand
horizon Cg(91cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 3 - Basinger fine sand, frequently ponded, 0 to 1 percent slopes

Component: Basinger (90%)
The Basinger component makes up 90 percent of the map unit. Slopes are 0 to 1 percent. This component is on depressions on marine terraces on coastal plains. The parent material consists of sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is frequently ponded. A seasonal zone of water saturation is at 0 inches during July, August, September, October. Organic matter content in the surface horizon is about 5 percent. Nonirrigated land capability classification is 4w. This soil meets hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Smyrna (5%)
Generated brief soil descriptions are created for major soil components. The Smyrna soil is a minor component.

Component: Samsula (3%)
Generated brief soil descriptions are created for major soil components. The Samsula soil is a minor component.

Component: Floridana (2%)
Generated brief soil descriptions are created for major soil components. The Floridana soil is a minor component.

Map Unit 33 (0.21%)

Map Unit Name:	Pits

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Soil Information

Map Unit: 33 - Pits

Component: Pits (70%)
Generated brief soil descriptions are created for major soil components. The Pits is a miscellaneous area.

Component: Aquents (30%)
Generated brief soil descriptions are created for major soil components. The Aquents soil is a minor component.

Map Unit 34 (1.81%)

Map Unit Name:	Pomello fine sand, 0 to 5 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	84cm
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Pomello(95%)

horizon A(0cm to 10cm)	Fine sand
horizon E(10cm to 119cm)	Fine sand
horizon Bh(119cm to 147cm)	Fine sand
horizon Bw(147cm to 165cm)	Fine sand
horizon C(165cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 34 - Pomello fine sand, 0 to 5 percent slopes

Component: Pomello (95%)
The Pomello component makes up 95 percent of the map unit. Slopes are 0 to 5 percent. This component is on ridges, coastal plains. The parent material consists of sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 33 inches during July, August, September, October, November. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 6s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 0 within 30 inches of the soil surface.

Component: Smyrna (3%)
Generated brief soil descriptions are created for major soil components. The Smyrna soil is a minor component.

Component: Bulow (1%)
Generated brief soil descriptions are created for major soil components. The Bulow soil is a minor component.

Component: Tavares (1%)
Generated brief soil descriptions are created for major soil components. The Tavares soil is a minor component.

Map Unit 38 (5.42%)

Map Unit Name:	St. Lucie fine sand, 0 to 5 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

St. Lucie(90%)

horizon A(0cm to 10cm)	Fine sand
horizon C(10cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 38 - St. Lucie fine sand, 0 to 5 percent slopes

Component: St. Lucie (90%)
The St. Lucie component makes up 90 percent of the map unit. Slopes are 0 to 5 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of eolian or sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is very high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 7s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: St. Lucie (90%)
The St. Lucie component makes up 90 percent of the map unit. Slopes are 0 to 5 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of eolian or sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is very high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 7s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Map Unit 42 (0.72%)

Map Unit Name:	Sanibel muck
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	0cm
Drainage Class - Dominant:	Very poorly drained
Hydrologic Group - Dominant:	A/D - These soils have low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Sanibel(65%)	
horizon Oa(0cm to 28cm)	Muck
horizon A(28cm to 38cm)	Fine sand
horizon C(38cm to 203cm)	Fine sand
Sanibel(25%)	
horizon Oa(0cm to 28cm)	Muck
horizon A(28cm to 38cm)	Fine sand
horizon C(38cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 42 - Sanibel muck

Component: Sanibel (65%)
The Sanibel, undrained component makes up 65 percent of the map unit. Slopes are 0 to 1 percent. This component is on marshes on marine terraces on coastal plains. The parent material consists of thin organic material over sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is very poorly drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is frequently ponded. A seasonal zone of water saturation is at 0 inches during June, July, August, September, October. Organic matter content in the surface horizon is about 35 percent. Nonirrigated land capability classification is 7w. This soil meets hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Sanibel (25%)
The Sanibel, drained component makes up 25 percent of the map unit. Slopes are 0 to 1 percent. This component is on depressions on marine terraces on coastal plains. The parent material consists of thin organic material over sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is very poorly drained. Water movement in the most restrictive

layer is high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is frequently ponded. A seasonal zone of water saturation is at 18 inches (depth from the mineral surface is 7 inches) during January, February, March, April, May, June, July, August, September, October, November, December. Organic matter content in the surface horizon is about 35 percent. Nonirrigated land capability classification is 3w. This soil meets hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Hontoon (5%)
Generated brief soil descriptions are created for major soil components. The Hontoon, undrained soil is a minor component.

Component: Samsula (5%)
Generated brief soil descriptions are created for major soil components. The Samsula soil is a minor component.

Map Unit 46 (10.04%)

Map Unit Name:	Tavares fine sand, 0 to 5 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	127cm
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Tavares(85%)

horizon A(0cm to 13cm)	Fine sand
horizon C(13cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 46 - Tavares fine sand, 0 to 5 percent slopes

Component: Tavares (85%)
The Tavares component makes up 85 percent of the map unit. Slopes are 0 to 5 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of eolian or sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 50 inches during June, July, August, September, October. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Candler (5%)
Generated brief soil descriptions are created for major soil components. The Candler soil is a minor component.

Component: Apopka (4%)

horizon E(15cm to 163cm)	Fine sand
horizon Bt(163cm to 193cm)	Fine sandy loam
horizon Btg(193cm to 203cm)	Sandy clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 47 - Tavares-Millhopper complex, 0 to 5 percent slopes

Component: Tavares (63%)
The Tavares component makes up 63 percent of the map unit. Slopes are 0 to 5 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of eolian or sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 57 inches during June, July, August, September, October, November, December. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 3s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Millhopper (32%)
The Millhopper component makes up 32 percent of the map unit. Slopes are 0 to 5 percent. This component is on knolls on marine terraces on coastal plains. The parent material consists of sandy and loamy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 51 inches during June, July, August, September, October. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 3s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

horizon A(0cm to 13cm)	Fine sand
horizon E(13cm to 150cm)	Fine sand
horizon Bh(150cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 54 - Zolfo fine sand, 0 to 2 percent slopes

Component: Zolfo (85%)
The Zolfo component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on flatwoods on marine terraces on coastal plains. The parent material consists of sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 30 inches during June, July, August, September, October, November. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 3w. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Myakka (5%)
Generated brief soil descriptions are created for major soil components. The Myakka soil is a minor component.

Component: Millhopper (4%)
Generated brief soil descriptions are created for major soil components. The Millhopper soil is a minor component.

Component: Tavares (4%)
Generated brief soil descriptions are created for major soil components. The Tavares soil is a minor component.

Component: Malabar (2%)
Generated brief soil descriptions are created for major soil components. The Malabar soil is a minor component.

Map Unit 6 (5.91%)

Map Unit Name:	Candler-Apopka fine sands, 5 to 12 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Candler(66%)

horizon A(0cm to 15cm)	Fine sand
horizon E(15cm to 175cm)	Fine sand
horizon E and B(175cm to 203cm)	Fine sand

Apopka(31%)

horizon A(0cm to 13cm)	Fine sand
horizon E(13cm to 175cm)	Fine sand
horizon Bt(175cm to 203cm)	Sandy clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 6 - Candler-Apopka fine sands, 5 to 12 percent slopes

Component: Candler (66%)
The Candler component makes up 66 percent of the map unit. Slopes are 5 to 12 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of eolian deposits and/or sandy and loamy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 7s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Apopka (31%)
The Apopka component makes up 31 percent of the map unit. Slopes are 5 to 12 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of eolian deposits and/or sandy and loamy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Lochloosa (2%)
Generated brief soil descriptions are created for major soil components. The Lochloosa soil is a minor component.

Component: Tavares (1%)
Generated brief soil descriptions are created for major soil components. The Tavares soil is a minor component.

Map Unit 99 (4.96%)

Map Unit Name:	Water

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 99 - Water

Component: Water (100%)
Generated brief soil descriptions are created for major soil components. The Water is a miscellaneous area.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *ORANGE* County: **3**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *ORANGE* County

No Measures/Homes:	157
Arithmetic Mean:	0.5
Standard Deviation:	0.7
Maximum:	4.6
% >4 pCi/L:	1.9*
% >8 pCi/L:	-
% >12 pCi/L:	-
Notes on Data Table:	TABLE 2. Indoor radon results from the Florida population-based radon survey, by county.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

This list of drinking water violations and enforcement actions is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database, as part of the national download of Safe Drinking Water Act (SDWA) data. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program, including monitoring, enforcement, and violation data related to requirements established by the SWDA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

This national download of Safe Drinking Water Act (SDWA) data is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program related to requirements established by the Safe Drinking Water Act (SDWA). Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP

is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC).

State Sources

Florida Subsidence Incident Reports — **SINKHOLES**

A list of Florida Subsidence Incidents made available by the Florida Department of Environmental Protection (DEP) and maintained by the Florida Geological Survey. Sinkholes are closed depressions in areas underlain by soluble rock such as limestone, dolostone, and in some states gypsum and salt. Other subterranean events can cause holes, depressions, or subsidence of the land surface that may mimic sinkhole activity. Commonly, a reported depression is not verified by a licensed professional geologist to be a true sinkhole, and the cause of subsidence is not known. Such an event is called a subsidence incident.

Oil and Gas Wells — **OGW**

The Oil and Gas Program is the permitting authority within the Florida Department of Environmental Protection's Mining and Minerals Regulation Program. Companies interested in exploration or production of hydrocarbons in Florida are regulated by the Oil and Gas Program. This data is made available by Florida Department of Environmental Protection's Oil and Gas program.

Public Water Supply Wells — **PWSW**

The Public Water Supply Wells (PWSW) data consist of public water supply facilities and their wells in Florida, excluding Federally owned facilities. This data is made available by Florida Department of Environmental Protection, Water Compliance Assurance Program.

Underground Injection Control Wells — **UIC**

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

Water Use Permits Sites - South Florida Water Management District — **WELLS**

List of Water Use Permitting Facilities consisting of wells, pumps and culverts, made available by the South Florida Water Management District. The facilities represent a subset of all wells, pumps and culverts associated with Water Use Permits. A Water Use Permit is required for all water uses except single family and duplex use and fire fighting.

Water Well Completions - Northwest Florida Water Management District — **WATER WELLS**

A list of existing well permits provided by the Northwest Florida Water Management District, representing records for wells permitted for construction/repair/abandonment beginning in the year 1976; does not typically contain data on wells constructed prior to 1976. The data provided may therefore only represent a fraction of existing wells. The data are provided by water well contractors on completion reports and, in most cases, has not been verified by District staff.

Water Well Completions - St. Johns River Water Management District — **WATER WELLS**

A list of wells in the Water Well Completion Report database made available by the St. Johns River Water Management District (SJRWMD). The SJRWMD advises that data reported in the Water Well Completion Report are obtained from multiple sources, including SJRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SJRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Water Well Completions - Suwanee River Water Management District — **WELLS**

A list of wells in the Water Well Completion Report database made available by the Suwanee River Water Management District department (SRWMD). The SRWMD advises that data reported in the Water Well Completion Report are obtained from multiple sources, including SRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Water Well Construction Permits — **WELL CONST PERM**

Appendix

A list of water well construction permits issued by the St. Johns River Water Management District (SJRWMD).

Water Well Construction Permits - Southwest Florida Water Management District **WATER WELLS**

A list of permitted well construction sites within the Southwest Florida Water District (SWFWD) maintained by the Southwest Florida Water Management District (SWFWMD). A Well Construction Permit (WCP) is required prior to installation of a water well within the SWFWD. The WCP ensures that wells are constructed by qualified contractors and meet rigid safety and durability standards. This list includes historical well construction sites that may not have a recorded latitude and longitude for their location. Instead, address matching, quarter STR centroids, STR centroids, or county centroids, were used as the location. WCPs for wells under 4" were strictly enforced after 1990, meaning many domestic wells built before may be excluded from this dataset.

Water Wells - Suwanee River Water Management District **WATER WELLS**

A list of water wells made available by the Suwanee River Water Management District department (SRWMD). The SRWMD advises that data are obtained from multiple sources including SRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Well Surveillance Program Water Wells **WATER WELLS**

A list of privately and publicly owned potable wells from the Florida Department of Health's (DOH) Well Surveillance Program.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

RE: CITY DIRECTORY RESEARCH
2560 West Orange Blossom Trail
Apopka,FL 32712

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
All of Lake View Dr
All of Mayflower Ave
All of Shepard Ave
2500-3000 of W Orange Ave
2120-2630 of W Orange Blossom Trl
Search Notes:
W Orange Blossom Trl is also known as 2120-2630 NW Hwy 441 in Apopka.

COMPLETED USER ENVIRONMENTAL QUESTIONNAIRE

FOR

2560 W. ORANGE BLOSSOM TRAIL, APOPKA, FLORIDA

(Prepared by Mr. Jamie Pardo representing Mandich Group)

USER QUESTIONNAIRE

Project Name: ESA PH1 Cold link logistics - Apopka

Property Address: 2560 West Orange Blossom Trail, Apopka, FL 32712, USA

User Name:

Use of Report: (Check All that Apply)				
	Loan (property as collateral)		**Loan (purchase property)**	
	Pre-Sale Environmental Status	X	**Liability Protection**	
	Refinance of Property		**Title Search Document (Available & Provided)**	

Prepared By (Print Name and Sign):

INTRODUCTION: In order to qualify for one of the *Landowner Liability Protections,* the *user* must provide the following information (if available) to the *environmental professional.* Failure to provide this information could result in a determination that *'all appropriate inquiry"* is not complete.

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25) -- Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

NO

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26) -- Are you aware of any Activity and Use Limitations (AULs), such as *engineering controls,* lend use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? (IF YES, EXPLAIN)

NO

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28) -- As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property or* nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? (IF YES, EXPLAIN)

NO

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29) -- Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property?* If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property?* (IF NO, EXPLAIN)

NA

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30) -- Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user,*

(a.) Do you know the past uses of the *property? (IF yes, describe)*

NO

(b.) Do you know of specific chemicals that are present or once were present at the *property?* (If yes, describe)

NO

(c.) Do you know of spills or other chemical releases that have taken place at the *property?* (If yes, describe)

NO

(d.) Do you know of any environmental cleanups that have taken place at the *property?* (If yes, describe)

NO

(6.) The degree of obviousness of the presence or likely presence of contamination at the *property,* and the ability to detect the contamination by appropriate investigation (40 CFR 312.31) -- As the user of this *ESA,* based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property?* (If yes, describe)

NO

1.0 SUMMARY

1. As requested by Mr. Cory Kroeger, Colella & Associates, Inc., has completed a Phase I Environmental Site Assessment (ESA) for the multi parcel property (site) consisting of the following seven (7) parcels:
   - Parcel No. 06-21-28-7172-02-011 (2560 W. Orange Blossom Trail).
   - Parcel No. 06-21-28-7180-09-070 (2428 W. Orange Blossom Trail).
   - Parcel No. 06-21-28-7180-09-050 (2424 W. Orange Blossom Trail).
   - Parcel No. 06-21-28-7180-07-031 (2322 W. Orange Blossom Trail).
   - Parcel No. 06-21-28-7180-07-010 (2300 W. Orange Blossom Trail).
   - Parcel No. 06-21-28-7180-07-100 (Lake View Drive).
   - Parcel No. 06-21-28-7180-07-160 (2323 Mayflower Avenue).

2. The site's development at the time of the Phase I ESA included the following for each parcel:
   - Parcel No. 06-21-28-7172-02-011 (2560 W. Orange Blossom Trail) -- commercial (multiple warehouses).
   - Parcel No. 06-21-28-7180-09-070 (2428 W. Orange Blossom Trail) -- commercial (office/retail).
   - Parcel No. 06-21-28-7180-09-050 (2424 W. Orange Blossom Trail) -- residential.
   - Parcel No. 06-21-28-7180-07-031 (2322 W. Orange Blossom Trail) -- commercial (two warehouses).
   - Parcel No. 06-21-28-7180-07-010 (2300 W. Orange Blossom Trail) -- commercial (retail convenience store).
   - Parcel No. 06-21-28-7180-07-100 (Lake View Drive) -- Undeveloped, wooded.
   - Parcel No. 06-21-28-7180-07-160 (2323 Mayflower Avenue) -- Undeveloped, partially wooded.

3. The Phase I ESA was performed to identify recognized environmental conditions (conditions indicative of releases or threatened releases of hazardous and petroleum substances) at the site, current and historic land uses, and/or by the operations on the adjoining and surrounding properties. The Phase I ESA was performed and the report prepared by Colella & Associates, Inc., in general accordance with the ASTM Standard E 1527-13. To achieve this objective, the scope of services included a walk-through inspection of the site, inspection of the buildings, curbside evaluation of adjacent and surrounding properties land uses, a review of federal, state, and local regulatory files (databases) applicable to the site, review of historic land uses, and interviewing individuals having knowledge of the site.

4. Mr. Kroeger authorized the Phase I ESA on August 9, 2019, and Colella & Associates, Inc., conducted the site walk and observed the adjoining properties' land uses on August 15 and 21, 2019. The Florida Department of Environmental Protection's (FDEP) and the Orange County Environmental Protection Division (OCEPD) offices were visited or contacted on August 16, 2019.

5. The site was located in a commercially developed area along W. Orange Blossom Trail in Apopka, Florida.

6. Colella & Associates, Inc., has performed a Phase I ESA of the site in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this assessment are described in Section 2.0 of this report. A cursory summary of findings and recommendations is provided below. It should be recognized that

details were not included or fully developed in this section and the remainder of the report and appendices must be read in its entirety for a comprehensive understanding of the information presented below.

7. The assessment has revealed the following information regarding REC's:

- Historic Site Assessment
  - The readily available information of the historic land uses of the site did not reveal the potential of a REC.
- Current Site Assessment
  - The assessment of the current land uses of the site revealed no REC's.
- Historic Adjacent Property Assessment
  - The readily available information of the historic land uses on the adjacent properties has revealed no obvious REC's but the potential exists as the southern and western adjacent properties were heavily developed with commercial and/or industrial operations. In addition, a railroad track was located along the site's southern boundary.
- Current Adjacent Property Assessment
  - The assessment of the readily available information of the current land uses on the adjacent properties has revealed no obvious REC's but the potential exists as southern and western adjacent properties were heavily developed with commercial and/or industrial operations with active businesses. In addition, an active railroad track was located along the site's southern boundary.
- Historic Surrounding Property Assessment
  - The readily available information of the historic land uses on the surrounding properties has revealed REC's but were at a distance that have minimal potential to impact the site. None of the resources reviewed provided information that a REC was present on the southern and western surrounding properties close to the site but potential exists as they were heavily developed with commercial and/or industrial operations and could have an undetermined REC that could impact the site.
- Current Surrounding Property Assessment
  - The assessment of the current land uses on the surrounding properties has revealed REC's but were at a distance that would have minimal potential to impact the site. None of the resources reviewed provided information that a REC was present on the southern and western surrounding properties close to the site but potential exists as they were heavily developed with commercial and/or industrial operations and could have an undetermined REC that could impact the site.
- De-Minimis Conditions (Current)
  - Site -- De-minimis conditions were not apparent except for localize oil staining on the asphalt pavement.

8. The assessment has revealed the following information regarding Controlled Recognized Environmental Conditions (CREC's):

- Site -- No CREC's were identified on the site.
- Adjacent Properties -- No CREC's were identified on the adjacent property.

9. Business environmental risks, on- and off-site business activities, were evaluated and the following presents our opinion regarding any concern of their impact to the site:

    - Current On-Site Business Activity -- No concern if ASTs, drums, and totes continue to be properly managed.
    - Historic On-Site Business Activity -- Possible as the 2560 W. Orange Blossom Trail had a citrus processing facility (extensive operational buildings) with reported fuel use (aboveground storage tank) and 2322 W. Orange Blossom Trail had a machine shop.
    - Current Adjacent Properties' Business Activity -- No apparent concern based on observation and regulatory file review.
    - Historic Adjacent Properties' Business Activity -- Uncertain, extensive commercial/industrial development and use.

10. Non-operational business environmental risks, suspect asbestos containing materials (ACMs) and lead-based painted materials, were evaluated for the site

    - ACM's -- The following parcels of the site had the following suspect ACM's:
        - 2560 W. Orange Blossom Trail (Mid-Florida Freezer Warehouses) -- office (ceiling tiles, flooring, wallboard/joint compound, and window/door caulking).
        - 2428 W. Orange Blossom Trail (Relator/Vertical Blinds) -- wallboard/joint compound, window/door caulking, and flooring.
        - 2424 W. Orange Blossom Trail (residential building) -- wallboard/compound, window/door caulking, and flooring.
        - 2322 W. Orange Blossom Trail (warehouses) -- wallboard/joint compound and window/door caulking.
        - 2300 W. Orange Blossom Trail (commercial store) -- wallboard/joint compound, window/door caulking, and flooring.
    - Lead-Based Paint (LBP) -- All the buildings on the site had the suspect lead-based paint as they had painted surfaces and were built/maintained prior to the ban of LBP:

11. Based on the information reviewed, the potential for vapor migration on or to the site does not appear to exist.

12. No data gaps are identified as part of this Phase I ESA report.

13. During the performance of the Phase I ESA, general observations (non-testing) of other non-scope issues (not part of the ASTM E-1527-13) such as identifying typical suspect asbestos containing materials, identifying the presence of painted surfaces (lead-based paint if developed/maintained prior to 1980), wetlands (review of National Wetlands Inventory database), mold (visible presence), and/or water intrusion (visible presence), were provided. Other possible non-scope considerations not identified or requested were not included and Colella &

Associates, Inc., is not responsible for their inclusion in the performance of the Phase I ESA. Colella & Associates, Inc., has identified the following for the site:

- Floodplains -- The site is outside the 100- and 500-year flood zone.
- Wetlands -- None noted on the site or designated on the U. S. Fish & Wildlife National Wetlands inventory.

2.0 INTRODUCTION

2.1 PURPOSE

1. A Phase I Environmental Site Assessment (ESA), was requested by Mr. Cory Kroeger of 2620 W. OBT LLC for the multi-parcel property (site) located in Apopka, Orange County, Florida (see Figure 1) at:

    - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011).
    - 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070).
    - 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050).
    - 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031).
    - 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010).
    - Lake View Drive (Parcel No. 06-21-28-7180-07-100).
    - 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160).

2. The site consisted of undeveloped, and commercially and residentially developed parcels. The commercially developed parcels included Mid-Florida Freezer Warehouses, convenience store, retail, professional office, and vehicle audio installation.

3. The Phase I ESA was requested to determine the environmental status of the site. Mr. Kroeger authorized Colella & Associates, Inc., to perform the Phase I ESA on August 9, 2019.

4. The purpose of the Phase I ESA was to determine if recognized environmental conditions (REC's) were associated with operations, historic and current, on the site, and/or from operations on adjoining properties. The following terms define our performance in identifying a REC as per the Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13):

    - Recognized Environmental Condition (REC) -- The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.
    - De-minimis Condition-- A release that generally does not present a material risk of harm to the public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A de minimis condition is not a REC.
    - Release -- Any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment**,** including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous substances or pollutant or contaminant.
    - Environment -- Includes the navigable waters, the waters of the contiguous zone, and the ocean water and any other surface water, groundwater, drinking water supply, land surface or subsurface strata.

- Material Threat -- Physically observable and/or obvious through documented resources which are reasonably likely to lead to a release that is threatening and might result in an impact to public health and/or the environment.

- Historical REC (HREC) -- A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations (AUL's), institutional controls, or engineering controls).

- Controlled REC (CREC) -- A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a "No Further Action" (NFA) letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations (AUL's), institutional controls, or engineering controls).

2.2 DETAILED SCOPE OF WORK

1. The Phase I ESA included the following scope of services:

- A visual evaluation of the site was performed with the purpose of identifying the presence of stored, spilled, or otherwise managed hazardous and/or non-hazardous industrial or commercial grade solid/liquid substances, waste products or related visible residue such as hydrocarbon based materials, chemicals, or PCBs. Colella & Associates, Inc., recorded any typical surface expressions of underground storage tanks (USTs), or related holding units that may have been observed on the property at the time of the site inspection. A cursory drive-by review of adjacent and surrounding properties was performed and general land use activities were noted, as they related to the subject site. Photographic documentation is presented in Appendix A.

- A review of past and current aerial photographs pertaining to land usage was performed. Copies of portions of the 2019, 2009, 2004, 1997, 1984, 1978, 1969, 1954, 1947, and 1939 aerial photographs of the subject area are provided in Appendix B.

- A review of the federal (Environmental Protection Agency, EPA) and state (Florida Department of Environmental Protection, FDEP) environmental management listings was conducted. The purpose of this review was to identify the presence of facilities where fuels, oils and hazardous substances and/or materials and wastes are being stored, treated, disposed, generated, or transported and which have registered UST's and/or AST's within a designated area around the site. An environmental database report prepared by Environmental Data Resources, Inc. (EDR) was obtained to perform the review. A copy of the report is included in Appendix C.

- Because the site was developed, the presence of business environmental risks (asbestos containing materials and lead-based painted surfaces) was evaluated. During the site inspection, the presence of suspect business environmental risks was assessed to determine the need for subsequent actions.
- State and County regulatory files were examined for registrations and violations associated with the subject site and adjacent properties.
- A review of city directories of the past and present occupants of the site, and past and present occupants of the adjacent and surrounding properties was performed to potentially identify historic land uses and possible presence of REC's that could impact the site. A city directory report prepared by EDR was obtained to perform the review. A copy of the report is included in Appendix C.
- The identification and delineation of wetlands, endangered or protected plant and animal species or historical/archaeological sites, as well as the identification and evaluation of geological and/or geotechnical hazards were beyond this scope of work.
- The review of available historic Sanborn and/or fire insurance maps was performed to potentially identify historic land uses of the site, adjacent, and surrounding properties, and the possible presence of REC's.
- During the site inspection, observations were made of conditions associated with business environmental risks such as lead-based paint, potential of flooding, presence of wetlands, and mold. The site conditions, location, and/or the age of the associated structures were used to provide an opinion regarding the presence of a business risk. No other non-scope ASTM E1527-13 issue was addressed in this Phase I ESA by request of Mr. Kroeger or from implication by Colella & Associates, Inc.
- Property ownership was developed from the property appraiser's internet website to determine the historic property owners and possibly the associated land uses.

2.3 SIGNIFICANT ASSUMPTIONS

1. There were no significant assumptions associated with the performance of this Phase I ESA. There is a possibility that even with the proper application of the described assessment methodologies there may exist on the site, conditions that could not be identified within the scope of this assessment, or which were not reasonably identifiable from the available information. Colella & Associates, Inc., believes that the information obtained from the record review, observations, aerial photographs, and the interviews concerning the site is reliable. However, Colella & Associates, Inc. cannot and does not warrant or guarantee that the information provided by these and/or other resources is accurate and/or complete. The methodologies of this assessment are not intended to produce "all inclusive" or "comprehensive" results, but rather to provide the user with information relating to the site.

2.4 LIMITATIONS AND EXCEPTIONS

1. Colella & Associates, Inc.'s professional services have been performed, our findings obtained and our conclusions prepared in general accordance with customary principles and practices in the fields of environmental science and engineering reflecting the site's conditions when observed and/or from resources reviewed. This warranty is in lieu of all other warranties either expressed or implied. Colella & Associates,

Inc., is not responsible for the independent conclusions, opinions, and/or recommendations made by others based on the data presented in this report. Performance of this Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential presence of a REC associated with the site.

2. This report (including all supporting documents) shall be the sole property of Colella & Associates, Inc., until payment for services rendered have been paid in full. The client shall not have proprietary interest in this report and supporting documents until payment is made in full. Colella & Associates, Inc., has absolute right to request the return of any and all copies of this report when nonpayment occurs.

3. It should be noted that all environmental assessments are inherently limited in the sense that conclusions are drawn from readily available information obtained from limited research and a site evaluation. Subsurface conditions were not field-investigated as part of this study and may differ from the conditions implied by the observations. Additionally, the passage of time may result in a change in the environmental characteristics at this site and surrounding properties. It should be noted that environmental concerns may be documented in public records that were not reviewed because they were not readily available. No Phase I ESA can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the site. Performance of the Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions. The limitations presented herein must be considered when the user of this report formulates opinions/decisions as to the environmental risks associated with the site. The identification of an environmental risk may be furthered evaluated through additional research and/or site assessment (sampling/analysis) to reduce and/or understand the magnitude of the REC.

4. The Phase I ESA has been prepared in general accordance with the procedures detailed in the current ASTM Standards on Environmental Site Assessments for Commercial Real Estate, Standard E 1527-13, except as noted below. The specialized terms, definitions of terms, and acronyms are defined in Section 3.0 of the referenced ASTM Standard.

5. In accordance with Section 7.1.2.1 of ASTM Standard E 1527-13, Colella & Associates, Inc., is utilizing the following approximate minimum search distance for conducting the Phase I ESA:

   - Federal National Priority List (NPL) -- 1.0 mile.
   - Federal Comprehensive Environmental Response, Compensation and Liability Information System (CERLIS) List -- 0.5 mile.
   - Federal Resource Conservation Recovery Act (RCRA) Treatment, Storage, and Disposal (TSD) Facilities List -- 1.0 mile.
   - Federal RCRA Generators List -- Site and Adjacent properties only.
   - Federal Emergency Response Notification System (ERNS) List -- Site only.
   - Federal Institutional/Engineering Control Registry -- Site only.
   - Brownfield Sites -- 0.50 mile.
   - State Lists of Hazardous Waste Sites identified for investigation or remediation (NPL & CERCLIS equivalent) -- 1.0 mile.

- State Landfill and/or Solid Waste Disposal Sites List -- 0.50 mile.
- State Leaking Underground Storage Tank (LUST) List -- 0.50 mile.
- State Registered Underground Storage Tank (UST) List -- Site and Adjacent properties only.

2.5 SPECIAL TERMS AND CONDITIONS

1. There were no special terms and conditions associated with the performance of this Phase I ESA.

2.6 USER RELIANCE

1. This Phase I ESA report was prepared solely for the use by 2620 W. OBT LLC (and its principals). Reliance on this report by others is at their own risk unless written authorization from Colella & Associates, Inc., is received.

3.0 SITE DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

1. Based on information provided by Mr. Kroeger, the subject site (see Figure 1) was located in Apopka, Florida and consisted of the following addresses:

    - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011).
    - 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070).
    - 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050).
    - 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031).
    - 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010).
    - Lake View Drive (Parcel No. 06-21-28-7180-07-100).
    - 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160).

2. The site encompasses approximately 33-acres. A copy of the legal description and property appraiser's information of each parcel (7) is included in Appendix D. The identified land use of each parcel by the property appraiser is presented below:

    - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) -- commercial (dry and refrigerated warehouse storage).
    - 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070) -- commercial (retail and professional office).
    - 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050) -- residential.
    - 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031) -- commercial (warehouses).
    - 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010) -- commercial (convenience store).
    - Lake View Drive (Parcel No. 06-21-28-7180-07-100) -- vacant undeveloped.
    - 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160) -- vacant undeveloped.

3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

1. The site was situated in a commercially developed area along W. Orange Blossom Trail. The general description of the adjacent and surrounding properties at the time of the site inspection included:

    - North -- Road (4-lane W. Orange Blossom Trail (US 441)) followed by residentially and commercially developed properties and undeveloped properties.
    - South -- Railroad track (active) followed by developed properties (commercial/industrial).
    - East -- Road (2-lane Lake View Drive) followed by commercially and residentially developed properties.
    - West -- Developed properties (commercial/industrial).

2. Based on the 2015 and 1960 (Photo-revised 1980) Physical Setting Maps (Figures 2 and 3, respectively), the topography of the general area had a mild slope to the south-southwest. The ground surface elevation near the site was approximately 125-feet above Mean Sea Level (MSL). The 1960 (Photo-revised 1980) map shows portions of the site developed.

3. The site has irregular shape with a general northwest-southeast alignment.

3.3 CURRENT USE OF THE PROPERTY

1. The site had the following current uses:

- 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) -- Mid-Florida Freezer Warehouses (dry and refrigerated/freezer storage) and McGee Tire (used tire recycling).
- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070) -- Island Realtor and Vertical Blinds.
- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050) -- Residential.
- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031) -- Rob's Custom Audio and vacant warehouse.
- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010) -- La Parada Mexican Market.
- Lake View Drive (Parcel No. 06-21-28-7180-07-100) -- Undeveloped and wooded. Cleared area (southern area) being used as a contractor's construction yard (storing equipment and materials).
- 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160) -- Undeveloped and partially wooded. Cleared area (southern area) being used as a contractor's construction yard (storing equipment and materials).

3.4 DESCRIPTIONS OF STRUCTURES, ROADS, AND SITE IMPROVEMENTS

1. Each parcel of the site had the following structures/improvements at the time of the site inspection on August 15 and 21, 2019:

- 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) -- Mid-Florida Freezer Warehouses
  - Concrete block warehouses (dry (6) and refrigerated (cooler (4) and freezer (4)) storage).
  - Office building.
  - Concrete block building (Fire Pump House, fire water supply well system).
  - Asphalt pavement.
  - Emergency generator.
  - Irrigation water well system.
  - Buried storm water sewer system.
  - Pad-mounted transformer.
  - Cyclone fence around boundary.
  - Interior cyclone fenced area (eastern portion of the parcel) being used by McGee Tire.
- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070) -- Island Realtor and Vertical Blinds
  - Former 1-story residential building converted into two (2) office units.
  - Water well.
  - Asphalt pavement.
  - Cyclone fence around boundary.

- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050) -- Residential
  - 1-story residential building.
  - Water well.
  - Cyclone fence around boundary.
- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031) -- Rob's Custom Audio
  - Metal warehouse building.
  - Concrete block warehouse building (vacant).
  - Asphalt pavement.
  - Cyclone fence around boundary.
- Lake View Drive (Parcel No. 06-21-28-7180-07-100) -- Undeveloped and wooded
  - Northern portion -- undeveloped and wooded.
  - Southern portion -- cleared, construction material stockpile storage in the southern area.
- 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160) -- Undeveloped (partially wooded and cleared)
  - Construction company storage yard on the southern area.

3.5 CURRENT USES OF ADJOINING PROPERTIES

1. The current adjoining properties' land uses included the following:

- North -- W. Orange Blossom Trail (4-lanes with a median) followed by undeveloped and commercially developed properties (Citgo retail gas/convenience store, Garage Autos, Inc., Perfect Car Corp. (used cars sales), Best Automotive (used car sales), Dayspring Church, H&M Electrical & Utilities Contractor, Getsemani Temple, Winfield Solutions, and TNT Rental).
- South -- Railroad track (active Florida Central Railroad/Florida Midland Railroad/Florida Northern Railroad) followed by commercially developed properties (warehouses/offices (Minute Maid and Coca-Cola)).
- East -- Road (Lake View Drive) followed by commercially developed property (vacant restaurant) and residentially developed properties.
- West -- Commercially developed property (Herc Rentals).

4.0 USER PROVIDED INFORMATION

4.1 TITLE RECORDS

1. A chain-of-title for the site was not provided by Mr. Kroeger to attempt to identify the land uses of the site and possible REC's.

4.2 ENVIRONMENTAL LIENS/ACTIVITY AND USE INFORMATION

1. Mr. Kroeger did not provide nor identify the existence of any environmental liens and/or limitations of use and provided a completed User Questionnaire (Appendix E) addressing these items. Mr. Kroeger indicated the site was used as a former juice plant prior to the current warehouse storage facility.

4.3 SPECIALIZED KNOWLEDGE

1. Mr. Kroeger provided a completed User Questionnaire (Appendix E) that indicated he had no specialized knowledge in the current land use of the site.

4.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

1. Mr. Kroeger provided a completed User Questionnaire (Appendix E) that indicated the purchase price of the property was at a fair market value.

4.5 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

1. The site was owned, as indicated by the respective Orange County Property Appraiser files, by Mid-Florida Freezer Warehouses LTD.

2. The site was being managed by the owner and the respective lessees.

3. The site was occupied by the following:

   - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) -- Mid-Florida Freezer Warehouses (dry and refrigerated/freezer storage) and McGee Tire.
   - 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070) -- Island Realtor and Vertical Blinds.
   - 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050) -- Residential.
   - 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031) -- Rob's Custom Audio and vacant concrete block warehouse.
   - 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010) -- La Parada Mexican Market.
   - Lake View Drive (Parcel No. 06-21-28-7180-07-100) -- Undeveloped and wooded.
   - 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160) -- Undeveloped and wooded.

4. The owner (Mid-Florida Freezer Warehouse LTD) provided the following documents for some of the parcels of the site:

   - March 1983 Environmental Property Assessment, Parts of Section 6, Township 21s, and Range 28E, by Springstead Engineering, Inc. 2560 W. Orange Blossom Trail -- Mid-Florida Freezer Warehouses (Selected relevant pages of the report are provided in Appendix F.)

- Assessment only included 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011), Lake View Drive (06-21-28-7180-07-100), and 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160) of the 2019 site assessment.
- Storm water from the developed portions of the site were routed to Holt Lake, an off-site western parcel (06-21-28-7177-00-011), which is owned by Mid-Florida Freezer Warehouses LTD.
- No RECs were noted on the subject parcels.

- March 2009, Phase I Environmental Site Assessment, 2424 - 2428 W. Orange Blossom Trail (Selected relevant pages of the report are provided in Appendix F.)
  - Assessment only included 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050) and 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070) of the 2019 site assessment.
  - Site covered approximately 0.4 acres.
  - 2428 W. Orange Blossom Trail parcel had an office (relator) and retail (vertical blinds) land uses.
  - 2424 W. Orange Blossom Trail parcel had a residential land use.
  - Both parcels had water wells and septic systems.
  - No tanks and transformers were noted.
  - No RECs were noted on the subject parcels.
- July 2010 Phase I Environmental Site Assessment, Mid-Florida Freezer Warehouses, LTD Parcels (Selected relevant pages of the report are provided in Appendix F.)
  - Assessment only included 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011), 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070), Lake View Drive (06-21-28-7180-07-100), and 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160) of the 2019 site assessment. The western portion of Parcel No. 06-21-28-7172-02-011 (2560 W. Orange Blossom Trail) was sold in 2018 and is currently used by Herc Rentals.
  - Site covered approximately 30.2 acres.
  - The site was being used as Mid-Florida Freezer Warehouses, McGee Tires (used tire recycling) and an undeveloped area.
  - Two (2) small (<550-gallon) aboveground storage tanks (ASTs) with petroleum were observed in secondary containment on the western portion of the site. No signs of spills and/or releases.
  - A waste oil (refrigeration oil) AST was located on a concrete slab in the western portion of the site. No signs of spills and/or releases.
  - An emergency generator with internal fuel storage was noted on the site. No signs of spills and/or releases.
  - One (1) pad-mounted transformer was noted on the site. There was no leakage noted around the transformer.
  - Water wells were noted for irrigation and fire prevention.
  - No RECs were noted on the subject parcels.

- June 2011 Phase I Environmental Site Assessment, 2322 W. Orange Blossom Trail (Selected relevant pages of the report are provided in Appendix F.)
  - Assessment only included 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031) of the 2019 site assessment limits.
  - Site covered approximately 1.8 acres.
  - The site had two (2) warehouse buildings, one metal and the other concrete block.
  - The site was occupied by Jim Martin Machine Shop.
  - The southern portion had dense brush and trees.
  - No tanks and transformers were noted.
  - No RECs were noted on the subject parcel.
- 1969 Boundary Survey (Survey drawing provided in Appendix F)
  - Northern adjacent property was Orange Blossom Trail (State Road 500).
  - Southern adjacent property was multiple railroad tracks associated with the Seaboard Air Line Railroad.
  - Eastern adjacent property was Boyscout Road (currently Lake View Drive).
  - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
    - Numerous masonry warehouse buildings.
    - 1-story office building.
    - Emergency generator located southwest of the office building.
    - Gas tank noted west of the office building.
    - Asphalt pavement between buildings.
    - Diesel fuel tank was noted near Fire Pump No. 1 (eastern portion of the parcel).
  - 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070) -- Residential property.
  - 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050) -- Residential property.
  - 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031) -- No information provided.
  - 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010) -- No information provided.
  - Lake View Drive (Parcel No. 06-21-28-7180-07-100) -- Unimproved wooded.
  - 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160) -- Unimproved wooded.
- Mid-Florida Freezer Site Plan (drawing provided in Appendix F)
  - Identified buildings and uses.

4.6 REASON FOR PERFORMING PHASE I ESA

1. Mr. Kroeger requested the Phase I ESA be performed to determine the environmental status of the site for consideration of purchasing the site.

5.0 RECORDS REVIEW

5.1 STANDARD ENVIRONMENTAL RECORDS (FEDERAL AND STATE)

1. Federal, state and local regulatory files were assessed regarding information, if any, pertinent to environmental concerns related to the subject site and adjoining/surrounding properties as defined in Section 2.4 of this report. A search was performed of the environmental records/listings summarized in an environmental database report prepared by and obtained from Environmental Data Resources, Inc. (EDR). EDR relies on government agency sources for the various listings/records associated with the applicable environmental regulations and the updates. Neither EDR nor Colella & Associates, Inc., warrant the accuracy or reliability of the information provided in the database document (Appendix C) as they are maintained by the respective government agencies.

2. Colella & Associates, Inc., has conducted a limited field inspection and environmental regulatory agency file review to confirm findings of the site and the adjacent properties within the database.

5.1.1 FEDERAL

1. The following federal databases were reviewed for sites located within the identified search distances.

   - National Priorities List (NPL) -- The NPL was researched with regard to sites which have been assessed by the EPA and determined to represent a possible threat to public health or the environment.
     - The subject site was not found in the NPL list.
     - No adjacent/surrounding properties were found in the NPL list.
   - Superfund Enterprise Management System (SEMS) formerly the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) -- EPA SEMS records were researched to determine if a facility is listed that has the potential for releasing hazardous substances into the environment.
     - The subject site was not found in the SEMS list.
     - No adjacent/surrounding properties were found in the SEMS list.
   - SEMS-Archive, formerly the CERCLIS NFRAP, records sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.
     - The subject site was not found in the SEMS-Archive list.
     - No adjacent/surrounding properties were found in the SEMS-Archive list.

2. Resource Conservation and Recovery Act (RCRA) files were assessed regarding the listing of properties associated with the generation, transportation, storage, and disposal of hazardous waste. The designation of a particular facility

as a "RCRA Site" does not necessarily mean that the property represents an immediate environmental concern for adjacent land owners. A property is designated as a RCRA facility if site activity at that property includes the generation, treatment, storage, transportation, and/or disposal of hazardous waste. The following categories (1, 2, and 3) are applied to those facilities which generate reportable quantities of hazardous waste.

- **Class 1 (Large Quantity Generator, LQG) -** Facilities which generate at least 1,000 kilograms (2,200 pounds) per month (kg/mo) of non-acutely hazardous waste or 1 kg/mo of acutely hazardous waste.
- **Class 2 (Small Quantity Generator, SQG) -** Facilities which generate at least 100 kg (220 pounds)/mo, but less than 1,000 kg (2,200 pounds)/mo, of non-acutely hazardous waste.
- **Class 3 (Conditionally Exempt Small Quantity Generator, CESQG) -** Facilities which generate less than 100 kg (220 pounds)/mo of non-acutely hazardous waste. This designation has been renamed to Very Small Quantity Generator (VSQG).

Information regarding Class 1, 2, or 3 generators within the identified search distance is as follows:

- The subject site was not found in the RCRA Generators list.
- The southern adjacent properties, 2501 and 2659 Orange Avenue (Coca-Cola) were found in the RCRA Generators list as SQG facilities. The report identified characteristic toxic and listed hazardous wastes were generated at the Coca-Cola facility.
- Two (2) surrounding properties were found in the RCRA CESQG list.
- See the report in Appendix C for details of the identified adjacent and surrounding properties.

3. Information regarding the presence of any RCRA Transportation, Storage, and Disposal (TSD) facilities within the search distance is as follows:

- The subject site was not found in the RCRA TSD list.
- No adjacent/surrounding properties were found in the RCRA TSD list.

4. Emergency Response Notification System (ERNS) was researched with regard to the site having experienced an incident which required emergency response activities.

- The subject site was not found in the ERNS list.

5. Brownfields (US Brownfields) are abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination.

- The subject site was not found in the US Brownfields list.

6. Engineering Controls (US Eng Controls) registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property.

- The subject site was not found in the US Eng Controls list.

7. Institutional Controls (US Inst Controls) registry is a database of all contaminated sites in the state of Florida which are subject to institutional and engineering controls.

    - The subject site was not found in the US Inst Controls list.

5.1.2 STATE

1. Colella & Associates, Inc., personnel reviewed the following environmental records maintained by the FDEP and incorporated into the database:

    - The listings maintained by the FDEP's Hazardous Waste Enforcement and Cleanup Programs regarding facilities regulated by the RCRA regulations.
    - The listing maintained by the FDEP's Solid Waste Management Division (SWF/LF) regarding facilities that dispose or treat solid waste (i.e. landfills, recycling facilities, etc.).
    - The listing and file records maintained by the FDEP's Tanks Program regarding facilities with leaking underground storage tanks (LUST's).
    - The FDEP maintains a list, DWM Contaminated Sites (DWM CONTAM) of facilities (primarily petroleum and dry-cleaning) that need cleanup but are not actively being worked on because the agency has insufficient funding.
    - The listing and file records maintained by the FDEP's Tanks regarding facilities with registered underground tank (UST) and aboveground storage tank (AST).
    - The listing maintained by the FDEP's Drycleaner Solvent Cleanup Program (DRYCLN) regarding dry-cleaning facilities (use and/or storage of the solvent).
    - The listing maintained by the FDEP of properties included in the Voluntary Cleanup Program (VCP) regarding properties that have had a release and are being addressed voluntary.
    - The listing of properties having Engineering Controls.
    - The listing of properties classified as Brownfields.
    - The listings maintained by the FDEP's DEDB (ethylene dibromide) records regarding the presence of EDB, a soil fumigant, in drinking water wells.

2. Within the designated search distances (Section 2.4), the following information was found in the databases. Section 5.1 lists the databases that had no listings within the designated search distances.

    - State Hazardous Waste Site (SHWS)
        - The subject site was not found in the SHWS list.
        - No adjacent/surrounding properties were found in the SHWS list.
    - Solid Waste Landfill List (SWF/LF)
        - The subject site was not found in the SWF/LF list.
        - No adjacent properties were found in the SWF/LF list.

  - Three (3) surrounding properties, 2591 W. Orange Blossom Trail (an inactive waste tire collector, El Dorado Recycle, Inc. and Harendra Singh), and 2877 Orange Avenue (an unauthorized waste tire collector, Danco A. Q. Enterprise) were found in the SHWS list. See the report in Appendix C for details.

- LUST's
  - The subject site was not found in the LUST list.
  - The southeast adjacent property, 2659 Orange Avenue (Coca Cola North America) was found in the LUST list. The report identified a petroleum discharge occurred in November 1995 and cleanup has been completed as of August 2006. For details see the report in Appendix C.
  - Three (3) surrounding properties were found in the LUST list. The closest LUST surrounding property was located at 2901 W. Orange Blossom Trail (Diamond Food Mart, Facility ID 8513126). The report identified a petroleum discharge occurred in July 1990 and cleanup was ongoing. For details of the three (3) LUST surrounding properties, see the report in Appendix C.

- DWM CONTAM
  - The subject site was not on the list.
  - One (1) adjacent property, 2501 W. Orange Avenue, Coca Cola Special Product AST 306, was found in the DWM CONTAM list. See the report in Appendix C for details.
  - One (1) surrounding property, 2901 W. Orange Blossom Trail, Diamond Food Mart, was found in the DWM CONTAM list. See the report in Appendix C for details.

- UST's
  - The site was not found in the UST list.
  - The southern adjacent properties, 2651 and 2659 Orange Avenue (Coca Cola Foods and Coca Cola North America, respectively) were found in the UST list. The report identified the facility was a non-retail user, had a 200-gallon kerosene UST which was removed as of June 1993.
  - Four (4) surrounding properties were found in the LUST list. The closest UST surrounding property was located at 2301 W. Orange Blossom Trail (Citgo Marketplace, Facility ID 8512806). The report identified the facility was a retail station, had three (3) USTs removed, and had one (1) 20,000-gallon UST which was still active.
  - For details of the UST adjacent and surrounding properties, see the report in Appendix C.

- AST's
  - The site was not found in the AST's list.

- ENG CONTROLS
  - The site was not found in the ENG CONTROLS list.

- BROWNFIELDS
  - The site was not found in the BROWNFIELDS list.

- VCP
  - The site was not found in the VCP list.
  - No adjacent/surrounding properties were found in the VCP list.
- DRYCLN
  - The subject site was not found in the DRYCLN list.
  - No adjacent/surrounding properties were found in the DRYCLN list.
- DEDB
  - Two (2) properties were identified as being within 0.25 miles of the site but did not identify an exact location.

2. The FDEP maintains petroleum storage systems, Brownfields, and OCULUS internet databases, for storage tank, hazardous waste, waste cleanup, brownfields, and solid waste facilities. The databases were assessed to determine if the site, adjacent, and/or surrounding properties had a file.

- Site -- The FDEP databases had a file for the site which included January 1991 and October 1992 Inspection Reports for the 2560 W. Orange Blossom Trail property. Copies are provided in Appendix G.
  - Facility Name was FL Express Trucking Inc. and had ID's 85513283 and 8944489.
  - 12,000 gallon diesel AST was removed prior to October 1992.
  - 6,000 gallon diesel AST was empty as of January 1991.
- Adjacent Properties -- The FDEP databases had a file for the southeast adjacent property (2659 Orange Avenue, Coca-Cola) for LUST and an AST. Based on information in the file, the apparent ground water flow direction associated with the LUST and AST was reported to be to the southeast.
- Surrounding Properties -- The FDEP databases had a file for the northwest surrounding property (2901 W. Orange Blossom Trail, Diamond Food Mart) for a LUST and an UST. Based on information in the file, the apparent ground water flow direction associated with the LUST and UST was reported to be to the northeast.

5.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

5.2.1 LOCAL

1. The OCEPD monitors and maintains the associated files for storage tank compliance in Orange County. No files existed for the site.

5.2.2 LAND RECORDS

1. Orange County Land Records were not reviewed to determine the activity and use limitations of the site. The Property Appraiser's internet website for the site was reviewed for ownership information and identified the site was owned by Mid-Florida Freezer Warehouses LTD.

5.3 PHYSICAL SETTING SOURCE(S)

5.3.1 U. S. G. S. TOPOGRAPHIC MAP

1. The 2015 U. S. G. S. Apopka, Florida Quadrangle Map (Figure 3) did not show any indication the site or area was developed. The 1960 (Photo-revised 1980) U. S. G. S. Apopka, Florida Quadrangle Map (Figure 3) showed only the following parcels as developed for the site as follows:
    - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) -- Numerous warehouse type buildings.
    - 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031) -- Warehouse building.

2. The ground surface elevation of the site and of the area was approximately 125-feet above the MSL.

5.3.2 REGIONAL GEOLOGY AND HYDROGEOLOGY

1. The northwestern portion of Orange County consists of unconsolidated sand with varying lenses/layers of clay.

2. The surficial aquifer (0- to 30- or to 60-feet) is a source of small quantities of water.

3. Ground water from the Floridan Aquifer is the primary source of potable water.

5.4 HISTORICAL USE OF THE SITE

1. The historic uses of the subject site were investigated through the review of aerial photographs, fire insurance maps, property tax files, land title records, U. S. G. S. map, city directories, building department records, and/or zoning use records. The objective is to develop a history of the previous uses of the site to identify the likelihood of past uses having led to REC's that could impact the site.

5.4.1 AERIAL PHOTOGRAPHS

1. Aerial photographs of the subject site and area (Section 06 Township 21, Range 28) were readily available for review on the Orange County Property Appraiser's internet website. Aerial photographs were also obtained from the Florida Department of Transportation and the University of Florida Library internet websites.

2. The aerial photographs provide a means to evaluate the site's land use history and development. Unrecorded REC's, if any, related to the subject site's land use could be reflected in the aerial photographs. A copy of a portion of the 2019, 2009, 2004, 1997, 1984, 1978, 1969, 1954, 1947, and 1939 aerial photographs of the area encompassing the subject site is incorporated into this report in Appendix B.

3. The review of the aerial photographs revealed the following regarding the site conditions:

    - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
        - 1939 -- Undeveloped with dense tree cover.
        - 1947 -- Undeveloped with the majority of the site cleared of trees.
        - 1954 -- Western portion had an office building and warehouses as viewed during the site visit. Eastern portion was undeveloped and had residential development.
        - 1969 -- Developed with warehouses as viewed during site visit. The eastern portion was absent of any development and a portion appeared to being cleared.

- 1974 to 2001 -- Same as 1969 with some buildings along western border removed.
- 2004 to 2019 -- Same as 2001 with varying amounts of material storage on the eastern portion.

- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070)
  - 1939 -- Undeveloped with dense tree cover.
  - 1947 -- Appears to be developed but cannot discern type.
  - 1954 to 2019 -- Developed with residential type building.

- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050)
  - 1939 -- Undeveloped with dense tree cover.
  - 1947 -- Appears to be developed but cannot discern type.
  - 1954 to 2019 -- Developed with residential type building.

- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)
  - 1939 -- Undeveloped with dense tree cover.
  - 1947 to 1969 -- Developed with warehouse building along northern border and residential buildings along the eastern boundary (adjacent to Lake View Drive). A citrus grove was noted in the western and southern areas of the parcel.
  - 1974 to 1978 -- Same as 1969 with a new warehouse near the original warehouse.
  - 1984 to 2019 -- Same warehouse buildings shown in 1978. Residential development not present. Citrus grove was declining and changing to natural tree cover.

- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010)
  - 1939 -- Undeveloped with dense tree cover.
  - 1947 to 2019 -- Developed with a commercial type building.

- Lake View Drive (Parcel No. 06-21-28-7180-07-100)
  - 1939 -- Undeveloped with dense tree cover.
  - 1947 to 1984 -- Developed with rural residential buildings on eastern portion and a citrus grove was present on the western portion.
  - 1990 to 2017 -- Citrus grove declined and changed into dense natural tree cover with the southeast corner with ground cover.
  - 2019 -- Dense tree cover except for southeast corner which appears to have material stockpiles.

- 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160)
  - 1939 -- Undeveloped with dense tree cover.
  - 1947 to 2017 -- Ground cover trending into dense tree cover.
  - 2019 -- Trees cleared and material stockpiles present.

4. No specific REC could be identified from the aerial photographs but the site (2560 W. Orange Blossom Trail, Parcel 06-21-28-7172-02-011) had an operation with extensive commercial/industrial development/use between circa 1954 and 2019.

5.4.2 FIRE INSURANCE MAPS

1. The Sanborn Fire Insurance Maps of Florida were available through EDR but were not developed for this area of Apopka, Florida, to identify the historic land uses and were not reviewed.

5.4.3 PROPERTY TAX FILES

1. The property tax files were not reviewed to identify historic land uses but to identify the current land use and if present associated REC's.

2. The Orange County Property Appraiser's file of the site was reviewed through their internet website. The information obtained for each parcel is provided in Appendix D and is summarized below:

- 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
  - Owner -- Mid-Florida Freezer Warehouse, LTD
  - Land Size -- Approximately 27.16 acres.
  - Land Use -- Packing plant.
  - Building(s) -- Four (4) warehouses and one (1) commercial office. Buildings were built between 1951 and 1963.
- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070)
  - Owner -- Mid-Florida Freezer Warehouse, LTD
  - Land Size -- Approximately 0.24 acres.
  - Land Use -- Store/office/residential.
  - Building(s) -- One (1) commercial, built in 1961.
- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050)
  - Owner -- Mid-Florida Freezer Warehouse, LTD
  - Land Size -- Approximately 0.16 acres.
  - Land Use -- Store/office/residential.
  - Building(s) -- One (1) single farm residence built in 1951.
- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)
  - Owner -- Mid-Florida Freezer Warehouse, LTD
  - Land Size -- Approximately 1.84 acres.
  - Land Use -- Warehousing.
  - Building(s) -- One (1) warehouse built in 1945 and another warehouse built in 1970.

- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010)
  - Owner -- Mid-Florida Freezer Warehouse, LTD
  - Land Size -- Approximately 0.52 acres.
  - Land Use -- Retail convenience store.
  - Building(s) -- One (1) commercial built in 1948.
- Lake View Drive (Parcel No. 06-21-28-7180-07-100)
  - Owner -- Mid-Florida Freezer Warehouse, LTD
  - Land Size -- Approximately 2.52 acres.
  - Land Use -- Vacant industrial.
  - Building(s) -- None.
- 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160)
  - Owner -- Mid-Florida Freezer Warehouse, LTD
  - Land Size -- Approximately 0.30 acres.
  - Land Use -- Vacant commercial.
  - Building(s) -- None.

3. The presence of possible REC's on the site could not be determined from the resource's information.

5.4.4 LAND TITLE RECORDS

1. Colella & Associates, Inc., developed the following ownership information from the internet websites of the Orange County Property Appraiser's and the Orange County Clerk of Records files:

- 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
  - Mid-Florida Freezer Warehouse, LTD
  - Plymouth Citrus Products Cooperative (1988).
  - Florida Gas Transmission Company (1986).
- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070)
  - Mid-Florida Freezer Warehouse, LTD
  - Philip Tatich (2012).
  - Donald Dale Daniels (2009).
  - Lillian Hickerson and Betty M. Sosa (2001).
- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050)
  - Mid-Florida Freezer Warehouse, LTD
  - Simon G. Bojkovsky, Joseph Bojkovsky, Katherine Trotter, and John Bojkovsky (2011).
- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)
  - Mid-Florida Freezer Warehouse, LTD

- Philip Tatich (2012).
- Denise Engskow for estate of Sarah Martin (2011).
- Plymouth Citrus Products Cooperative (1986).

- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010)
  - Mid-Florida Freezer Warehouse, LTD
  - Philip Tatich (2012).
  - Jose and Casilda Rodriguez (2012).
  - Fiesta Mercando, Inc. (2006).
  - First Antioch Missionary Baptist Church of Florida, Inc. (2003).
  - Russell and Barbara Unger (1994).
  - Mark Grant (1991).

  - J & N Bhandal, Inc. (1983).
  - Sanmukh Thakkar and Harendra Dave (1982).

- Lake View Drive (Parcel No. 06-21-28-7180-07-100)
  - Mid-Florida Freezer Warehouse, LTD
  - Plymouth Citrus Products Cooperative (1988).

- 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160)
  - Mid-Florida Freezer Warehouse, LTD
  - Plymouth Citrus Products Cooperative (1988).
  - Lonie McCafferty (1984).

2. The resource did not provide information of the land use of the site that would indicate the presence of REC's.

5.4.5 U. S. G. S. MAP

1. The 2015 U. S. G. S. topographic map (Figure 2) did not show the status of the property as being developed or undeveloped. The 1960 (Photo-revised 1980) U. S. G. S. topographic map (Figure 3) showed the site as follows. Black symbols indicate presence prior to 1960. Pink symbols indicate presence after 1960.

- 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
  - Numerous warehouse buildings (black and pink symbols).
  - Water tank.
  - Residential and church (both black symbols) located in the southeast corner of the parcel.

- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070)
  - Residential building.

- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050)
  - No development shown.

- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)
  - Warehouse buildings (black and pink symbols) along northern border (adjacent to Orange Blossom Trail).
  - Residential buildings (black symbols) along the eastern border (adjacent to Lake View Drive).
- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010)
  - Warehouse building (black symbol).
- Lake View Drive (Parcel No. 06-21-28-7180-07-100)
  - Residential buildings (black symbols) along eastern border (adjacent to Lake View Drive).
- 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160)
  - Residential building (black symbol) along southern border (adjacent to Mayflower Avenue).

2. The map did not provide information regarding the presence of REC's on the site.

5.4.6 STREET DIRECTORIES

1. City directories between 1969 and 2014 were available through EDR (see City Directory report in Appendix C) and were reviewed for the parcels of the site which had the following listings:

- 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
  - 2014 -- Absolute Storage Products LLC, Absolute Warehouse Services of Florida, and Clarklift of Florida.
  - 2010 -- Associated Hardwoods Inc. and Specialty Timbers.
  - 2005 -- DECO Business.
  - 2000 -- Cady Industries.
  - 1985 -- Plymouth Citrus Products Co-op.
  - 1969, 1976, and 1980 -- Plymouth Citrus Products Co-op.
- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070)
  - 1969 to 2014 -- Residential.
- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050)
  - 1969 to 2014 -- Residential.
- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)
  - 2005, 2010, and 2014 -- Jim Martin Machine Shop.
  - 2000 -- Soil Systems, Inc.
  - 1980 and 1985 -- Soil Systems, Inc. and Jim Martin Machine Shop.
  - 1976 -- G & O Co. Inc. (Metal fabrication)

- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010)
  - 2014 -- La Parada Mexican Market/Fiesta Mercado.
  - 2010 -- First Antoch Missionary Baptist Church and La Parada Market/Fiesta Mercado.
  - 2005 --Fiesta Mercado.
  - 2000, 2003 -- First Antioch Missionary.
  - 1969, 1976, 1980, and 1985 -- Buzz's Super Market
- Lake View Drive (Parcel No. 06-21-28-7180-07-100)
  - 1969 to circa 1990 -- No listings.
  - 1990 to 2014 -- Residential listings.

2. The resource identified the site had a citrus processing operation (2560 W. Orange Blossom Trail) and a metal fabrication shop (2322 W. Orange Blossom Trail) which could have operations using chemicals and/or petroleum products but did not provide information that would indicate the presence of REC's.

5.4.7 BUILDING DEPARTMENT RECORDS

1. This resource was not investigated to determine historic land uses of the site.

5.4.8 ZONING RECORDS

1. This resource was not investigated to determine historic land uses of the site.

5.4.9 HISTORICAL USE COMPLETENESS

1. The historical research of the site is complete.

5.5 HISTORICAL USE OF THE ADJACENT/SURROUNDING PROPERTIES

1. The historic uses of the subject area were investigated through the review of aerial photographs, fire insurance maps, property tax files, land title records, U. S. G. S. map, city directories, building department records, and/or zoning use records. The objective is to develop a history of the previous uses of the adjacent and surrounding area to identify the likelihood of past uses having led to REC's that could impact the site.

5.5.1 Aerial Photographs

1. Aerial photographs of the subject site and area (Section 06, Township 21, Range 28) were readily available for review on the Orange County Property Appraiser's internet website. Aerial photographs were also obtained from the Florida Department of Transportation and the University of Florida Library internet websites.

2. The aerial photographs provide a means to evaluate the site's land use history and development. Unrecorded REC's, if any, related to the land uses in the area surrounding the site could be reflected in the aerial photographs. A copy of a portion of the 2019, 2010, 2001, 1997, 1984, 1978, 1969, 1954, 1947, and 1939 aerial photographs of the area of the subject site is incorporated into this report in Appendix B.

3. The review of the aerial photographs revealed the following regarding the adjacent properties to the site:

- North
  - 1939, 1947, 1954 -- Road (current location of W. Orange Blossom Trail), 2-lanes, followed by a citrus grove. In 1954 a portion of the citrus grove was developed but the land use could not be identified.
  - 1969, 1974, 1978 -- Road (current location of W. Orange Blossom Trail), 4-lanes, followed by developed residential and commercial developed properties in the former citrus grove.
  - 1984 to 2019 -- Road (current location of W. Orange Blossom Trail), 4-lanes, followed by undeveloped and/or commercially developed properties.
- South
  - 1939 -- Railroad track followed by a developed property. Site use could not be identified.
  - 1947 -- Same as 1939 with additional commercial (warehouse buildings) development.
  - 1954 -- Same as 1947 with additional commercial (warehouse buildings) development. The southeast adjacent property appeared to have at least two (2) vertical tanks.
  - 1969 to 2019 -- Large commercial development (multiple warehouses and ASTs) as viewed during the site inspection.
- East
  - 1947 -- Road (Lake View Drive) followed by commercially (commercial type building) developed and undeveloped properties.
  - 1954 to 2019 -- Same as 1947 with additional residential developed properties.
- West
  - 1939 -- Commercially developed property with a warehouse type building.
  - 1947 -- Same as 1939 with additional commercial (warehouse buildings) development.
  - 1954 -- Same as 1947.
  - 1969 to 2019 -- Commercial development (warehouse/office).

4. The land uses as viewed from the resource could not identify the potential presence of a REC except for the vertical tanks on the southern adjacent property.

5.5.2 FIRE INSURANCE MAPS

1. The Sanborn Fire Insurance Maps of Florida were available through EDR but were not developed for this area of Apopka, Florida, to identify the historic land uses and were not reviewed.

5.5.3 PROPERTY TAX FILES

1. The property tax files were not reviewed to identify historic land uses on adjacent properties to identify the current land uses and if present associated REC's.

5.5.4 LAND TITLE RECORDS

1. Orange County Land Records were not reviewed to determine the activity and use limitations of the site.

5.5.5 U. S. G. S. MAP

1. The 2015 U. S. G. S. topographic map (Figure 2) did not provide any information of the development/use status of the adjacent/surrounding properties except for the presence of a road (US 441) north of the site.

2. The 1960 (Photo-revised 1980) U. S. G. S. topographic map (Figure 3) provided the following information of the adjacent/surrounding properties:

   - North -- Road (US 441), 4-lanes.
   - South -- Railroad track followed by commercially developed property with large warehouses.
   - East -- Road (Lake View Drive) followed by residentially developed buildings.
   - West -- Commercially developed with large warehouse type buildings.

3. The presence of a REC on the adjacent and surrounding properties could not be discerned from the topographic maps.

5.5.6 STREET DIRECTORIES

1. City directories between 1969 and 2014 were available through EDR (see City Directory report in Appendix C) and were reviewed for the area around the site (2620 W. Orange Blossom Trail or US Highway 441) which had the following listings:

   - 2247 W. Highway 441
     - JAH Works Automotive Inc.
     - Allens Automotive.
     - Central Florida Motor Cars.
     - Namlik's Auto.
     - Noack's Service gas station.
   - 2301 W. Highway 441
     - Citgo (retail gas station and convenience store).
     - Cumberland Farms Food (retail gas station and convenience store).
   - 2551 W. Highway 441
     - H&M Electrical and Underground Utilities.
     - Apopka Truck Brokerage.
   - 2601 W. Orange Blossom Trail
     - Winfield Solutions.
     - Retail Agronomy Solutions LLC.
     - Apopka Plastics (2000).

- 2901 W. Orange Blossom Trail
  - Diamond Oil (2014, 2010).
  - Plymouth Shell Station (1972).
- 2971 W. Orange Blossom Trail
  - Sunoco Food Mart (2014).
  - Happy Foods & Deli (2014, 2010, 2005).
  - Little Food Town (1982, 1977).

2. The presence of a REC on the adjacent and surrounding properties could not be discerned from the listings in the various city directories except for fuel storage/dispensing (2247, 2301, 2901, and 2971 W. Orange Blossom Trail) and the other listings having the potential as a manufacturing operation and/or fuel storage/user.

5.5.7 BUILDING DEPARTMENT RECORDS

1. This resource was not investigated to determine historic land uses of the area.

5.5.8 ZONING RECORDS

1. This resource was not investigated to determine historic land uses of the area.

5.5.9 HISTORICAL USE COMPLETENESS

1. The historical research of the adjacent and surrounding properties is complete and has met the objective.

6.0 SITE RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

1. A site inspection was conducted on August 15 and 21, 2019, by James C. Colella, P. E., of Colella & Associates, Inc. The inspection included a walk-through along the site's boundary lines, within the buildings (the interior of the refrigerated and freezer buildings were not inspected), and various paths across the site. A curb-side reconnaissance of the surrounding area was also conducted in a one-quarter mile radius.

2. Emphasis of the site inspection was placed on locating storage tanks, electrical equipment containing Polychlorinated Biphenyl (PCBs) dielectric fluid, waste disposal practices and/or chemical usage throughout the site. Additionally, surface water conditions, stressed vegetation, point and non-point sources of wastewater discharge, waste disposal areas, and other areas of environmental concern were identified and inspected, if present. Notes were recorded during all phases of the field site inspection and photographs (Appendix A) were taken to document the site conditions and areas of interest related to potential REC's and/or REC's.

3. The performance of the Phase I ESA cannot wholly eliminate the uncertainty regarding the potential existence of REC's on the subject site. The site's limiting conditions which could cover a REC included grass/vegetation, buildings, asphalt and concrete pavements, vehicles, and storage containers.

4. Colella & Associates, Inc.'s methodology to address the presence of a REC within any of these limiting conditions included reviewing historic aerial photographs and interviewing those individuals knowledgeable of the site.

6.2 GENERAL OBSERVATIONS

1. The site was located adjacent to commercially and residentially developed properties along W. Orange Blossom Trail and Lake View Drive in Apopka, Florida. The site conditions of each parcel as noted during the site inspection consisted of the following:

    - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
        - The parcel had an irregular shape with a northwest-southeast alignment.
        - Access was from W. Orange Blossom Trail and Mayflower Avenue.
        - Four (4) large concrete block warehouse buildings (dry, refrigerated, and freezer) with multiple units.
        - Stand-alone office building.
        - Cyclone fenced around the entire parcel.
        - Emergency generator.
        - Fuel AST (~200-gallons) in a concrete secondary containment.
        - Fuel AST (~1,000-gallons) in a metal secondary containment.
        - Outside storage of wood products.
        - Scrap metal and mercury lamps with fixtures located near the western portion of the site.
        - Two (2) used refrigeration oil ASTs on a concrete slab located on the west side of the western warehouse (Warehouses N, O, and P).

- Tire recycling (McGee Tire) within a cyclone fenced area in the eastern portion of the parcel.
- Northeastern portion of the parcel was undeveloped with ground cover.
- Irrigation well.
- Storm water drop inlets were noted throughout the parcel.
- There was no evidence of illegal dumping of any waste materials on the site.
- Pad mounted transformer was noted near the office building.
- Railroad spur line was noted along southern boundary.

- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070)
  - Residential building converted into office (realtor) and retail (Vertical Blinds) units.
  - Water supply well.
  - Cyclone fenced was noted around the entire boundary.
  - There was no evidence of illegal dumping of any waste materials on the site.
  - Storm water drains to W. Orange Blossom Trail and/or infiltrates.

- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050)
  - Residential building.
  - Water well.
  - Cyclone fenced was noted around the entire boundary.
  - There was no evidence of illegal dumping of any waste materials on the site.
  - Storm water drains to W. Orange Blossom Trail and/or infiltrates.

- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)
  - Two (2) warehouse buildings (metal and concrete block) were located near the northern portion. Concrete block warehouse was vacant. Metal warehouse was occupied by Ron's Audio (audio equipment installation into vehicles).
  - Asphalt pavement.
  - Cyclone fenced around entire boundary and separating the southern dense tree cover portion.
  - 5-gallon containers of unknown content were noted between the concrete block and metal warehouses.
  - There was no evidence of illegal dumping of any waste materials on the site.
  - Storm water drains to W. Orange Blossom Trail and/or infiltrates.

- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010)
  - Commercial building (La Parada Mexican Market).
  - Asphalt pavement.
  - Sewage lift station was noted in the southern portion.
  - There was no evidence of illegal dumping of any waste materials on the site.
  - Water well system.
  - Storm water drains to W. Orange Blossom Trail and Lake View Drive or infiltrates.

- Lake View Drive (Parcel No. 06-21-28-7180-07-100)
  - Dense natural tree cover.
  - There was no evidence of illegal dumping of any waste materials on the site.
  - Temporary construction storage/working yard. Contractor working on Orange Blossom Trail using southern portion of the parcel. No tanks were visible. Refueling of equipment was noted from a contracted fueling truck.
  - Storm water infiltrates.
- 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160)
  - Temporary construction storage/working yard. Contractor working on Orange Blossom Trail using parcel. No tanks were visible. Refueling of equipment was noted from a contracted fueling truck.
  - Storm water infiltrates.

6.3 EXTERIOR OBSERVATIONS

6.3.1 HAZARDOUS SUBSTANCES/MATERIALS

1. Hazardous substances/materials, as defined by the Resource Conservation and Recovery Act (RCRA), were noted during the site inspection on August 15 and 21, 2019, as follows:

- 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
  - Drums of concrete sealer in the western warehouse (Warehouse N, garage door lessee). Safety data sheet was not provided to confirm hazardous classification.
  - Drums and containers of various materials in the western warehouse (Warehouse O).
  - Used mercury lamps on concrete slab near the western boundary.
  - Totes of new chemical products stored in dry storage warehouse.
- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)
  - Limited number of small containers of unknown contents.
- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010)
  - Limited number of small containers of vehicle service/maintenance products for purchase.

6.3.2 PETROLEUM PRODUCTS

1. Petroleum products were noted during the site inspection on August 15 and 21, 2019, as follows:

- 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
  - New and used refrigeration oil.
  - Gasoline (200-gallon AST, emergency generator, small containers for grounds maintenance equipment).
  - Diesel (~150-gallon) AST in Fire Pump House 1 supporting fire water pump.
  - Diesel (~1,000-gallon) AST in secondary containment near Fire Pump House 1.
  - Drums of oil (new and used) associated with the maintenance of refrigeration equipment.

- McGee Tire operation -- Numerous tractor trailers/trucks (diesel fuel tanks) and limited new motor oil and antifreeze.

- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070)
  - Limited gasoline for lawn maintenance equipment.

- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)
  - Large tote of used motor oil (~275-gallons).
  - Large tote of used anti-freeze (less than 50-gallons).

- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010)
  - Limited quantity of small containers of vehicle service maintenance products for purchase.

6.3.3 STORAGE TANKS

1. Petroleum storage tanks were only noted on 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) during the inspection on August 15 and 21, 2019, as follows:

   - Used oil ASTs (2) located on the west side of the western warehouse (Warehouses N, O, and P).
   - Gasoline AST in concrete secondary containment located west of the office building.
   - ~1,000-gallon AST in metal secondary containment located near Fire Pump House 1.
   - Diesel AST (~150-gallons) located in Fire Pump House 1.
   - Emergency generator (self-contained tank).

6.3.4 ODORS

1. No odors were noted on the site during the site inspection on August 15 and 21, 2019.

6.3.5 POOLS OF LIQUIDS

1. No pools of liquid were noted on the site during the site inspection on August 15 and 21, 2019.

6.3.6 DRUMS

1. Drums were only noted on 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) during the site inspection on August 15 and 21, 2019, as follows:

   - New and used refrigeration oil.
   - Concrete sealer (~20-drums).
   - Miscellaneous wastes/materials associated with the Mid-Florida Freezer Warehouse operation.

6.3.7 HAZARDOUS WASTES AND/OR UNIDENTIFIED SUBSTANCES/CONTAINERS

1. Containers of unidentified unused products, wastes, and/or hazardous wastes were noted during the site inspection on August 15 and 21, 2019, in the western warehouse on 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) and 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031).

6.3.8 PCBs

1. No equipment that could have PCB oil was noted on the site inspection on August 15 and 21, 2019, except for a pad-mounted and pole-mounted transformers owned by Duke Power.

6.3.9 PITS, PONDS, OR LAGOONS

1. No pits, ponds, and/or lagoons were noted on the site during the site inspection on August 15 and 21, 2019.

6.3.10 STAINED SOIL/PAVEMENT

1. No significant soil staining was noted during the site inspection on August 15 and 21, 2019.

6.3.11 STRESSED VEGETATION

1. No stressed vegetated areas were noted during the site inspection on August 15 and 21, 2019.

6.3.12 SOLID WASTE

1. No significant solid waste was noted during the site inspection on August 15 and 21, 2019.

6.3.13 WASTEWATER

1. No wastewater was generated during the site inspection on August 15 and 21, 2019.

6.3.14 WELLS

1. No ground water monitoring wells were noted on the site during the site inspection on August 15 and 21, 2019. A fire suppression water supply well was noted on 2560 W. Orange Blossom Trial. Each parcel of the site had an irrigation water well except for the 2323 Mayflower Avenue and the Lake View Drive parcels.

6.3.15 SEPTIC SYSTEMS

1. Septic system features were not visible but were reported to be on the following parcels of the site inspection on August 15 and 21, 2019.

    - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) -- two (2), one on the east and west sides of the office building.
    - 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070).
    - 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050)
    - 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)

6.3.16 OTHER CONDITIONS OF CONCERN

1. During the site inspection, the following observations were made regarding other conditions of possible concern:

    - Drainage Paths -- The site was developed and undeveloped to drain storm water to the drop inlets and underground sewer system and/or to W. Orange Blossom Trail and Lake View Drive.
    - Railroads -- A railroad spur line exists along the southern boundary.
    - Heavy Equipment -- Road construction equipment was being stored on 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160) and the southeast corner of Lake View Drive (Parcel No. 06-21-28-7180-07-100).
    - Landfills, Dumping or Burial Activities -- No dumping and/or burial activities were noted.

- Monitoring Wells or Remedial Activities -- None were observed.
- Chemical Spills/Releases -- None were observed.
- Evidence of Ground and/or Surface Water Impacts -- None were observed.
- Oil/Gas Well Exploration, Production/Refinery Activities -- None were observed.

6.4 INTERIOR OBSERVATIONS

1. The following present the internal observations were made of the building(s) on each respective parcel of the site on August 15 and 21, 2019:

- 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011)
  - Dry storage warehouses -- painted concrete block walls with open roof system.
  - Refrigerated warehouses -- Interior of the warehouses were not inspected.
  - Office building -- painted wallboard walls, suspended ceilings, ceramic tile flooring, and carpet.
- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070)
  - Walls -- wallboard.
  - Ceiling -- wallboard, pop-corn ceiling coating.
  - Flooring -- carpet, ceramic tile, and vinyl flooring.
- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050)
  - Walls -- wallboard.
  - Ceiling -- wallboard, pop-corn coating, plaster.
  - Flooring -- carpet, ceramic tile, and vinyl flooring.
- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031)
  - Concrete block warehouse.
    - Walls -- Concrete block. Interior walls were concrete block and wallboard.
    - Ceiling -- Roof structure.
    - Flooring -- Concrete and vinyl flooring.
  - Metal warehouse.
    - Walls -- Metal. Interior offices had wallboard.
    - Ceiling -- Roof structure.
    - Flooring -- Concrete.
- 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010)
  - Walls -- Wallboard.
  - Ceiling -- Wallboard.
  - Flooring -- vinyl.

6.5 BUSINESS ENVIRONMENTAL RISKS

1. During the site inspection on August 15 and 21, 2019, the presence of business environmental risks, suspect asbestos containing materials (ACM's) and lead-based paint (LBP), were assessed as follows.

    - 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011) -- Suspect ACMs (pipe wrapping, wallboard, joint compound, vinyl flooring, and caulking around windows/doors) and suspect LBP surfaces (interior and exterior).
    - 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070) -- Suspect ACMs (wallboard, joint compound, window/door caulking, and pop-corn ceiling coating) and suspect LBP surfaces (interior and exterior).
    - 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050) -- Suspect ACMs (wallboard, joint compound, window/door caulking, and pop-corn ceiling coating) and suspect LBP surfaces (interior and exterior).
    - 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031) -- Suspect ACMs (wallboard, joint compound, ceiling tile, flooring/mastic, and window/door caulking) and suspect LBP surfaces (interior and exterior).
    - 2300 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-010) -- Suspect ACMs (wallboard, joint compound, vinyl flooring, and window/door caulking,) and suspect LBP surfaces (interior and exterior).
    - Lake View Drive (Parcel No. 06-21-28-7180-07-100) -- No concerns.
    - 2323 Mayflower Avenue (Parcel No. 06-21-28-7180-07-160) -- No concerns.

6.6 SITE PLAN

1. A site plan is provided as Figure 4.

6.7 ADJACENT PROPERTIES

1. During the site inspection on August 15 and 21, 2019, the adjacent properties were viewed to identify the land uses and observe any REC's that could impact the site. The adjacent properties' land uses and potential REC's included:

    - North -- W. Orange Blossom Trail (4-lanes with median) followed by undeveloped and commercially developed properties (Citgo retail gas/convenience store, Garage Autos, Inc., Perfect Car Corp. (used cars sales), Best Automotive (used car sales), Dayspring Church, H&M Electrical & Utilities Contractor, Getsemani Temple, Winfield Solutions, and TNT Rental). No obvious REC's were observed from the curd-side inspection.
    - South -- Railroad track followed by a commercially developed (warehouse type buildings) properties (Minute Maid and Coca-Cola). No obvious REC's were observed from the curd-side inspection. Some staining along the railroad tracks was noted.
    - East -- Lake View Drive followed by residential properties. No REC's were observed from the curd-side inspection.
    - West -- Commercially developed property (Herc Rentals). No REC's were observed from the curd-side inspection.

7.0 INTERVIEWS

1. During the performance of the Phase I ESA, Colella & Associates, Inc., attempted to interview various individuals (owner, site manager, occupants, local government officials, and/or others) to understand the land use of the site.

7.1 OWNER

1. Mr. Patrick Lee representing the owner, Mid-Florida Freezer Warehouses, LTD., was interviewed and provided the following information:

- Site Acres -- Total is between 33- and 35-acres.
- Purchased Site -- Each parcel of the site was purchase over a period of time. The Mid-Florida Freezer Warehouses operation parcel (2560 W. Orange Blossom Trail) was purchased in 1988. All other were purchased between 1988 and 2012.
- Land Use Prior to Purchased
  - Parcel No. 06-21-28-7172-02-011 (2560 W. Orange Blossom Trail) -- Former Plymouth Citrus Processing Facility. Property was vacant of activity from 1983.
  - Parcel No. 06-21-28-7180-09-070 (2428 W. Orange Blossom Trail) -- Retail.
  - Parcel No. 06-21-28-7180-09-050 (2424 W. Orange Blossom Trail) -- Vacant residential.
  - Parcel No. 06-21-28-7180-07-031 (2322 W. Orange Blossom Trail) -- Vacant when purchased (former machine shop).
  - Parcel No. 06-21-28-7180-07-010 (2300 W. Orange Blossom Trail) -- Mexican market.
  - Parcel No. 06-21-28-7180-07-100 (Lake View Drive) -- Vacant and undeveloped.
  - Parcel No. 06-21-28-7180-07-160 (2323 Mayflower Avenue) -- Vacant and undeveloped.
- Current Land Uses
  - Parcel No. 06-21-28-7172-02-011 (2560 W. Orange Blossom Trail) -- Dry and refrigerated/freezer storage facility (Mid-Florida Freezer Warehouses), McGee Tire (used tire recycling), and undeveloped area. Florida Express Trucking (refrigerated and flatbed trucks) operated from the property for a short period of time.
  - Parcel No. 06-21-28-7180-09-070 (2428 W. Orange Blossom Trail) -- Retail (Vertical Blinds) and office (realtor).
  - Parcel No. 06-21-28-7180-09-050 (2424 W. Orange Blossom Trail) -- Occupied residential.
  - Parcel No. 06-21-28-7180-07-031 (2322 W. Orange Blossom Trail) -- Ron's Audio (metal warehouse) and concrete block warehouse (vacant).
  - Parcel No. 06-21-28-7180-07-010 (2300 W. Orange Blossom Trail) -- Mexican market.
  - Parcel No. 06-21-28-7180-07-100 (Lake View Drive) -- Northern portion vacant and undeveloped, southern portion cleared and used by a contractor as a temporary construction yard.

  - Parcel No. 06-21-28-7180-07-160 (2323 Mayflower Avenue) -- Northern portion vacant and undeveloped, southern portion cleared and used by a contractor as a temporary construction yard.

- Site Development -- No major additions. Some buildings in the western portion of the 2560 W. Orange Blossom Trail parcel were removed.
- Monitoring Wells -- None.
- AST's -- Only aware of ASTs on 2560 W. Orange Blossom Trail (Parcel No. 06-21-28-7172-02-011).
  - ~200-gallon gasoline AST (west of office) in concrete secondary containment used for on-site equipment. Filled approximately three (3) times a year. No known over-fills and/or releases from fuel truck.
  - ~150-gallon diesel AST in Fire Pump House 1. Fueled on a regular basis as fire pump system tested routinely. No known over-fills and/or releases from fuel truck.
  - ~1,000-gallon AST in metal fabricated secondary containment, located near Fire Pump House 1. Is not being used, but may contain some gasoline.
  - ~500- and ~200-gallon used refrigeration oil ASTs located on west side of the west warehouse. Disposed off-site by a contracted service on a regular basis.
- UST's -- None known except for septic tanks.
- Emergency Generator -- Inactive. Self-contained fuel tank. Uncertain if it still has fuel.
- Drums -- Concrete sealer and other wastes/materials in western warehouse.
- Environmental Liens -- Not aware of any.
- Environmental Violations -- Not aware of any.
- Unusual Materials (drums, containers, debris) Discovered on the Site -- Not aware of any.
- Grounds Maintenance -- Respective lesser and Mid-Florida Freezer Warehouse personnel.
- Electrical Service -- Duke Energy.
- Storm Water Drainage -- Storm water drains off-site from 2560 W. Orange Blossom Trial to Holt Lake (located south of the site). On the other parcels, storm water drains to W. Orange Blossom Tail, Lake View Drive, and/or infiltrates
- Vehicle Maintenance -- None. Contracted fork-lift service. All wastes removed after service.
- Railroad Incidents -- No knowledge of any spills/releases from the active railroad line.
- Asbestos Survey or Abatement -- None performed or conducted.

7.2 SITE MANAGER

1. The site manager, Jeannette Acosta, was interviewed and provided the following information:

   - Associated with the site since 2008.

- Asbestos Survey or Abatement -- Performed survey on flooring in the office building on 2560 W. Orange Blossom Trail prior to removing and installing ceramic tile. Flooring did not contain asbestos.
- Out-parcel Properties -- None of tenants had large quantity of chemical/petroleum products.
- No known fuel spills/releases.

7.3 OCCUPANTS

1. A representative from the following parcels of the site was interviewed and provided the following information:

- 2428 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-070) -- Realtor and Vertical Blinds
  - No tanks.
  - Water well.
  - No chemical/petroleum products except for fuel for grounds maintenance equipment.
- 2424 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-09-050) -- Residential
  - No tanks.
  - Water well not operating.
  - No chemical/petroleum products except for fuel for grounds maintenance equipment.
- 2322 W. Orange Blossom Trail (Parcel No. 06-21-28-7180-07-031) -- Ron's Audio
  - Used oil and used anti-freeze totes left from previous tenant.
  - Limited chemical products (1-gallon containers or smaller) for use in installation of audio equipment into vehicles.
  - A garage in the metal warehouse was being used for vehicle body work, no painting.
  - Water obtained from water well on the adjacent eastern property, 2300 W. Orange Blossom Trail.

7.4 GOVERNMENT AGENCIES

1. The following agencies were contacted and provided the following information:

- Orange County EPD.
  - No files existed for the site.
- Central District FDEP, Ground Water -- FDEP OCULUS website.
  - Files existed for the site.
- Central District FDEP, Tanks -- Internet website and FDEP OCULUS website.
  - Files existed for the site.
- Central District FDEP, Hazardous Waste Compliance -- FDEP OCULUS website.
  - No files existed for the site.

7.5 OTHERS

1. No others were interviewed:

8.0 FINDINGS

1. Colella & Associates, Inc., performed a Phase I ESA of the site to determine if the subject site has been environmentally impacted due to current or previous on-site operations and/or by activities on adjacent and surrounding properties. Our findings regarding REC's, HREC's, CREC's and/or de-minimus conditions on the site and adjacent and surrounding properties, and business environmental risks are presented below.

1.1 REC's -- CURRENT LAND USES

1. The site was developed and has commercial (retail, warehouse storage, and office) and residential land uses as follows:

   - 2560 W. Orange Blossom Trail -- Mid-Florida Freezer Warehouses LTD (dry, refrigerated, and freezer warehouse storage). Fuel and used oil ASTs were noted. Drums of various wastes and unused products were noted in the western warehouse. Totes of new chemical products for eventual sale were noted in a dry storage warehouse. Used mercury lamps and fixtures were noted near the western boundary. No evidence of a release and/or spill was noted near any of these areas.
   - 2428 W. Orange Blossom Trail -- Realtor and Vertical Blinds. There was no evidence of an environmental concern.
   - 2424 W. Orange Blossom Trail -- Residential. There was no evidence of an environmental concern.
   - 2322 W. Orange Blossom Trail -- Ron's Audio. Two (2) totes (used oil and used antifreeze) were noted in the metal warehouse. There was no evidence of spills and/or releases around the totes. Small containers (5-gallon) of unknown contents were noted between the concrete block and metals warehouses.
   - 2300 W. Orange Blossom Trail -- La Parada Mexican Market. Limited quality of small containers of vehicle maintenance products were available for purchase. There was no evidence of spills and/or releases.
   - The undeveloped parcels (Lake View Drive and 2323 Mayflower Avenue) of the site did not have conditions that could cause an environmental concern.

2. Based on the findings, the adjacent properties were commercially developed to the north, south, and west with no obvious or identified operations that could cause an environmental concern to the site. The eastern adjacent properties were residential. The southern adjacent property (Coca-Cola) had 1) a 50,000-gallon fuel AST and contaminated soil removed in 1995 and a "No Further Action" determination was approved by the FDEP and 2) a LUST (200-gallon UST for kerosene) was removed and the area remediated by 2006. In the regulatory database (Appendix C), the release noted was from the AST not an LUST. Northern surrounding properties had retail fuel storage/dispensing operations. The apparent ground water flow direction was reported in associated assessment reports to be to the northeast north of the site and to the southeast, south of the site.

3. Based on the findings, the surrounding properties had environmental concerns associated with fuel storage and contaminated groundwater. The apparent ground water flow direction was reported in associated assessment reports to be to the northeast on the northern surrounding properties and to the southeast on the southern surrounding properties.

8.2 REC's -- HISTORIC LAND USES

1. Based on the information obtained and reviewed through the performance of the Phase I ESA, the site had the following various historic land uses.

    - 2560 W. Orange Blossom Trail -- Plymouth Citrus Products Cooperative (developed and operated as a citrus fruit processing facility) between mid-1940 and mid-1980. Regulatory files indicated a trucking business (Florida Express Trucking) operated between late-1980 and mid-1990, and had fuel ASTs (6,000- and 12,000-gallon).
    - 2428 W. Orange Blossom Trail -- Residential and retail.
    - 2424 W. Orange Blossom Trail -- Residential.
    - 2322 W. Orange Blossom Trail -- Machine shops between circa 1976 and circa 2014, and citrus grove.
    - 2300 W. Orange Blossom Trail -- Market and religious facility.
    - Lake View Drive -- Residential and citrus grove.
    - 2323 Mayflower Avenue -- Residential.

2. Based on the information obtained and reviewed through the performance of the Phase I ESA, the southern and western adjacent properties appeared to be commercially developed with large warehouses. The northern adjacent properties included a road (current W. Orange Blossom Trail) followed by commercial and residential developed properties and citrus groves. No obvious conditions, documented releases, and/or identified operations were apparent that could impact the site.

2. Based on the information obtained and reviewed through the performance of the Phase I ESA, the surrounding properties had commercial development (retail fuel stations) that could have REC's. No obvious conditions, documented releases, and/or identified operations were apparent that could impact the site.

8.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC's)

1. Based on the information obtained and reviewed through the performance of the Phase I ESA, a CREC was not identified on the site.

2. Based on the information obtained and reviewed through the performance of the Phase I ESA, a CREC was not identified on the adjacent properties.

3. Based on the information obtained and reviewed through the performance of the Phase I ESA, a CREC was not identified on the surrounding properties.

8.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HREC's)

1. Based on the information obtained and reviewed through the performance of the Phase I ESA, a HREC was not identified on the site.

2. Based on the information obtained and reviewed through the performance of the Phase I ESA, a HREC was identified on the southern adjacent property (2659 W Orange Avenue, Coca-Cola) associated with the former AST's (fuel and mineral acid).

3. Based on the information obtained and reviewed through the performance of the Phase I ESA, a HREC was identified on a surrounding property.

8.5 ON-SITE DE-MINIMUS CONDITIONS

1. Based on observations during the site inspection, de-minimus conditions for the current land use conditions did not exist except for localized oil stained areas on the asphalt pavements on the associated parcels.

8.6 BUSINESS ENVIRONMENTAL RISKS

1. Business environmental risks were assessed and the findings were as follows regarding the potential to be a business risk and/or cause a REC to the site through the business activity and/or presence:

    - Current On-Site Business Activity
        - 2560 W. Orange Blossom Trail -- Fuel is stored/used and used refrigeration oil is generated and stored in ASTs.
        - 2428 W. Orange Blossom Trail -- No concern.
        - 2424 W. Orange Blossom Trail -- No concern.
        - 2322 W. Orange Blossom Trail -- Totes of used oil and used antifreeze left from previous tenant.
        - 2300 W. Orange Blossom Trail -- No concern.
        - Lake View Drive -- Temporary construction yard (equipment and material storage) for a road contractor.
        - 2323 Mayflower Avenue -- Temporary construction yard (equipment and material storage) for a road contractor.
    - Historic On-Site Business Activity
        - 2560 W. Orange Blossom Trail -- Citrus fruit processing plant with fuel storage/use and used refrigeration oil storage.
        - 2428 W. Orange Blossom Trail -- No concern.
        - 2424 W. Orange Blossom Trail -- No concern.
        - 2322 W. Orange Blossom Trail -- Citrus grove.
        - 2300 W. Orange Blossom Trail -- No concern.
        - Lake View Drive -- No concern.
        - 2323 Mayflower Avenue -- No concern.
    - Current Adjacent Properties' Business Activity -- Retail and non-retail fuel users.
    - Historic Adjacent Properties' Activity -- Uncertain as the southern adjacent properties had extensive commercial/industrial development. Retail fuel users on properties north of W. Orange Blossom Trail.

2. In addition to business activity concerns, business environmental risks include construction materials containing asbestos and/or lead. Through information obtained, all the buildings on the site were built prior to 1980. Accordingly, our findings are:

   - ACMs
     - 2560 W. Orange Blossom Trail -- Wallboard/joint compound, flooring, ceiling tiles, window/door caulking, and pipe wrap insulation.
     - 2428 W. Orange Blossom Trail -- Wallboard/joint compound, flooring, window/door caulking, and popcorn ceiling coating.
     - 2424 W. Orange Blossom Trail -- Wallboard/joint compound, flooring, window/door caulking, and popcorn ceiling coating.
     - 2322 W. Orange Blossom Trail -- Wallboard/joint compound, flooring/mastic, and window/door caulking.
     - 2300 W. Orange Blossom Trail -- Wallboard/joint compound, window/door caulking, and flooring.
     - Lake View Drive -- None, undeveloped and no construction debris stockpiles.
     - 2323 Mayflower Avenue -- None, undeveloped and no construction debris stockpiles.
   - Lead-Based Paint (LBP) -- The buildings on the site had painted surfaces (interior and exterior).

9.0 OPINION

1. Colella & Associates, Inc., performed a Phase I ESA of the site and presented our findings in Section 8.0. Based on the findings, the following are Colella & Associates, Inc.'s opinions regarding the current REC's, CREC's, HREC's, de-minimus conditions for the site, and adjacent and surrounding properties. In addition, our opinion of the business environmental risks is presented for the site's building.

9.1 REC's -- CURRENT LAND USES

1. Based on the Phase I ESA findings, our opinion of a REC for the current land use of each parcel of the site follows:

   - 2560 W. Orange Blossom Trail -- No evidence was observed or found that a release has occurred. Fuel ASTs were in secondary containment or inside a building to minimize a potential release to the environment. Drums and totes were located within warehouses on concrete floors minimizing the potential impact to the environment. Used mercury lamps and fixtures were being stored on a concrete slab. Proper management and/or use of the ASTs, drums, and totes must be maintained. The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
   - 2428 W. Orange Blossom Trail -- The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
   - 2424 W. Orange Blossom Trails -- The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
   - 2322 W. Orange Blossom Trail -- No evidence was observed or found that a release has occurred. Totes were located within the metal warehouse on concrete floor minimizing the potential impact to the environment. The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
   - 2300 W. Orange Blossom Trail -- Retail sale of a limited quantity of small volume containers of petroleum and chemical products. The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
   - Lake View Drive -- The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
   - 2323 Mayflower Avenue -- The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.

2. Based on the findings, no REC's have been identified on the current adjacent properties' land uses. The available information and observations of the current adjacent properties' land uses have not identified a condition to cause a significant threat to the site. Ground water flow was identified to be to the southeast on the southern adjacent property. Even though no REC or material threats have been identified, the properties are active businesses with uncertain operations.

3. Based on the findings, REC's have been identified on the current surrounding properties' land uses. The available information provided adequate justification that the current land uses have not identified any condition to cause a

significant threat to the site. Ground water flow was identified to be to the southeast on the southern adjacent property and to the northeast on the northern surrounding properties. Even though no REC or material threats have been identified, the properties are active businesses with uncertain operations.

9.2 REC's -- HISTORIC LAND USES

1. Based on the Phase I ESA findings, our opinion of a REC for the historic land use of each parcel of the site follows: Based on the findings, fuel storage (ASTs in secondary containment or within a building) and refrigeration oil use have been identified from the historic land uses of the site. The available information did not provide adequate justification that could present a condition to cause a significant threat to the site.

    - 2560 W. Orange Blossom Trail -- Fuel storage and used refrigeration oil storage. No evidence was observed or found that a release has occurred. The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
    - 2428 W. Orange Blossom Trail -- The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
    - 2424 W. Orange Blossom Trails -- The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
    - 2322 W. Orange Blossom Trail -- No evidence was observed or found that a release has occurred. Totes were located within the metal warehouse on concrete floor minimizing the potential impact to the environment. The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
    - 2300 W. Orange Blossom Trail -- The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
    - Lake View Drive -- The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.
    - 2323 Mayflower Avenue -- The available information provided adequate justification that the current land use does not appear to present a condition to cause a significant threat to the site.

2. Based on the findings, no REC's have been identified from the resources reviewed on the adjacent properties historic land uses, however, the southern and western adjacent properties were heavily developed with commercial and/or industrial operations with active businesses. In addition, an active railroad track was located along the site's southern boundary. The available information of the historic adjacent properties' land uses does not indicate the presence of a REC but the land uses could have the potential of having a REC which could present a condition to cause a significant threat to the site.

3. Based on the findings, REC's have been identified on the historic surrounding properties' land uses. The available information provided adequate justification that the historic land uses do not appear to present a condition to cause a significant threat to the site but the land uses could have the potential of having a REC which could present a condition to cause a significant threat to the site.

9.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC's)

1. The site has no REC's from CREC's as none were identified on the site.

2. The site has no concerns from the adjacent properties' CREC's as none were identified.

9.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HREC's)

1. The site does not have a HREC.

2. The site has no concerns from the southeastern adjacent property's HREC.

9.5 ON-SITE DE-MINIMUS CONDITIONS

1. De-minimus conditions for the current land use were limited to localized oil stained areas on the asphalt pavement.

9.6 BUSINESS ENVIRONMENTAL RISKS

1. Business environmental risks were assessed and the findings were as follows regarding the potential to be a business risk and/or cause a REC to the site through the business activity and/or presence:

    - Current On-Site Business Activity

        - 2560 W. Orange Blossom Trail -- Fuel is stored/used and used refrigeration oil is generated and stored in ASTs. No concern with continued proper management.
        - 2428 W. Orange Blossom Trail -- No concern.
        - 2424 W. Orange Blossom Trail -- No concern.
        - 2322 W. Orange Blossom Trail -- Totes of used oil and used antifreeze left from previous tenant. No concern with continued proper management.
        - 2300 W. Orange Blossom Trail -- No concern.
        - Lake View Drive -- Temporary construction yard (equipment and material storage) for a road contractor. De minimus conditions may exist from construction equipment.
        - 2323 Mayflower Avenue -- Temporary construction yard (equipment and material storage) for a road contractor. De minimus conditions may exist from construction equipment.

    - Historic On-Site Business Activity

        - 2560 W. Orange Blossom Trail -- Citrus fruit processing plant with fuel storage/use and used refrigeration oil storage.
        - 2428 W. Orange Blossom Trail -- No concern.
        - 2424 W. Orange Blossom Trail -- No concern.
        - 2322 W. Orange Blossom Trail -- Citrus grove. No concern as pesticide/fungicide storage and/or mixing area was not noted.
        - 2300 W. Orange Blossom Trail -- No concern.
        - Lake View Drive -- No concern.
        - 2323 Mayflower Avenue -- No concern.

- Current Adjacent Properties' Business Activity -- Commercial/industrial operations are present but no obvious concerns.
- Historic Adjacent Properties' Business Activity -- Commercial/industrial operations were present but no obvious concerns have been identified from the resources reviewed.

2. The findings of the environmental business risks associated with ACM and/or lead were as follows:
   - ACM -- As the buildings of the site were built prior to the ban of asbestos (1980), various construction materials of the buildings have suspect ACMs.
   - Lead-Based Paint (LBP) -- All the buildings on the site have painted surfaces (interior and exterior) and they were built prior to the ban on LBP (1980).

9.7 VAPOR MIGRATION

1. Based on the Tier I Screen Guidance of ASTM E 2600-10 for vapor intrusion, the generally acceptable area of concern for petroleum hydrocarbon releases is within 600-feet and for solvent releases is within 1,760-feet of the site. Our opinion of the vapor migration concern is summarized below:
   - Site -- No concern as potential vapor sources have not and do not exist.
   - Adjacent Properties -- No concern as potential vapor sources have not and do not exist.
   - Surrounding Properties -- No concern as potential vapor sources have not and do not exist within 600-feet of the site.

10.0 CONCLUSIONS

1. Colella & Associates, Inc., performed a Phase I ESA of the site and presented our findings in Section 8.0. Based on the findings, the following conclusions regarding current REC's, CREC's, and vapor migration are presented below for the site, and adjacent and surrounding properties.

10.1 REC's -- CURRENT LAND USES

1. Based on the findings, no REC's have been identified from the current land uses of the site.

2. Based on the findings, no REC's have been identified on the current adjacent properties' land uses.

3. Based on the findings, REC's (LUST properties) have been identified on the current surrounding properties' land uses.

10.2 REC's -- HISTORIC LAND USES

1. Based on the findings, no REC's have been identified from the historic land uses of the site.

2. Based on the findings, no REC's from the historic land uses of the adjacent properties have been identified but the potential of a REC could exist. Based on the apparent ground water flow direction, the site is up-gradient to any of the properties that may have operations to cause an environmental concern.

3. Based on the findings, REC's (LUST properties at a distance from the site) have been identified on the historic surrounding properties' land uses. Based on the available resources, the surrounding commercially developed properties do not have a documented REC but appear to have conditions that could have present a potential REC. Based on the apparent ground water flow direction, the site is up-gradient to any of the properties that may have operations to cause an environmental concern.

10.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC's)

1. A CREC was not identified on the site.

2. A CREC was not identified on the adjacent properties.

10.4 VAPOR MIGRATION

1. Based on the findings, vapor migration does not appear to exist from operations on the site, and adjacent and surrounding properties.

11.0 DEVIATIONS

1. Colella & Associates, Inc., performed a Phase I ESA of the site in accordance with the ASTM Standard E 1527-13.

11.1 DELETIONS

1. There were no deletions from the ASTM Standard.

11.2 ADDITIONS -- NON-SCOPE CONSIDERATIONS

1. There were no additions to the ASTM Standard.

12.0 ADDITIONAL SERVICES

1. No additional services were requested.

13.0 REFERENCES

1. Reference materials used to assess the site for REC's included the following:

- Aerial photographs of Orange County (Section 06, Township 21, Range 28) from the Florida Department of Transportation internet website.
- Aerial photographs were obtained from the Orange County's Property Appraiser's internet web-page.

14.0 SIGNATURE AND QUALIFICATION

September 23, 2019

Mr. Cory Kroeger
2620 W. OBT LLC

Colella & Associates, Inc., has completed a Phase I Environmental Site Assessment (ESA) of the site (undeveloped, residentially, and commercially developed properties) was located in Apopka, Florida, covered approximately 33-acres, and consisted of the following seven (7) parcels:

- Parcel No. 06-21-28-7172-02-011 (2560 W. Orange Blossom Trail).
- Parcel No. 06-21-28-7180-09-070 (2428 W. Orange Blossom Trail).
- Parcel No. 06-21-28-7180-09-050 (2424 W. Orange Blossom Trail).
- Parcel No. 06-21-28-7180-07-031 (2322 W. Orange Blossom Trail).
- Parcel No. 06-21-28-7180-07-010 (2300 W. Orange Blossom Trail).
- Parcel No. 06-21-28-7180-07-100 (Lake View Drive).
- Parcel No. 06-21-28-7180-07-160 (2323 Mayflower Avenue).

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional. We have the specific qualifications based on education, training, and/or experience to assess a property of the same nature, history, and setting of the subject property in conformance with the generally accepted Phase I ESA standards and practices.

This Phase I ESA was performed in general accordance with the current ASTM Standard E 1527-13, except as noted in Section 2.4 of this report. This report represents the results of our findings from visual surveys, evaluation of available data, and discussions with personnel knowledgeable of the properties and various governmental agencies.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of this part [40 CFR Part 312]. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

James C. Colella, P.E.
Principal
Florida Registration No. 41545
23 Sept 19

JAMES C. COLELLA, P. E.

Mr. Colella has over 30 years of experience in assessing, designing, building and negotiating solutions to environmentally sensitive issues/operations. In Florida, Mr. Colella has worked and negotiated with local and state regulatory agencies in preparing permit applications, consent orders, work plans and final reports associated with assessments and remedial actions. Mr. Colella has the experience in understanding the technical issues, the implementability of a solution, the applicable regulatory requirements and the business impact. The integration of these aspects is critical in resolving environmental concerns/issues and achieving regulatory compliance. As Project Manager, Mr. Colella's understanding of these aspects for any project provides the experience required to minimize the work to fulfill the client's objective while complying with regulatory criteria.

EXPERIENCE

November 1995 to Present: Principal, Colella & Associates, Inc.

- Managed/performed tasks associated with a petroleum contamination assessment for a freight transportation facility in Jacksonville, Florida. Tasks included characterizing the subsurface soils by drilling exploratory borings, delineating the impacted ground water plume in a phased process by installing monitoring wells and sampling/analyzing the ground water, reducing the data to determine need for subsequent assessment and/or remedial action tasks. A Contamination Assessment Report was prepared that recommended Monitoring Only based on the site characterization and regulatory standards.
- Managed/performed a consent order RCRA Generator Closure at a manufacturing facility in Volusia County, Florida. The facility was cited for improperly discharging a neutralized wastewater into the soils and ground water on the site. The scope of work included the preparation/submittal of a Quality Assurance Project Plan, an Initial Remedial Action Plan and a Work Plan to demonstrate how work would be performed, the performance of source removal and site assessment activities (exploratory boring, monitoring wells, sampling/analysis), and preparation of a Contamination Assessment Report. The work involved routine interaction with the Florida Department of Environmental Protection (FDEP) Central District to understand their objectives and focus the work. Based on our assessment and site characterization data, a No Further Action recommendation was submitted to the FDEP for approval.
- Managed/performed a consent order RCRA Generator Closure for an airplane maintenance facility in Polk County, Florida. This project involved the ground water sampling and certificates of completion of the identified Plans for Restoration (PFR). Oversight of the activities performed by the client was provided to document and certify the work met the FDEP approved PFR. Ground water sampling was performed to demonstrate the ground water quality was not impacted above regulatory standards/guidances by the former operations. Based on the work performed, certifications were submitted that demonstrated the site met the "Clean Closure" conditions.
- Managed/performed the operation and maintenance (O & M) activities of a soil vapor extraction and ground water extraction/treatment Corrective Action System (CAS) at a site impacted by mineral spirits in Tallahassee, Florida. The CAS and O & M activities were conditions of a RCRA Closure Permit. The O & M activities include system inspections/maintenance, ground water and vapor sampling, and preparing/submitting quarterly reports. The system includes soil vapor vacuum wells, and dewatering, recovery wells, and monitoring wells.
- Managing/performing the operation and maintenance (O & M) activities of a groundwater extraction/treatment system at a site impacted by petroleum hydrocarbons in St. Augustine, Florida. The ground water extraction/treatment system was installed by others in accordance with the approved Remedial Action Plan (RAP). Our activities included monthly inspections of the system with sampling/analysis to confirm the required treatment is being achieved and quarterly sampling/analysis to evaluate the performance of the extraction system to recover the impacted ground water. Reports are prepared quarterly with an annual report presenting trends and recommendations.

- Performed property transaction environmental site assessments (Phases I, II and/or III) for lending institutions, buyers and sellers in accordance with the current ASTM criteria. Properties have included shopping centers, manufacturing facilities, former industrial areas, commercial businesses and vacant/undeveloped land. Phases II and III activities have included sampling/analysis of wastes, installation of ground water monitoring wells, soil vapor surveys, soil and ground water sampling/analysis, and removal activities.
- Provided EPA and OSHA training for confined space, respirator use, hazardous waste operations to manufacturing companies' employees.
- Prepared air permit applications for Title V and non-Title V air emission sources at various manufacturing facilities in Florida.
- Performed clean-up activities of business activities that were abandoned by the operator. Activities include the characterization of various containers and materials, scheduling and managing applicable contractors in the removal and disposal of the materials (hazardous and non-hazardous), and the cleaning of the building for subsequent use.
- Performed an engineering evaluation of chromate copper arsenate pressure treatment drip pad for a wood treating facility in Polk County, Florida. The evaluation was and is performed annually in accordance with the associated EPA drip pad regulations in Subpart W, 40 CFR 265.443(a) through (f).
- Provided regulatory compliance assessments for various manufacturing facilities in Volusia, Orange, and Polk Counties in Florida. The assessments identify violations and shortcomings, and recommendations to achieve compliance.

January 1994 - November 1995: Southeast Regional Manager/Director of Projects, TRC/Environmental Solutions, Inc.

- Responsible for the management and technical performance of projects involving:
  - Permitting; air, water, solid/hazardous waste.
  - Property Environmental Assessments and Facility Environmental Compliance Evaluations.
  - Consent order negotiations.
  - Interpretation of regulations and negotiation of work plans.
  - Investigations/assessments associated with CERCLA and RCRA and non-CERCLA/non-RCRA sites.
  - Engineering analyses (stability, hydrologic, hydraulic) associated with the design of a new storage disposal facilities, closures, and to support remediation activities/corrective measures studies.
  - Engineering design.
  - Preparation of construction plans, specifications, and bid documents for remedial designs.
- Managed/performed over 15 projects associated with the underground and above ground storage tank petroleum regulations. These have included CARs, RAPs, RAP implementations, and Operation and Maintenance and Monitoring.
- Managed technical staff in preparing an Air Permit Application for the painting operation at a steel fabrication facility in Florida. The Jacksonville District Office of the Florida Department of Environmental Protection was the reviewing agency.
- Managed/prepared "Plans For Restoration" for the closure of various areas at an airplane maintenance facility in central Florida. The plans for restoration identify how the cleanup will be achieved within 180 days so that a post-closure permit is not required. The Tampa District and Tallahassee division offices of the Florida Department of Environmental Protection were involved in reviewing this project.
- Managed/performed a contaminated assessment of a solvent spill/release on a barrier island in Florida. The assessment has been performed and a contamination assessment report has been prepared and submitted to the Orlando District office of the Florida Department of Environmental Protection. A "No further Action" or "Monitoring Only Plan" is being recommended.
- Managed/prepared a Corrective Action Plan (CAP) in accordance with RCRA regulations for a site impacted by mineral spirits and solvents. The CAP addressed the clean-up of the ground water by recovery (extraction wells) treatment (air stripping and discharge to a POTW).

- Managed the installation of ground water and soil Corrective Action System at RCRA sites in accordance with associated permits. These systems included soil vapor and ground water extraction and treatment.

1993 - Independent Consultant, Bruder Stephens, Inc.

- Performed an environmental audit of a research/development and chemical analytical laboratory in St. Petersburg, Florida. This audit compliance, operational and management, included the inspection of the builds, operations and files, detailed interviews with key operations and management personnel and an oral presentation of findings/recommendations followed by a written document.
- Performed numerous commercial property transaction audits (Phase I Environmental Site Assessments) within Florida in accordance with client's specific requirements (Barnett Banks, FNC, FDIC, First Union Bank) or ASTM Standard E1527. Recognized environmental conditions, if identified, were assessed (Phase II) to confirm the impact and if necessary, to delineate the extent and/or remediate (Phase III) the impact.
- Prepared and implemented a contamination assessment plan in accordance with the consent order for a site formerly operated as an electronic manufacturer on a barrier island in Florida. The property was identified as being impacted by TCE and PCE. The contamination assessment report is being prepared to define the impact and to identify the need, if any, of any remedial action.
- Prepared and implemented an Interim Remedial Action Plan to remove contaminated soils and construction debris as hazardous waste for TCE and PCE contamination from an electronics' operation facility in Florida.
- Characterized and managed the removal of unknown containerized and stockpiled materials from a steel fabrications operation in Tampa, Florida. Sampling/analyses was performed for disposal characterization. Materials were identified as hazardous (72 drums) and non-hazardous (1500 cubic yards) waste and disposed of in accordance with applicable regulations.
- Negotiated a consent order for the performance of a Contamination Determination Report (CDR) with the Florida Department of Environmental Protection to document the presence/absence of contamination and proposed closure actions at an airplane stripping/painting operation in Lakeland, Florida. Contamination assessment activities and closure action evaluations are being performed to prepare and submit the CDR.

May 1991 - December 1992 - Manager, Florida Environmental Engineering Service, ATEC Associates, Inc.

- Responsible for the technical performance of all environmental projects; environmental sales and sales strategies; proposal and cost estimate preparation and review; project management training; technical/sales presentations; staffing/organization planning; and maximizing profits while minimizing liabilities within Florida. Offices for which this effort was provided included Pensacola, Jacksonville, Orlando, Tampa, West Palm Beach and Miami. Projects ranged from environmental compliance audits, environmental site assessments, contamination assessments, and RCRA investigations.

- Assisted in developing the Tampa Environmental Division; opening of the Pensacola office to provide environmental services and expanding the environmental staff's in the Jacksonville and Tampa offices.

1987 - 1991 - General Manager of Engineering, IT Corporation

- Responsible for the overall management, financial and technical performance of the Tampa office. Projects have included remedial investigations and feasibility studies, site assessments, design and field management, RCRA Part B applications, site closure plans, environmental audits, underground storage tank assessment, waste characterization studies, and computer modeling for hazardous and non-hazardous waste projects. Specific duties/projects include:
  - Established a "green field" office in Tampa with no backlog in 1988 which grew to a staff of 36 with revenues exceeding $5 million in 1991.
  - Management of a staff of 36 personnel located in Tampa, Ocala, and Orlando which provide assessment, engineering analysis and design services for environmental concerns separately or as a "turnkey" effort.
  - Responsible for profit/loss performance of Tampa, Ocala, and Orlando offices.

- Negotiated contract with NAS Southern Division to perform a RI/FS and other environmental studies/programs at NAS Stations in Key West and Jacksonville, Florida.
- Prepared proposals, negotiated contracts and provided technical direction/reviews for CERCLA and RI/FS activities on landfills in Georgia and Florida. In addition, assisted in negotiations with the EPA Region IV for approval of work plans and associated documents.
- Evaluated data, prepared technical and cost proposals for performances of environmental audits, engineering designs, RI/FS and RFA/RFI/CMS projects.

- Performed a senior technical review of an environmental risk audit of a fertilizer manufacturing facility. This audit identified possible spill/release scenarios and existing control with recommendations to establish new/additional preventative programs in the various operations.

1985 - 1987 - Section Manager, Civil Geotechnical Design Engineering, IT Corporation

- Responsible for technical assistance in RI/FS projects and design of landfills (hazardous and non-hazardous) and associated structure. In conjunction, managed numerous projects and performed administrative responsibilities.
- Evaluated data, prepared technical and cost proposals for performances of environmental audits engineering designs, RI/FS and RFA/RFI projects.
- Management of a staff of engineers/scientists in performance of a remedial action design (slurry wall, impermeable cap, ground water extraction and treatment) for a New Jersey Superfund site through the U.S. Corps of Engineers (COE), Kansas City District.
- Management and technical support in a site selection study (design and economic considerations, site conditions, costs) for regional, national, or multiple sightings of a landfill and incinerator to handle various waste streams from an industrial client.
- Interaction with local, state and federal regulatory agencies in the preparation of appropriate permit (Part B, NPDES) and implementation of operational plans according to the regulations.
- Management and technical direction for a Part B permit application for a hazardous Waste Disposal Facility including the detailed engineering designs for electric arc furnace dust.
- As the Section Manager of the Civil/Geotechnical Design Group, managed a staff of engineers/scientists in performing similar projects. These responsibilities include: coordinating and scheduling project work and staffing; providing supervision and direction for the project staff; coordinating subcontractor activities; interfacing with clients; and maintaining corporate quality control procedures in the performance of the project. In addition, evaluated and developed scope of work and associated budgets and prepares proposals for new work.

1984 - 1985 - Project Manager, NUS Corporation, PEC Division

- Developed work plans and budgets and prepared proposals to investigate, evaluate, and/or design hazardous waste sites/disposal facilities. In addition, provided technical assistance in the performance of the project as well as being project manager (budget and schedule tracking). Services as a project manager in the U.S. Environmental Protection Agency (USEPA) Superfund project in areas of supervisory, planning, reviewing, implementation, and technical interpretation of results for the RI/FS. Performed such duties for Superfund sites in EPA Regions III and IV.

1974 - 1983 - Senior Project Engineer, D'Appolonia Consulting Engineers, Inc.

- Developed extensive experience in the design and operation of solid waste disposal facilities for coal reuse, ash wastes, paper waste, steel processing wastes, and hazardous wastes.
- Managed a staff of engineers/scientists and/or performed site investigations, engineering analyses, economic evaluations, and construction supervision for waste disposal facilities (hazardous and non-hazardous).
- Performed surficial and subsurface investigations and engineering analyses for designs, investigations and economic evaluations of over 50 waste disposal projects related to the coal industry in Pennsylvania, Kentucky, Virginia, West Virginia, and Ohio.

- Developed construction plans, specifications, and bid packages to implement the design.
- Provided liaison for clients with regulatory agencies.
- Prepared appropriate state and federal permit applications, National Pollution Discharge Elimination System (NPDES), and portions of Resource Conservation Recovery Act (RCRA) Part B applications.

EDUCATION

Graduate courses toward M.S., Civil Engineering, University of Pittsburgh, Pittsburgh, PA.
B.S., Civil Engineering, University of Pittsburgh, Pittsburgh, Pennsylvania, 1974.
B.A., Mathematics, St. Vincent College, Latrobe, Pennsylvania, 1974

TRAINING

Project Management (40 Hour Course) - IT Corporation; 1990.
Training Technical People into Strong Project Managers, Professional Services Management; 1990.
RCRA - McKoy and Associates; 1992
Total Quality Management Facilitator (40 Hours), ODI; 1992.
OSHA 1910.120 -- 40 Hour, supervisor and refreshers

REGISTRATIONS

Professional Engineer - Pennsylvania (test), Alabama, Georgia, Florida, and Kentucky

TABLE 1 - UNIVERSAL TREATMENT STANDARDS
REGULATED CONSTITUENTS FOR D001*, D002, D012-D043, F039 (for Column h)

#	Constituent
33)	Acenaphthylene
34)	Acenaphthene
35)	Acetone
36)	Acetonitrile
37)	Acetophenone
38)	2-Acetylaminofluorene
39)	Acrolein
40)	Acrylamide
41)	Acrylonitrile
42)	Aldrin
43)	4-Aminobiphenyl
44)	Aniline
45)	Anthracene
46)	Aramite
47)	alpha-BHC
48)	beta-BHC
49)	delta-BHC
50)	gamma-BHC
51)	Benzene
52)	Benz(a)anthracene
53)	Benzal chloride
54)	Benzo(b)fluoranthene (difficult to distinguish from benzo(k)fluoranthene)
55)	Benzo(k)fluoranthene (difficult to distinguish from benzo(b)fluoranthene)
56)	Benzo(g,h,i)perylene
57)	Benzo(a)pyrene
58)	Bromodichloromethane
59)	Methyl bromide (Bromomethane)
60)	4-Bromophenyl phenyl ether
61)	n-Butyl alcohol
62)	Butyl benzyl phthalate
63)	2-sec-Butyl-4, 6-dinitrophenol (Dinoseb)
64)	Carbon disulfide
65)	Carbon tetrachloride
66)	Chlordane (alpha and gamma isomers)
67)	p-Chloroaniline
68)	Chlorobenzene
69)	Chlorobenzilate
70)	2-Chloro-1, 3-butadiene
71)	Chlorodibromomethane
72)	Chloroethane
73)	bis(2-Chloroethoxy) methane
74)	bis(2-Chloroethyl)ether
75)	Chloroform
76)	bis(2-Chloroisopropyl)ether
77)	p-Chloro-m-cresol
78)	2-Chloroethyl vinyl ether
79)	Chloromethane (Methyl chloride)
80)	2-Chloronaphthalene
81)	2-Chlorophenol
82)	3-Chloropropylene
83)	Chrysene
84)	o-Cresol
85)	m-Cresol (difficult to distinguish from p-cresol)
86)	p-Cresol (difficult to distinguish from m-cresol)
87	Cyclohexanone
88)	1,2-Dibromo-3-chloropropane
89)	Ethylene dibromide (1, 2-Dibromoethane
90)	Dibromomethane
91)	2,4-D (2, 4-Dichlorophenoxyacetic acid)
92)	o,p-DDD
93)	p,p-DDD
94)	o,p-DDE
95)	p,p-DDE
96)	o,p-DDT
97)	p,p-DDT
98)	Dibenz(a,h)anthracene
99)	Dibenz(a,c)pyrene
100)	m-Dichlorobenzene
101)	o-Dichlorobenzene
102)	p-Dichlorobenzene
103)	Dichlorodifluoromethane
104)	1,1-Dichloroethane
105)	1,2-Dichloroethane
106)	1,1-Dichloroethylene
107)	trans-1, 2-Dichloroethylene
108)	2, 4-Dichlorophenol
109)	2, 6-Dichlorophenol
110)	1, 2-Dichloropropane
111)	cis-1, 3-Dichloropropylene
112)	trans-Dichloropropylene
113)	Dieldrin
114)	Diethyl phthalate
115)	2-4-Dimethyl phenol
116)	Dimethyl Phthalate
117)	Di-n-butyl phthalate
118)	1, 4-Dinitrobenzene
119)	4, 6-Dinitro-o-cresol
120)	2, 4-Dinitrophenol
121)	2, 4-Dinitrotoluene
122)	2, 6-Dinitrotoluene
123)	Di-n-octyl phthalate
124)	p-Dimethylaminoazobenzene
125)	Di-n-propylnitrosamine
126)	1, 4-Dioxane
127)	Diphenylamine (difficult to distinguish from diphenylnitrosamine)
128)	Diphenylnitrosamine (difficult to distiguish from diphenylamine)
129)	1, 2-Diphenylhydrazine
130)	Disulfoton
131)	Endosulfan I
132)	Endosulfan II
133)	Endosulfan sulfate
134)	Endrin
135)	Endrin aldehyde
136)	Ethyl acetate
137)	Ethyl cyanide (Propanenitrile)
138)	Ethyl benzene
139)	Ethyl ether
140)	bis(2-Ethylhexyl) phthalate
141)	Ethyl methacrylate
142)	Ethylene oxide
143)	Famphur
144)	Fluoranthene
145)	Fluorene
146)	Heptachlor
147)	Heptachlor epoxide
148)	hexachlorobenzene
149)	hexachlorobutadiene
150)	Hexachlorocyclopentadiene
151)	HxCDDs (All Hexachlorodibenzo-p-dioxins)
152)	HxCDFs (All Hexachlorodibenzofurans)
153)	Hexachloroethane
154)	Hexachloropropylene
155)	Indeno (1,2,3-c,d) pyrene
156)	Iodomethane
157)	Isobutyl alcohol
158)	Isodrin
159)	Isosafrole
160)	Kepone
161)	Methacrylonitrile
162)	Methanol
163)	Methapyrilene
164)	Methoxychlor
165)	3-Methycholanthrene
166)	4, 4-Methylene bis(2-chloroaniline)
167)	Methylene chloride
168)	Methyl ethyl ketone
169)	Methyl isobutyl ketone
170)	Methyl methacrylate
171)	Methyl methansulfonate
172)	Methyl parathion
173)	Naphthalene
174)	2-Naphthylamine
175)	o-Nitroaniline
176)	p-Nitroaniline
177)	Nitrobenzene
178)	5-Nitro-o-toluidine
179)	o-Nitrophenol
180)	p-Nitrophenol
181)	N-Nitrosodiethylamine
182)	N-Nitrosodimethylamine
183)	N-Nitroso-di-n-butylamine
184)	N-Nitrosomethylethylamine
185)	N-Nitrosomorpholine
186)	N-Nitrosopiperidine
187)	N-Nitrosopyrrolidine
188)	Parathion
189)	Total PCBs (sum of all PCB isomers, or all Aroclors)
190)	Pentachlorobenzene
191)	PeCDDs (All Pentachlorodibenzo-p dioxins)
192)	PeCDFs(All Pentachlorodibenzofurans)
193)	Pentachloroethane
194)	Pentachloronitrobenzene
195)	Pentachlorophenol
196)	Phenacetin
197)	Phenanthrene
198)	Phenol
199)	Phorate
200)	Phthalic acid
201)	Phthalic anhydride
202)	Pronamide
203)	Pyrene
204)	Pyridine
205)	Safrole
206)	Silvex (2, 4, 5-TP)
207)	2, 4, 5-T (2, 4, 5-Trichlorophenoxyacetic acid)
208)	1, 2, 4, 5-Tetrachlorobenzene
209)	TCDDs (All Tetrachlorodibenzo-p-dioxins)
210)	TCDFs (All Tetrachlorodibenzofurans)
211)	1, 1, 1, 2-Tetrachloroethane
212)	1, 1, 2, 2-Tetrachloroethane
213)	Tetrachloroethylene
214)	2, 3, 4, 6-Tetrachlorophenol
215)	Toluene
216)	Toxaphene
217)	Bromoform (Tribromomethane)
218)	1, 2, 4-Trichlorobenzene
219)	1, 1, 1-Trichloroethane
220)	1, 1, 2-Trichloroethane
221)	Trichloroethylene
222)	Trichloromonofluoromethane
223)	2, 4, 5-Trichlorophenol
224)	2, 4, 6-Trichlorophenol
225)	1, 2, 3-Trichloropropane
226)	1, 1, 2-Trichloro-1, 2, 2-trifluoroethane
227)	tris-(2, 3-Dibromopropyl) phosphate
228)	Vinyl chloride
229)	Xylenes-mixed isomers (sum of o-, m-, and p-xylene concentrations)
230)	Antimony
231)	Arsenic
232)	Barium
233)	Beryllium
234)	Cadmium
235)	Chromium (Total)
236)	Cyanides (Total)
237)	Cyanides (Amenable)
238)	Fluoride
239)	Lead
240)	Mercury(Nonwastewater from Retort
241)	Mercury(All Others
242)	Nickel
243)	Selenium
244)	Silver
245)	Sulfide
246)	Thallium
247)	Vanadium
248)	Zinc
249)	none apply

TABLE II

The following waste codes have subcategories and the appropriate key number must be selected and placed in Columns d on form No. 1. Please refer to 40 CRF 268 for exact wording of subcategories.

WASTE CODES	KEY NUMBER	SUBCATEGORY
D001	1	High TOC ignitable liquids
	2	Low TOC ignitable liquids managed in CWA/CWA-equivalent/class 1 SDWA systems.
	3	Low TOC ignitable liquids managed in CWA/CWA-equivalent/class 1 SDWA systems.
D002	4	Corrosive waste managed in non-CWA/non-CWA equivalent/non-Class 1 SDWA systems.
	5	Corrosive waste managed in CWA/CWA equivalent/Class 1 SDWA systems.
D003	6	Reactive Sulfides.
	7	Other Reactives.
	8	Water Reactives.
	9	Reactive Cyanides
D006	10	Characteristic for Cadmium based on extraction procedure.
	11	Cadmium containing batteries.
D008	12	Characteristic for Lead based on extraction procedure.
	13	Lead Acid Batteries
D009	14	Low Mercury, (< 260 ppm total Hg)
	15	High Mercury. (≥ 260 ppm total Hg)
F003 F005	16	Wastes that contain only one or more of the following solvents: carbon disulfide, cyclohexanone, and/or methanol.
F005	17	Contains only 2-Nitropropane.
	18	Contains only 2-Ethoxyethanol.
F025	19	Light Ends.
	20	Spent Filters/aids and Desiccants.
K006	21	Anhydrous.
	22	Hydrated.
U151	23	Nonwastewaters that contain > 260mg/kg total mercury.
	24	All U151 (mercury) Wastewaters.
K071	25	Nonwastewaters that are residues from RMERC.
	26	Nonwastewaters that are not residues from RMERC
	27	All K071 Wastewaters.
P047	28	4, 6-Dinitro-o-cresol.
	29	4, 6-Dinitro-o-cresol salts.
P065	30	Nonwastewaters, not incinerator or RMERC residues
	31	Nonwastewaters from RMERC w/less than 260 ppm Hg.
	32	Nonwastewaters from incinerator residues w/less than 260 ppm hg.
	33	All P065 wastewaters.
P092	34	Nonwastewaters, not incinerator or RMERC residues
	35	Nonwastewaters, from RMERC w/less than 260 ppm Hg.
	36	Nonwastewater from incinerator residues w/less than 260 ppm Hg.
	37	All P092 Wastewaters.
U240	38	2,4-D (2,4 -Dichlorophenoxyacetic acid).
	39	2, 4-D (2,4-Dichlorophenoxyacetic acid) salts and esters.

ase print or type.

TABLE 1 - UNIVERSAL TREATMENT STANDARDS
REGULATED CONSTITUENTS FOR D001*, D002, D012-D043, F039 (for Column h)

#	Constituent
33)	Acenaphthylene
34)	Acenaphthene
35)	Acetone
36)	Acetonitrile
37)	Acetophenone
38)	2-Acetylaminofluorene
39)	Acrolein
40)	Acrylamide
41)	Acrylonitrile
42)	Aldrin
43)	4-Aminobiphenyl
44)	Aniline
45)	Anthracene
46)	Aramite
47)	alpha-BHC
48)	beta-BHC
49)	delta-BHC
50)	gamma-BHC
51)	Benzene
52)	Benz(a)anthracene
53)	Benzal chloride
54)	Benzo(b)fluoranthene (difficult to distinguish from benzo(k)fluoranthene)
55)	Benzo(k)fluoranthene (difficult to distinguish from benzo(b)fluoranthene)
56)	Benzo(g,h,i)perylene
57)	Benzo(a)pyrene
58)	Bromodichloromethane
59)	Methyl bromide (Bromomethane)
60)	4-Bromophenyl phenyl ether
61)	n-Butyl alcohol
62)	Butyl benzyl phthalate
63)	2-sec-Butyl-4, 6-dinitrophenol (Dinoseb)
64)	Carbon disulfide
65)	Carbon tetrachloride
66)	Chlordane (alpha and gamma isomers)
67)	p-Chloroaniline
68)	Chlorobenzene
69)	Chlorobenzilate
70)	2-Chloro-1, 3-butadiene
71)	Chlorodibromomethane
72)	Chloroethane
73)	bis(2-Chloroethoxy) methane
74)	bis(2-Chloroethyl)ether
75)	Chloroform
76)	bis(2-Chloroisopropyl)ether
77)	p-Chloro-m-cresol
78)	2-Chloroethyl vinyl ether
79)	Chloromethane (Methyl chloride)
80)	2-Chloronaphthalene
81)	2-Chlorophenol
82)	3-Chloropropylene
83)	Chrysene
84)	o-Cresol
85)	m-Cresol (difficult to distinguish from p-cresol)
86)	p-Cresol (difficult to distinguish from m-cresol)
87	Cyclohexanone
88)	1,2-Dibromo-3-chloropropane
89)	Ethylene dibromide (1, 2-Dibromoethane
90)	Dibromomethane
91)	2,4-D (2, 4-Dichlorophenoxyacetic acid)
92)	o,p-DDD
93)	p,p-DDD
94)	o,p-DDE
95)	p,p-DDE
96)	o,p-DDT
97)	p,p-DDT
98)	Dibenz(a,h)anthracene
99)	Dibenz(a,c)pyrene
100)	m-Dichlorobenzene
101)	o-Dichlorobenzene
102)	p-Dichlorobenzene
103)	Dichlorodifluoromethane
104)	1,1-Dichloroethane
105)	1,2-Dichloroethane
106)	1,1-Dichloroethylene
107)	trans-1, 2-Dichloroethylene
108)	2, 4-Dichlorophenol
109)	2, 6-Dichlorophenol
110)	1, 2-Dichloropropane
111)	cis-1, 3-Dichloropropylene
112)	trans-Dichloropropylene
113)	Dieldrin
114)	Diethyl phthalate
115)	2-4-Dimethyl phenol
116)	Dimethyl Phthalate
117)	Di-n-butyl phthalate
118)	1, 4-Dinitrobenzene
119)	4, 6-Dinitro-o-cresol
120)	2, 4-Dinitrophenol
121)	2, 4-Dinitrotoluene
122)	2, 6-Dinitrotoluene
123)	Di-n-octyl phthalate
124)	p-Dimethylaminoazobenzene
125)	Di-n-propylnitrosamine
126)	1, 4-Dioxane
127)	Diphenylamine (difficult to distinguish from diphenylnitrosamine)
128)	Diphenylnitrosamine (difficult to distiguish from diphenylamine)
129)	1, 2-Diphenylhydrazine
130)	Disulfoton
131)	Endosulfan I
132)	Endosulfan II
133)	Endosulfan sulfate
134)	Endrin
135)	Endrin aldehyde
136)	Ethyl acetate
137)	Ethyl cyanide (Propanenitrile)
138)	Ethyl benzene
139)	Ethyl ether
140)	bis(2-Ethylhexyl) phthalate
141)	Ethyl methacrylate
142)	Ethylene oxide
143)	Famphur
144)	Fluoranthene
145)	Fluorene
146)	Heptachlor
147)	Heptachlor epoxide
148)	hexachlorobenzene
149)	hexachlorobutadiene
150)	Hexachlorocyclopentadiene
151)	HxCDDs (All Hexachlorodibenzo-p-dioxins)
152)	HxCDFs (All Hexachlorodibenzofurans)
153)	Hexachloroethane
154)	Hexachloropropylene
155)	Indeno (1,2,3-c,d) pyrene
156)	Iodomethane
157)	Isobutyl alcohol
158)	Isodrin
159)	Isosafrole
160)	Kepone
161)	Methacrylonitrile
162)	Methanol
163)	Methapyrilene
164)	Methoxychlor
165)	3-Methycholanthrene
166)	4, 4-Methylene bis(2-chloroaniline)
167)	Methylene chloride
168)	Methyl ethyl ketone
169)	Methyl isobutyl ketone
170)	Methyl methacrylate
171)	Methyl methansulfonate
172)	Methyl parathion
173)	Naphthalene
174)	2-Naphthylamine
175)	o-Nitroaniline
176)	p-Nitroaniline
177)	Nitrobenzene
178)	5-Nitro-o-toluidine
179)	o-Nitrophenol
180)	p-Nitrophenol
181)	N-Nitrosodiethylamine
182)	N-Nitrosodimethylamine
183)	N-Nitroso-di-n-butylamine
184)	N-Nitrosomethylethylamine
185)	N-Nitrosomorpholine
186)	N-Nitrosopiperidine
187)	N-Nitrosopyrrolidine
188)	Parathion
189)	Total PCBs (sum of all PCB isomers, or all Aroclors)
190)	Pentachlorobenzene
191)	PeCDDs (All Pentachlorodibenzo-p dioxins)
192)	PeCDFs(All Pentachlorodibenzofurans)
193)	Pentachloroethane
194)	Pentachloronitrobenzene
195)	Pentachlorophenol
196)	Phenacetin
197)	Phenanthrene
198)	Phenol
199)	Phorate
200)	Phthalic acid
201)	Phthalic anhydride
202)	Pronamide
203)	Pyrene
204)	Pyridine
205)	Safrole
206)	Silvex (2, 4, 5-TP)
207)	2, 4, 5-T (2, 4, 5-Trichlorophenoxyacetic acid)
208)	1, 2, 4, 5-Tetrachlorobenzene
209)	TCDDs (All Tetrachlorodibenzo-p-dioxins)
210)	TCDFs (All Tetrachlorodibenzofurans)
211)	1, 1, 1, 2-Tetrachloroethane
212)	1, 1, 2, 2-Tetrachloroethane
213)	Tetrachloroethylene
214)	2, 3, 4, 6-Tetrachlorophenol
215)	Toluene
216)	Toxaphene
217)	Bromoform (Tribromomethane)
218)	1, 2, 4-Trichlorobenzene
219)	1, 1, 1-Trichloroethane
220)	1, 1, 2-Trichloroethane
221)	Trichloroethylene
222)	Trichloromonofluoromethane

224)	2, 4, 6-Trichlorophenol
225)	1, 2, 3-Trichloropropane
226)	1, 1, 2-Trichloro-1, 2, 2-trifluoroethane
227)	tris-(2, 3-Dibromopropyl) phosphate
228)	Vinyl chloride
229)	Xylenes-mixed isomers (sum of o-, m-, and p-xylene concentrations)
230)	Antimony
231)	Arsenic
232)	Barium
233)	Beryllium
234)	Cadmium
235)	Chromium (Total)
236)	Cyanides (Total)
237)	Cyanides (Amenable)
238)	Fluoride
239)	Lead
240)	Mercury(Nonwastewater from Retort
241)	Mercury(All Others
242)	Nickel
243)	Selenium
244)	Silver
245)	Sulfide
246)	Thallium
247)	Vanadium
248)	Zinc
249)	reserved

TABLE II

The following waste codes have subcategories and the appropriate key number must be selected and placed in Columns d on form No. 1. Please refer to 40 CRF 268 for exact wording of subcategories.

WASTE CODES	KEY NUMBER	SUBCATEGORY
D001	1	High TOC ignitable liquids
	2	Low TOC ignitable liquids managed in CWA/CWA-equivalent/class 1 SDWA systems.
	3	Low TOC ignitable liquids managed in CWA/CWA-equivalent/class 1 SDWA systems.
D002	4	Corrosive waste managed in non-CWA/non-CWA equivalent/non-Class 1 SDWA systems.
	5	Corrosive waste managed in CWA/CWA equivalent/Class 1 SDWA systems.
D003	6	Reactive Sulfides.
	7	Other Reactives.
	8	Water Reactives.
	9	Reactive Cyanides
D006	10	Characteristic for Cadmium based on extraction procedure.
	11	Cadmium containing batteries.
D008	12	Characteristic for Lead based on extraction procedure.
	13	Lead Acid Batteries
D009	14	Low Mercury. (< 260 ppm total Hg)
	15	High Mercury. (≥ 260 ppm total Hg)
F003 F005	16	Wastes that contain only one or more of the following solvents: carbon disulfide, cyclohexanone, and/or methanol.
F005	17	Contains only 2-Nitropropane.
	18	Contains only 2-Ethoxyethanol.
F025	19	Light Ends.
	20	Spent Filters/aids and Desiccants.
K006	21	Anhydrous.
	22	Hydrated.
U151	23	Nonwastewaters that contain ≥ 260mg/kg total mercury.
	24	All U151 (mercury) Wastewaters.
K071	25	Nonwastewaters that are residues from RMERC.
	26	Nonwastewaters that are not residues from RMERC
	27	All K071 Wastewaters.
P047	28	4, 6-Dinitro-o-cresol.
	29	4, 6-Dinitro-o-cresol salts.
P065	30	Nonwastewaters, not incinerator or RMERC residues
	31	Nonwastewaters from RMERC w/less than 260 ppm Hg.
	32	Nonwastewaters from incinerator residues w/less than 260 ppm hg.
	33	All P065 wastewaters.
P092	34	Nonwastewaters, not incinerator or RMERC residues
	35	Nonwastewaters, from RMERC w/less than 260 ppm Hg.
	36	Nonwastewater from incinerator residues w/less than 260 ppm Hg.
	37	All P092 Wastewaters.
U240	38	2,4-D (2,4 -Dichlorophenoxyacetic acid).
	39	2, 4-D (2,4-Dichlorophenoxyacetic acid) salts and esters.

NON-HAZARDOUS WASTE MANIFEST

I. REGISTRATION/NOTIFICATION:		Yes	No	Unk	N/A
1. Facility has properly registered all applicable tanks on site? 17-61.050(1)(a).	1	✓			
2. Current Registration placard is properly displayed? 376.303(1)(b), F.S. CLOSED	2				✓
3. Proper notification has been made for the following: 17-61.050(1)(b)	3	✓			
4. abandonment / CLOSED No longer in use	4	✓			
5. facility sale	5				✓
6. retrofitting	6				✓
7. tank test failure	7				✓
8. discharges	8				✓
9. monitoring response	9				✓

II. TANK STATUS:					
10. Tank Designated Out of Service: 17-61.050(3)(b)1.	10	✓			
11. inventory — monitoring records kept or;	11				✓
12. secured against tampering	12				✓

III. OPERATION AND MAINTENANCE:					
13. The schedule for retrofitting has been met? 17-61.060(1)(c) & 2.	13				✓
14. prefabricated tanks	14				✓
15. field erected tanks	15				✓
16. piping	16				✓
17. Is NACE Criteria RP-01-69 met for tanks in contact with soil? 17-61.060(1)(b)3.	17				✓
18. sacrificial anodes system	18				✓
19. impressed current system	19				✓
20. Have monthly visual inspections been performed 17-61.060(1)(d)	20				✓
21. exterior of tanks	21				✓
22. impervious containment area	22				✓

IV. INVENTORY REQUIREMENTS:					
23. Inventory records maintained? 17-61.050(4)(a)2.	23				✓
24. water	24				✓
25. product	25				✓
26. meter readings	26				✓
27. Inventory reconciliation is performed? 17-61.050(4)(c)2.b.	27				✓
28. each 5 consecutive readings	28				✓
29. once a week	29				✓
30. alternate procedures	30				✓
31. Significant loss/gain investigation? 17-61.050(4)(c)3.	31				✓
32. interior examinations	32				✓
33. have repairs been made?	33

ABOVEGROUND STORAGE TANK COMPLIANCE INSPECTION FORM

			Yes	No	Unk	N/A
I.	**REGISTRATION/NOTIFICATION:** Comments:					
1.	Facility has registered all applicable tanks on site; 17-762.400	1.				✓
2.	Current registration placard is properly displayed; 17-762.410(4)	2.				✓
	Proper notification has been made for the following; 17-762.450:					
3.	Abandonment and closure (30 days prior); (1) (a)	3.				✓
4.	Change of ownership (30 days after); (1) (b)	4.				✓
5.	Retrofitting, replacement or upgrading; (10 days prior); (1) (c)	5.				✓
6.	Change of tank status (in service/out-of-service); (1) (d)	6.				✓
7.	Change of facility status (e.g. substances stored); (1) (e)	7.				✓
8.	Change of method of financial responsibility (within 30 days); (2)	8.				✓
9.	The facility owner/operator notified D.E.R. of internal tank inspection 24 hrs prior to the test; (3)	9.				✓
10.	Loss of greater than 100 gallons on an impervious surface or 500 gallons inside secondary containment within one working day; .450(4)	10.				✓

II.	**RECORD KEEPING:** Comments:					
11.	All records were maintained for two (2) years and were available for inspection within five (5) working days; 17-762.710	11.				✓
12.	Some but not all records were maintained for two (2) years and were available for inspection within five (5) working days; 17-762.710	12.				✓

III.	**REPORTING/DISCHARGE RESPONSE/REPAIRS:** Comments:					
	Proper reporting requirements met for the following: 17-762.460					
13.	Integral piping tightness test failure within 10 days; (1)	13.				✓
14.	Pollutant discharge exceeding 25 gallons on a pervious surface; (2)	14.				✓
15.	Positive response of a release detection device within one working day; (3)	15.				✓
	The owner or the operator of the system which has discharged has:					
16.	Taken it out-of-service; 17-762.700 (1), had it repaired or replaced; .700, or properly closed it; .800	16.				✓
17.	Removed any regulated substances from the system; 17-762.820 (1)	17.				✓
18.	Tightness tested all repaired components before placing them back in service; 17-762.700 (5) & (6)	18.				✓
19.	Begun initial corrective actions for a release; 17-762.820 (2)	19.				✓

IV.	**INVENTORY REQUIREMENTS FOR TANKS IN CONTACT WITH SOIL:** Comments:					
20.	All inventory requirements maintained in accordance with 17-762.720 (1)	20.				✓
21.	Some, but not all inventory requirements maintained in accordance with 17-762.720 (1)	21.				✓

V.	PERFORMANCE STANDARDS/REPAIRS/CATHODIC PROTECTION: Comments:					
	Storage tank criteria 17-762.500					
22.	Meets construction upgrading schedule; .510 and .520	22.				
23.	Meets applicable storage tank standards; (1), (2) & (3)	23.				
24.	Tank has secondary containment system; .500 (6)	24.				
25.	Tank equipped with overfill protection ; (3) (f) 1-4, (g)	25.				
	Piping criteria					
26.	Meets new piping standards with secondary containment; .500 (4) & .600 (4)	26.				
27.	Meets construction upgrading schedule; 17-762.510 (3), & 520 (2)	27.				
	Repairs to storage tank systems; 17-762. 700					
28.	Failed storage tank system component properly repaired; (1)-(4)	28.				
29.	Tightness testing of the repaired component prior to being brought back into service; (5)	29.				
	Cathodic Protection; 17-762.730					
30.	Cathodic protection system for tank and piping provides continuous protection; (1)-(4)	30.				
	Secondary containment; 17-762.500					
31.	Does containment area have sufficient volume; .500 (6) (a) (2)	31.				
32.	Is the containment area made out of impervious material in accordance with Chapter 17-762, F.A.C., requirements; (6) (a) (1)	32.				
33.	Is the containment area equipped with drainage system or protected from accumulation of rain; (6) (a) (3)	33.				
34.	Hydrant pits equipped with spill prevention equipment; (5)	34.				
VI.	RELEASE DETECTION/MONITOR WELLS: Comments:					
35.	Facility has an approved release-detection system; 17-762.600 & 17-762.860	35.				
36.	Monitoring wells properly designed, constructed and installed; 17-762.640 or 17-762.600 (6)	36.				
37.	Interstitial monitoring adequate to detect a release from integral piping; 17-762.600 (4) & (5)	37.				
VII.	OUT-OF-SERVICE STATUS Comments:					
38.	Are the corrosion protection devices properly maintained; 17-762.800 (1) (a)	38.				
39.	Is the vent line and other ancillary equipment properly secured and maintained; (1) (b)	39.				
40.	Tests performed to insure the integrity of out-of-service system prior to being returned to service; (1) (c)	40.				
VIII.	VARIANCE Comments:					
41.	Has the facility applied for an Alternate Procedure; 17-762.850 (1)	41.				
IX.	OTHER Comments:					
42.	Any other violations noted during inspection (Explain in comments)	42.

Re: Coca-Cola Company Flavor Manufacturing
2501 W. Orange Ave. Apopka, FL 32703
HW Facility ID No.: FLR000047506
Orange County

Dear Ms. Crown:

Department personnel conducted an inspection of the above-referenced facility on June 21, 2022. Based on the information provided during and after the inspection, the facility was determined to be in compliance with the Department's rules and regulations. A copy of the inspection report is attached for your records, and any non-compliance items which may have been identified at the time of the inspection have been corrected.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Gina Laddick at 407-897-4309 or via e-mail at Gina.Laddick@FloridaDEP.gov.

Sincerely,

Daniel K. Hall, Manager
Central District
Florida Department of Environmental Protection

Hazardous Waste Inspection Report

FACILITY INFORMATION:

Facility Name: The Coca-Cola Company Flavor Manufacturing

On-Site Inspection Start Date: 06/21/2022 **On-Site Inspection End Date:** 06/21/2022

ME ID#: 29298 **EPA ID#:** FLR000047506

Facility Street Address: 2501 Orange Ave , Apopka, Florida 32703-3346

Contact Mailing Address: 2501 W Orange Ave, Apopka, Florida 32703-3346

County Name: Orange **Contact Phone:** (407) 358-6740

NOTIFIED AS:

SQG (100-1000 kg/month)

WASTE ACTIVITIES:

Generator: SQG

INSPECTION TYPE:

Routine Inspection for SQG (100-1000 kg/month) Facility

INSPECTION PARTICIPANTS:

Principal Inspector: Gina Laddick, Inspector

Other Participants: Miranda Rothenberger, Environmental Consultant; Hal Tarleton, Engineer; Karen Crown, Safety, Environmental, and Security Manager

LATITUDE / LONGITUDE: Lat 28° 41' 15.55" / Long 81° 33' 1.86"

NAIC: 311942 - Spice and Extract Manufacturing

TYPE OF OWNERSHIP: Private

Introduction:

On June 21, 2022, Gina Laddick and Miranda Rothenberger, Florida Department of Environmental Protection (FDEP or Department), inspected The Coca-Cola Company Flavor Manufacturing (Coca-Cola or Facility), located at 2501 W Orange Ave, Apopka, Florida, for compliance with state and federal hazardous waste regulations. The facility was represented by Karen Crown, Safety, Environmental, and Security Manager, and Hal Tarleton, Engineer. The facility has approximately 100 employees. The facility is operated 24 hours per day, 5 days per week, Monday through Friday, utilizing three shifts where employees are on-site. Water is provided by the City of Apopka.

This facility initially notified the state as a Small Quantity Generator (SQG) on October 26, 1998, under the name of Minute Maid Co and was issued EPA identification number FLR000047506. The facility then notified with the state as an SQG on May 3, 2010, under the name Coca-Cola Company Flavor Manufacturing. Recently, the facility notified the state as an SQG on January 13, 2022, and maintains EPA identification number FLR000047506.

Coca-Cola was previously inspected on July 9, 2018 for the first time by the Department and was determined to be in compliance with state and federal hazardous waste regulations.

Process Description:

This Coca-Cola facility consists of a 34,896 square foot building that houses two main laboratories, several offices, and storage areas. The facility conducts testing and manufactures flavors for a variety of beverages. There are two floors in the facility, with one laboratory on each floor. The laboratories are the only source of hazardous waste on-site.

Laboratories:

The first-floor laboratory is the Flavor Lab which supports most of the flavor plant. This lab houses several Satellite Accumulation Areas (SAA). The hazardous waste is produced from the auto titration machines in the lab. At the time of the inspection the following waste was in the IQC Flavor Lab:

- Three 2-gallon containers labelled with the words “hazardous waste” and marked with an NFPA diamond to indicate the hazards of the contents.

The second-floor laboratory is known as the Florida Juice Quality Control Lab (FJQC Lab) where juice quality is inspected and tested. The lab uses instruments to detect for foreign substances in juice sampling. Each machine in the lab has a SAA of hazardous waste, the following waste was in the FJQC Lab:

- Fourteen 2-gallon containers
- Two 1-gallon contained

All containers were labelled hazardous waste and marked with an NFPA diamond to indicate the hazards of the contents.

The second floor also contains a sample prep lab for extraction purposes. The following waste was in the sample prep lab:

- Three 2-gallon containers labelled hazardous waste and marked with an NFPA diamond to indicate the hazards of the contents.

Storage:

In the Mezzanine storage area located in the back of the building were two boxes of universal waste lamps dated May 18, 2022. The printed label was initially not visible, and the facility added the words “Universal Waste Lamps” during the inspection [40 CFR 273.14(e)].

Central Accumulation Area (CAA):

The last area of the facility to be inspected was the Central Accumulation Area (CAA). This area had several rows of empty drums and many 2-gallon containers of hazardous waste. This area did not have adequate aisle space and a proper count of the containers could not be conducted [40 CFR 262.16(b)(8)(v)].

Records Review:

Hazardous Waste Manifests for the last three years (June 2019 through June 2022) were available on-site for review. The facility typically utilizes Clean Harbors (MAD039322250) as their hazardous and non-hazardous waste transporter. Robbie N Wood, INC (ALD067138891) is used as a second transporter and Tristate Motor Transit Co (MAD095038998) is used as a third transporter when necessary. Waste shipments are either taken to Clean Harbors Deer Park (TXD055141378) or Clean Harbors El Dorado (ARD069748192). The most recent Land Disposal Restriction notice was signed on May 6, 2022, provided by Clean Harbors.

During a review of the weekly inspections from June 2019 through June 2022 of the CAA, it was noted that there were several weeks in which inspections were not conducted: 13 weekly inspections in 2019, 10 weekly inspections in 2020, 1 weekly inspection in 2021, and 3 weekly inspections in 2022. The inspection records did not document the time that the inspection was conducted, and several inspections did not report the number of containers [62-710.160(3), F.A.C.].

Employee training is tracked through the facility’s Access database. All employees receive a Hazardous Waste and Universal Waste Classroom Training. The training is given annually, and new employees receive this training within the first week of hire during their orientation period. Employees that are responsible for shipment of waste off-site and manifest handling are provided given a DOT training and annual refresher.

Coca-Cola maintains an Emergency Action Plan which adequately contains all required information. The

Emergency Action Plan lists Karen Crown as the main emergency contact of the facility. Alternative contacts are listed as Kathleen Squillante and Tracey Brown. This document was last revised on March 11, 2022.

The notification to local authorities was completed through the Tier II reporting completed by the facility. The most recent notification was March 1, 2021, and the local authority notified was State Emergency Response Commission.

Citrus Terpene Release (SWO Report # 2022-3486):

On May 17, 2022, Coca-Cola reported to the State Watch Office (SWO) of a Citrus Terpene release in Apopka, Florida. Approximately 100 pounds of terpenes were released from the plant due to an equipment malfunction. It was reported that no waterways or storm drains were impacted. The release was stopped, and appropriate hazardous waste cleanup actions were taken and the spill was appropriately reported. It was determined that this spill release was not a release of hazardous waste, and the contents were transported accordingly.

New Potential Violations and Areas of Concern:

Violations

Type:	Violation
Rule:	262.16(b)(8)(v)
Question Number:	3.101
Question:	Is there adequate aisle space to allow unobstructed movement of facility personnel and emergency equipment to any area of the facility where needed? 262.16(b)(8)(v)
Explanation:	The small quantity generator must maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.
Corrective Action:	The facility failed to maintain adequate aisle space in the central accumulation area. The facility is required to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes. On June 23, 2022, the facility provided photo documentation that the the central accumulation area was reconfigured and adequate aisle space will continue to be maintained.

Type:	Violation
Rule:	273.14(e)
Explanation:	Each lamp or a container or package in which such lamps are contained must be labeled or marked clearly with one of the following phrases: “Universal Waste - Lamp(s),” or “Waste Lamp(s),” or “Used Lamp(s)”.
Corrective Action:	The facility failed to have a container clearly labeled. The facility is required to label or clearly mark each container with one of the following phrases: “Universal Waste - Lamp(s),” or “Waste Lamp(s),” or “Used Lamp(s)”. On the date of the inspection, June 21, 2022, the facility properly labeled the container.

Type:	Violation
Rule:	62-730.160(3)
Question Number:	3.68

Question:	Does the generator properly document the weekly inspections? This should include at a minimum:(Check items below that are NOT in compliance) 62-730.160(3)
Explanation:	Generators of hazardous waste who accumulate hazardous waste on-site under 40 CFR 262.16, and 262.17 [as adopted in subsection 62-730.160(1), F.A.C.], shall maintain written documentation of the inspections required under 40 CFR Part 265 [as adopted in subsection 62-730.180(2), F.A.C.], and 40 C.F.R 262.16 and 262.17 [as adopted in subsection 62-730.160(1), F.A.C.]. The generator shall keep the written documentation of the inspections under this section for at least three years from the date of the inspection. At a minimum, this documentation shall include the date and time of the inspection, the legibly printed name of the inspector, the number of containers, the condition of the containers, a notation of the observations made, and the date and nature of any repairs or other remedial actions. The facility failed to document weekly inspections during several periods. Additionally, the facility failed to document the time of the inspection on all inspections within the review period.
Corrective Action:	The facility is required to conduct an inspection at least weekly of all central accumulation areas of hazardous waste, and document the inspection in accordance with 62-730.160(3), F.A.C. On June 23, 2022, the facility acknowledged the discrepancies of the weekly inspections and modified the weekly inspection report to include a record of the time that the inspection was conducted.

Conclusion:

Coca-Cola Company Flavor Manufacturing was inspected on June 21, 2022 for compliance with state and federal hazardous waste regulations and was out of compliance at the time of the inspection.

3.0: Small Quantity Generator Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.

Item No.	40 CFR 262 Subpart A -- General Standards	Yes	No	N/A
3.1	Has the facility properly identified all hazardous waste streams? 262.11	✓		
3.2	Has the facility obtained an EPA ID number? 262.18(a)	✓		
3.3	Is the facility disposing of all its hazardous wastes to facilities permitted to accept the waste? 262.18(c)	✓		
3.4	Are any hazardous wastes treated or disposed of on site?			
3.5	If YES, did the facility meet an exclusion or exemption from hazardous waste permit requirements? 268.7(a)(5), 62-730.240(1)			✓
Item No.	Land Disposal Restrictions	Yes	No	N/A
3.6	Does the facility ensure restricted waste streams are not diluted as a substitute for treatment? 268.3(a)			✓
3.7	Is the generator managing and treating prohibited waste or contaminated soil in tanks, containers, or containment buildings to meet applicable LDR treatment standards found at 268.40? 268.7(a)(5)			✓
3.8	Has the generator developed a waste analysis plan (WAP) describing procedures they will carry out to comply with the treatment standards? 268.7(a)(5)			✓
3.9	If the generator has a WAP, is it based on a detailed chemical and physical analysis of the prohibited waste(s) being treated? 268.7(a)(5)(i)			✓
3.10	If the generator has a WAP, does it include all the information necessary to treat the waste(s), including selected testing frequency? 268.7(a)(5)(i)			✓
3.11	Is the waste analysis plan in the facility's on-site files and available to inspectors? 268.7(a)(5)(ii)			✓
3.12	Did the generator comply with the notification requirements of 268.7(a)(3) for treated wastes shipped off-site? 268.7(a)(5)(iii)			✓
3.13	Has the generator determined all applicable hazardous waste codes associated with hazardous waste generated? 268.9(a)	✓		
3.14	If the waste is characteristic hazardous waste (and not D001 nonwastewater treated by CMBST, RORGS, or POLYM of 268.42 Table 1) did the generator identify reasonably expected underlying hazardous constituents? 268.9(a)			✓
3.15	If the hazardous waste is land disposed, did it meet the treatment standard requirements of 268.40? 268.40(a)			✓
3.16	If the waste or contaminated soil does not meet the treatment standards did the generator send a one-time written notice to the TSD containing all required information? 268.7(a)(2)			✓
3.17	If the generator choses not to determine if the waste meets the treatment standards did the generator send a one-time written notice to the TSD containing all required information? 268.7(a)(2)	✓		
3.18	If the waste or contaminated soil met the treatment standards did the generator send a one-time written notice to the TSD containing all required information? 268.7(a)(3)			✓
3.19	Did the generator retain on-site a copy of all notices, certifications, waste analysis data, and other documentation produced for at least 3 years from the date the waste was last shipped?	✓		

	268.7(a)(8)			
3.20	Is the generator managing lab packs using the alternative treatment standard for lab packs in 268.42(c)? 268.7(a)(9)			
3.21	Did the generator meet the requirements identified in 268.7(a)(9) for use of the alternative treatment standards for lab packs? 268.7(a)(9)			✓
3.22	Is the generator a small quantity generator (SQG) using a tolling agreement pursuant to 40 CFR 262.20(e)?			
3.23	Did the SQG comply with the applicable notification and certification requirements of 268.7(a) for the initial shipment of waste subject to the agreement? 268.7(a)(10)			✓
3.24	Has the SQG retained on-site a copy of the notification and certification, along with the tolling agreement, for at least 3 years after termination or expiration of the agreement? 268.7(a)(10)			✓
Item No.	The Manifest	Yes	No	N/A
3.25	Did the facility use a properly completed manifest for all its hazardous waste shipments? (Check items below that are NOT in compliance) 262.20(a)(1) ☐ Item 1. Generator's U.S. EPA Identification Number ☐ Item 2. Page 1 of "X" (total number of pages used to complete the manifest) ☐ Item 3. Emergency Response Phone Number (must meet requirements below) ☐ Item 4. Manifest Tracking Number ☐ Item 5. Generator's Mailing Address, Phone Number and Site Address ☐ Item 6. Transporter 1 Company Name & U.S. EPA ID Number ☐ Item 7. Transporter 2 Company Name & U.S. EPA ID Number ☐ Item 8. Designated Facility Name, Site Address, Phone Number, and U.S. EPA ID Number ☐ Item 9. U.S. DOT Description (Including Proper Shipping Name, Hazard Class or Division, Identification Number and Packing Group. ☐ Item 10. Containers (Number and Type) ☐ Item 11. Total Quantity (Round to nearest whole unit; container capacities are not acceptable as estimates) ☐ Item 12. Units of Measure (Weight/Volume) ☐ Item 13. Waste Codes. Enter up to 6 of the most representative waste codes. ☐ Item 14. Special Handling Instructions and Additional Information ☐ Item 15. Generator's / Offeror's Certifications ☐ Item 16. International Shipments (Import or Export must be noted) ☐ Item 17. Transporter's Acknowledgment of Receipt (printed name, signature, date of receipt) ☐ Item 18. Discrepancy (Discrepancies between waste described on manifest and waste received by facility) ☐ Item 19. Hazardous Waste Report Management Codes ☐ Item 20. Designated Facility Owner or Operator Certification of Receipt (printed name, signature, date of receipt)	✓		
3.26	Did the facility designate on the manifest one facility which is permitted to handle the waste described on the manifest? 262.20(b)	✓		
3.27	Did the generator sign the manifest certification by hand? 262.23(a)(1)	✓		
3.28	Did the generator obtain the handwritten signature of the initial transporter and date of acceptance on the manifest? 262.23(a)(2)	✓		
3.29	Did the generator retain one copy of the manifest for 3 years or until a copy of the signed manifest was received from the Designated Facility (TSD)? 262.23(a)(3)	✓		

3.30	For any bulk shipments within the U.S. solely by water did the generator provide 3 copies of the signed and dated manifest to the Designated Facility? 262.23(c)			✓
3.31	For rail shipments originating at the site of generation did the generator provide at least 3 signed and dated manifests to one of the entities below: (Check items below that are not in compliance) 262.23(d) ☐ The next non-rail transporter? ☐ The Designated Facility if transported solely by rail? ☐ The last rail transporter to handle the waste in the U.S. if exported by rail?			✓
3.32	If the generator did not receive a signed return copy of the manifest from the designated facility within 60 days of shipment, did the generator file an exception report? 262.42(b)			✓
3.33	Did the generator maintain manifests for 3 years? 262.40(a)	✓		
3.34	Did the facility have any rejected shipments of hazardous waste or container residues returned by the Designated Facility?			
3.35	If YES, did the generator meet the requirements of 40 CFR 262.23(f)? 262.23(f)			✓
Item No.	Pre Transport Requirements	Yes	No	N/A
3.36	Before transporting or offering hazardous waste for transport off-site, did the generator package the waste in accordance with 49 CFR parts 173, 178, and 179? 262.30			✓
3.37	Before transporting or offering hazardous waste for transport off-site, did the generator label each package in accordance with 49 CFR part 172? 262.31			✓
3.38	Before transporting or offering hazardous waste for transport off-site, did the generator mark each package in accordance with 49 CFR part 172? 262.32(a)			✓
3.39	Before transporting or offering hazardous waste for transport off-site, did the generator mark each container of 119 gallons or less with the following? (Check items below that are NOT in compliance) 262.32(b) ☐ Generator's Name and Address? ☐ Generator's EPA ID Number? ☐ Manifest Tracking Number?			✓
3.40	Before transporting or offering hazardous waste for transport off-site, did the generator offer the initial Transporter the appropriate DOT Placards? 262.33			✓
Item No.	Accumulation Requirements	Yes	No	N/A
3.41	Does the facility accumulate hazardous waste on-site prior to treatment or disposal? 262.16	✓		
3.42	Check the applicable accumulation unit if the facility accumulates hazardous waste on-site prior to treatment or disposal ☑ Containers - Complete Container Checklist below ☐ Tanks - Complete Tanks Checklist below			
3.43	Does the facility comply with the 180-day accumulation time limit? 262.16(b)	✓		
3.44	If NO, has the facility been issued an extension by the Department? 262.16(d)			✓
3.45	Does the facility comply with the 6000 kg maximum accumulation of hazardous waste? 262.16(b)(1)	✓		
3.46	Has the generator ensured the accumulation start date is visible for inspection on each hazardous waste container? 262.16(b)(6)(i)(C)	✓		
3.47	Has the generator ensured each hazardous waste container and tank is labeled or marked clearly with the words "Hazardous Waste"? 262.16(b)(6)(i)(A)	✓		
3.48	Are Satellite Accumulation points used? (If No, mark all items below as N/A.)			
3.49	Are satellite containers at, or near, the point of generation where wastes initially accumulate? 262.15(a)	✓		

3.50	Are satellite containers under the control of the operator of the process generating the waste? 262.15(a)	✓		
3.51	Are satellite containers in good condition? (Check for leaks, corrosion, dents, bulges, etc.) 262.15(a)(1)	✓		
3.52	Are satellite containers in use made of, or lined with, materials that are compatible with the hazardous waste to be stored? 262.15(a)(2)	✓		
3.53	Does the generator keep satellite containers closed during storage, except when adding or removing waste? 262.15(a)(4)	✓		
3.54	Has the generator marked satellite containers with the words "Hazardous Waste"? 262.15(a)(5)	✓		
3.55	Is greater than 55 gallons of hazardous waste or 1 quart of acutely hazardous waste accumulated in the Satellite point?			
3.56	If YES, after 3 days did the generator mark or label an accumulation start date on the excess waste containers ? 262.15(a)(6)			✓
Item No.	Emergency Information/Personnel Training	Yes	No	N/A
3.58	Has the facility identified at least one employee to act as the Emergency Coordinator? 262.16(b)(9)(i)	✓		
3.59	Has the facility posted required emergency information next to a telephones or in areas directly involved in the generation and accumulation of hazardous waste? (Check items below that are NOT in compliance) 262.16(b)(9)(ii) ☐ Name and telephone number of the Emergency Coordinator ☐ Location of fire extinguishers and spill control material, and, if present, fire alarm ☐ Telephone number of the fire department, unless the facility has a direct alarm (911 is acceptable)	✓		
3.60	Are all employees thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies? 262.16(b)(9)(iii)	✓		
3.61	Has the facility had to respond to any emergencies in the past 3 years?			
3.62	If YES, did the facility respond in a manner described below, or other appropriate manner? (Check items below that are NOT in compliance) 262.16(b)(9)(iv) ☐ FIRE - Call fire department or attempt to extinguish with a fire extinguisher ☐ SPILL - Contain the waste and clean up any hazardous waste and contaminated materials and soil ☐ FIRE, EXPLOSION, or RELEASE that posed threat - Notify the State Watch Office and National Response Center and report			✓
Item No.	Use and Management of Containers	Yes	No	N/A
3.63	Does the generator use hazardous waste containers that are in good condition? (Check for leaks, corrosion, dents, bulges, etc.) 262.16(b)(2)(i)	✓		
3.64	Does the generator use hazardous waste containers that are made of, or lined with, materials compatible with the hazardous waste to be stored? 262.16(b)(2)(ii)	✓		
3.65	Has the generator keep hazardous waste containers closed during storage, except when adding or removing waste? 262.16(b)(2)(iii)(A)	✓		
3.66	Does the generator ensure hazardous waste containers are not opened, handled, or stored in a manner that may rupture the container or cause it to leak? 262.16(b)(2)(iii)(B)	✓		
3.67	Does the generator conduct weekly inspections of areas where hazardous waste containers are stored? (Sometime during calendar week) 262.16(b)(2)(iv)	✓		
3.68	Does the generator properly document the weekly inspections? This should include at a minimum:(Check items below that are NOT in compliance) 62-730.160(3) ☐ Date and Time of inspection		✓	

	☐ Legibly printed name of inspector ☐ Number of hazardous waste containers ☐ Condition of containers ☐ Notation of observations made ☐ Date and nature of any repairs or remedial actions			
3.69	If the facility places incompatible wastes, or incompatible waste and materials in the same container, is it done in compliance with 40 CFR 262.16(b)(2)(v)(A)? 262.16(b)(2)(v)(A)			✓
3.70	If the facility places hazardous waste in an unwashed container that previously held incomplatible wastes or materials, is it done in compliance with 40 CFR 262.16(b)(2)(v)(B)? 262.16(b)(2)(v)(B)			✓
3.71	Are containers holding a hazardous waste that are stored near incompatible waste or other materials protected from that waste or material (kept apart)? 262.16(b)(2)(v)(C)			✓
Item No.	Tanks Requirements for SQGs	Yes	No	N/A
3.72	Does the facility treat or store hazardous waste in tanks?			
3.73	If YES, does the facility comply with the requirements of 40 CFR 265.17(b)? 262.16(b)(3)(ii)(A)			✓
3.74	Has the facility ensured no hazardous waste or treatment reagent is placed in a tank that could cause the tank or inner liner to rupture, leak, corrode, or otherwise fail? 262.16(b)(3)(ii)(B)			✓
3.75	Are uncovered tanks operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with containment that meets or exceeds the volume of the top 2 feet of the tank? 262.16(b)(3)(ii)(C)			✓
3.76	If hazardous waste is continuously fed into a tank, is the tank equipped with a means to stop this inflow (waste feed cut-off or by-pass system)? 262.16(b)(3)(ii)(D)			✓
3.77	Does the facility inspect, where present, the following at least once each operating day:			
3.78	Discharge Control Equipment (waste feed cut-off, by-pass, and drainage systems)? 262.16(b)(3)(iii)(A)			✓
3.79	Data gathered from monitoring equipment (e.g., pressure and temperature gauges)? 262.16(b)(3)(iii)(B)			✓
3.80	The level of waste in the tank? 262.16(b)(3)(iii)(C)			✓
3.81	Does the facility inspect the following at least weekly:			
3.82	The construction materials of the tank to detect corrosion or leaking of fixtures or seams? 262.16(b)(3)(iii)(D)			✓
3.83	The construction materials of, and the area immediately surrounding, discharge confinement structures (e.g., dikes) to detect erosion or obvious signs or leakage? 262.16(b)(3)(iii)(E)			✓
3.84	Does the facility accumulate waste in tanks or tank systems that have full secondary containment and either leak detection equipment to alert facility personnel to leaks or established workplace practices to ensure leaks are promptly identified?			
3.85	If YES, does the facility inspect Discharge Control Equipment, Data, and Level of waste in tanks at least weekly? 262.16(b)(3)(iv)			✓
3.86	Is the use of the alternate inspection schedule (weekly versus daily) documented in the facility's operating record? 262.16(b)(3)(iv)			✓
3.87	Does the documentation include a description of the established workplace practices at the facility? 262.16(b)(3)(iv)			✓
3.88	Upon closure of the facility, was all hazardous waste removed from tanks, discharge control equipment, and confinement structures? 262.16(b)(3)(vi)			✓
3.89	Does the facility manage ignitable or reactive waste in tanks?			
3.90	If YES, does the facility meet one of the following 3 conditions? (Check the condition that applies below) 262.16(b)(3)(vii)(A)			✓

	☐ If ignitable or reactive waste is placed in a tank is the waste treated, rendered, or mixed before or immediately after placement in the tank so that (A) the resulting mixture no longer meets the definition of ignitable or reactive waste and (B) the requirements of 265.17(b) - no risk of fire, explosion, fumes, gases, damage to integrity of the device, etc. - are met? ☐ If ignitable or reactive waste is placed in a tank is the waste treated or stored in such a way that it is protected from any material or conditions that may cause the waste to ignite or react? ☐ If ignitable or reactive waste is placed in a tank is the tank used solely for emergencies?			
3.91	If the facility treats or stores ignitable or reactive waste in a covered tank does the facility comply with the buffer zone requirements for tanks contained in Tables 2-1 through 2-6 of the National Fire Protection Association's "Flammable and Combustible Liquids Code"? 262.16(b)(3)(vii)(B)			✓
3.92	If incompatible wastes or incompatible waste and materials are placed in the same tank does the facility comply with the requirements of 265.17(b) - no risk of fire, explosion, fumes, gases, damage to integrity of the device, etc. - are met? 262.16(b)(3)(vii)(C)(1)			✓
3.93	If hazardous waste is placed in an unwashed tank which previously held an incompatible waste or material does the facility comply with the requirements of 265.17(b) - no risk of fire, explosion, fumes, gases, damage to integrity of the device, etc. - are met? 262.16(b)(3)(vii)(C)(2)			✓
Item No.	Preparedness and Prevention	Yes	No	N/A
3.94	Is there no evidence of a fire, explosion or release of hazardous waste or hazardous waste constituents to the environment? 262.16(b)(8)(i)	✓		
3.95	Does the facility have an internal communication or alarm system? 262.16(b)(8)(ii)(A)	✓		
3.96	Is there a telephone, alarm, 2-way radio or other device at the scene of operations immediately available and capable of summoning assistance? 262.16(b)(8)(ii)(B)	✓		
3.97	Is the fire control equipment adequate? 262.16(b)(8)(ii)(C)	✓		
3.98	Is spill control and decontamination equipment present? 262.16(b)(8)(ii)(C)	✓		
3.99	If sprinklers, water hoses or foam producing equipment is part of the facility fire control equipment, is water available at adequate volume and pressure? 262.16(b)(8)(ii)(D)			✓
3.100	Is the emergency equipment inspected and tested periodically? 262.16(b)(8)(iii) If yes, how many times per year?262.16(b)(8)(v)			✓
3.101	Is there adequate aisle space to allow unobstructed movement of facility personnel and emergency equipment to any area of the facility where needed? 262.16(b)(8)(v)		✓	
3.102	Has the facility made emergency response arrangements with the following: 262.16(b)(8)(vi)(A) ☐ Fire Department ☐ Police ☐ Hospital ☑ Emergency Response Contractor	✓		
3.103	If NO has the facility attempted to do so and is the refusal documented? 262.16(b)(8)(vi)(B)			✓
Item No.	Record keeping and Reporting	Yes	No	N/A
3.104	Is the generator keeping records of exception reports? 262.42(b)			✓
3.105	Is the generator keeping records of test results, waste analysis or other determinations made in accordance with 262.11? 262.11(f)	✓		
3.106	Are the records kept on-site? 262.40	✓		
3.107	Are records kept for a minimum of 3 years? 262.40	✓		
3.108	Has the generator exported any waste outside the U.S.? (If No, mark item below as N/A.)			

3.109	If YES, did the generator provide EPA with notification of the intended export 60 days before the initial shipment was inteneded to be shipped off-site? 262.83(b)			✓
3.110	Has the generator imported any hazardous waste into the U.S.? (If No, mark item below as N/A.)			
3.111	If YES, did the generator meet all of the requirements of 40 CFR 262.83? 262.83			✓

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737 & 62 -740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C

WCU Site ID: ERIC_12758

Dear Ms. Leonard:

Ardaman & Associates, Inc. (Ardaman) is pleased to submit the results of the Semi-Annual Groundwater Sampling Report for the above-referenced project. The purpose of this sampling and testing program was to provide current groundwater quality information.

SITE LOCATION AND BACKGROUND INFORMATION

The subject site, a Coca-Cola plant, is located on the northwest corner of West Orange Avenue and Boy Scout Boulevard in Apopka, Orange County, Florida. The site is situated in the southeast quarter of Section 6, Township 21 South, Range 28 East and is superimposed on the Apopka, Florida, USGS Quadrangle Map presented as the Site Location Map, **Figure 1**.

On July 16, 2010, Ardaman conducted a Subsurface Soil Exploration and Geotechnical Engineering Evaluation of the Settlement of Concrete Pavement in the area of Tank No. 306. During the laboratory observation of the soil samples obtained during the course of the geotechnical exploration, a “chemical” odor was noted in Boring DCP-2 throughout the depth of the boring.

A Preliminary Contamination Assessment was conducted and consisted of soil screening at four boring locations (TH-1, TH-2, HAB-3 and HAB-4) and installing and sampling one temporary monitoring well (TMW-1). No “chemical”-type odor was noted in the samples from the borings conducted during the LSA; however, moderate to very strong citrus-type odors and elevated net OVA readings were noted in vadose zone soil samples (to a depth of 12 feet bls) from borings TH-1 through TH-5 and from borings HAB-3 and HAB-4. Eight soil samples were collected for laboratory analysis. TPH was detected in soil sample TH-3-12 at a concentration of 370 mg/Kg, which exceeded the leachability-based soil cleanup target level (LSCTL); however, since the soil sample was obtained at a depth of 12 feet bls, it is not considered vadose zone soil contamination (the top of the smear zone was estimated to be at a depth of 12 feet). No COCs were detected above soil cleanup target levels (SCTLs) in samples HAB-3-4, HAB-4-4, TH-4-, TH-5-10 and TH-7-6 and no vadose zone soil contamination appeared to exist in the area of investigation.

Water table wells MW-1 through MW-7 and MW-9 through MW-12 and vertical delineation well MW-8D were installed for sampling. No contaminants were detected above groundwater cleanup target levels (GCTLs) in the samples from wells MW-3, MW-4, MW-7, MW-8D, MW-9, MW-10, MW-11 and MW-12. Benzene, p-isopropyltoluene (associated with peel oil), isopropylbenzene and TPH were reported above GCTLs in the groundwater samples from wells MW-1, MW-2, MW-5 and MW-6. Isopropylbenzene also exceeded the natural attenuation monitoring default source concentration (NADC) in the groundwater sample from well MW-2.

Based on the soil and groundwater data obtained during the LSA, it appeared that a discharge of a citrus product had occurred. The source of the discharge was associated with the former UST located near tank no. 306. However, no information regarding the tank, its exact location, contents, etc. are known and the discharge likely occurred some time ago since the tank no longer exists. Concentrated citrus-based flavorings are used at the plant. Citrus-type odors were noted in many of the borings and p-isopropyltoluene, commonly associated with peel oil and flavoring products, was reported in the groundwater samples. Isopropylbenzene appears to be a breakdown product of p-isopropyltoluene.

FDEP reviewed the LSA and provided comments in a letter dated February 24, 2012. The letter indicated that a TPH isoconcentration map was not included in the report and additional monitoring wells may be needed to define the extent of groundwater contamination following the completion of an additional groundwater elevation contour map utilizing all piezometers and wells.

Ardaman prepared a response to comments letter dated March 6, 2012, which stated that a TPH isoconcentration map was not prepared since the subject discharge was not petroleum. Ardaman felt that the TPH results were misleading since the product discharged was citrus peel oil, citrus drink flavorings, and/or similar food grade products such as those stored in the tank farm, not petroleum. The FL-PRO Method measures the amount of hydrocarbons present having 8 to 40 carbon atoms with carbon to hydrogen bonds. The test results are presumed to be measuring petroleum as the test is most commonly performed on samples from petroleum sites, but molecules meeting these criteria can be non-petroleum.

To confirm that the products discharged are non-petroleum, Ardaman collected two smear zone soil samples and one groundwater sample from the locations previously containing the highest levels of TPH, for hydrocarbon “fingerprinting” by performing a C_8+ GC/MS full scan to allow for a detailed characterization of the hydrocarbons so that the type of product discharged could be determined. In addition, wells MW-13 and MW-14 were installed to further define the groundwater plume to the south.

According to Zymax’s interpretation of the chromatographs generated for soil samples TH-3 and TH-5, the only compounds present that can be associated with petroleum were trace amounts of terpanes. The major organic compound detected was valencane, which is probably derived from valencene, an aroma compound in citrus fruit and citrus-derived odorants. This soil analysis data confirms that the discharged product was a citrus product and not a petroleum product. Therefore, the TPH results previously reported for this site are not applicable, as previously stated.

According to Zymax’s chromatograph for the groundwater sample from MW-2, the major organic compounds are menthol, eucalyptol and other terpenoids used in fragrances and flavor additives in the food industry. A preservative used in the food and other industries, butylated hydroxytoluene, was also detected. No petroleum hydrocarbons were detected. The groundwater data further supports Ardaman’s contention that the hydrocarbons present at the site are not the result of a petroleum discharge and that the previously reported TPH results are not applicable.

Several analytes, including benzene, p-isopropyltoluene and/or isopropylbenzene, were detected

in the samples from wells MW-1, MW-2, MW-6, MW-13 and MW-14 at levels in excess of their established GCTLs.

A generally southeasterly and southerly groundwater flow direction was indicated on May 5, 2011 and November 21, 2011, respectively and a generally easterly groundwater flow direction was indicated on May 7, 2012 after resurveying the top of casings in the wells and piezometers. A generally easterly groundwater flow direction was also indicated on January 26, 2013.

Based on the lack of vadose zone soil contamination and the presence of the groundwater contamination plume, Ardaman recommended two quarterly sampling events at the site to evaluate contaminant concentration trends and determine whether the contaminant concentrations will attenuate to below NADCs. Ardaman recommended sampling monitoring wells MW-1 through MW-7, MW-10 and MW-12 through MW-14 for volatiles (VOAs and VOHs) by EPA Method 8260 for this purpose. If contaminants are detected above the GCTL in any of the perimeter monitoring wells during these two quarterly sampling events, additional monitoring wells may be required. Assuming levels decrease to below NADCs, a Natural Attenuation Monitoring program would be proposed.

FDEP responded to the report in a letter dated October 3, 2013 and agreed that TPH analysis was not relevant at this site and would no longer be required. FDEP did recommend the installation of two additional wells south of wells MW-13 and MW-14 to define the contamination plume. Prior to installing these additional wells, Coca Cola informed Ardaman and FDEP that the plant was being redeveloped in the vicinity of the Tank No. 306 assessment area. Therefore, Ardaman abandoned the existing monitoring wells and piezometers on February 2, 2014. GPS coordinates were obtained during the abandonment to accurately reinstall the wells after demolition and construction activities were completed.

Demolition and construction activities at the site facilities were completed in Fall, 2014. Following the completion of the construction activities, wells MW-1, 2, 3, 4, 5, 6, 7, 8D, 9, 20, 12, 13 and 14 were replaced and new wells MW-15 and MW-16 were installed. Sampling indicated the presence of benzene, 4-isopropyltoluene and isopropylbenzene above their respective GCTLs in samples from wells MW-1R, 2R, 5R, 12R and 13R and 4-isopropyltoluene and isopropylbenzene were also above their respective NADCs in the samples from wells MW-1R, MW-2R and MW-13R. The eastern edge of the groundwater plume was undefined. Since groundwater contaminants were present in excess of natural attenuation monitoring default source concentrations, Ardaman recommended preparation of a Remedial Action Plan to address the groundwater contamination.

FDEP's July 25, 2015 report review letter recommended the installation of four additional monitoring wells, east and northeast of MW-5R and east and southeast of MW-12R. The well installation and sampling was conducted in September, 2015. Four new wells MW-18 through MW-21 were sampled along with wells MW-1R, 2R, 5R, 6R, 7R, 9R, 10R, 12R, 13R, 14R, 15, 16 and 17 for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Sampling indicated the presence of benzene and 4-isopropyltoluene above their respective GCTLs in samples from wells MW-1R, 5R and 13R and 4-isopropyltoluene and isopropylbenzene were also above their respective NADCs in the samples from wells MW-1R and MW-2R.

Ardaman concluded that since the plume is entirely within the Coca-Cola property, the plume is not approaching any property boundaries and there are no current plans to develop the study area, that the recent demolition may benefit natural attenuation and semi-annual sampling for one year should be conducted to determine if natural attenuation will increase significantly.

FDEP reviewed the report and concurred with Ardaman's recommendation to conduct semi-annual monitoring for one year.

The first semi-annual groundwater sampling event was conducted on May 9, 10 and 11, 2016. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 14R, 15, 16, 17, 18 and 20 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Benzene, 4-isopropyltoluene and/or isopropylbenzene were present above their respective GCTLs and/or NADCs in the samples from wells MW-1R, 2R and 13R; however, concentrations decreased significantly since the September 2015 sampling event. Ardaman recommended continuation of the semi-annual monitoring and FDEP concurred in a July 21, 2016 letter.

The second semi-annual groundwater sampling event was conducted on November 14, 15 and 16, 2016. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 14R, 15, 16, 17, 18 and 20 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Benzene, 4-isopropyltoluene and/or isopropylbenzene were present above their respective GCTLs and/or NADCs in the samples from wells MW-1R, 2R and 13R. Ardaman recommended continuation of the semi-annual monitoring although removing the sampling of wells MW-14R, 15 and 20, and FDEP concurred in a March 17, 2017 letter.

The third semi-annual groundwater sampling event was conducted on June 27 and 28, 2017. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17 and 18 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Benzene, 4-isopropyltoluene and/or isopropylbenzene were present above their respective GCTLs and/or NADCs in the samples from wells MW-1R, 2R and 13R and potentially above their respective GCTLs in samples from well MW-5R. Ardaman recommended continuation of the semi-annual monitoring and FDEP concurred in a September 27, 2017 letter.

The fourth semi-annual groundwater sampling event was conducted on January 11 and 12, 2018. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17 and 18 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Sample results indicated the presence of benzene, 4-isopropyltoluene and/or isopropylbenzene above their respective GCTLs and/or NADCs in samples from wells MW-1R, 2R and 13R and potentially above their respective GCTLs in samples from well MW-5R. Ardaman recommended continuation of the semi-annual monitoring and FDEP concurred in an April 19, 2018 letter.

The fifth semi-annual groundwater sampling event was conducted on July 23, 2018. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17 and 18 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Sample results indicated the presence of benzene, 4-isopropyltoluene and/or isopropylbenzene above their respective GCTLs and/or NADCs in samples from wells MW-1R, 2R and 13R and potentially above their respective GCTLs in samples from well MW-5R. Ardaman recommended continuation of the semi-annual monitoring and FDEP concurred in an August 23, 2018 letter.

The sixth semi-annual groundwater sampling event was conducted on January 21 and 22, 2019. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17 and 18 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Sample results indicated the presence of 4-isopropyltoluene and/or isopropylbenzene above their respective NADCs in samples from wells MW-1R and 2R and potentially above their respective GCTLs and/or NADCs in samples from wells MW-2R, 5R and 13R. Ardaman recommended continuation of the semi-annual monitoring and FDEP concurred in an April 3, 2019 letter.

The seventh semi-annual groundwater sampling event was conducted on July 22 and 23, 2019. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17 and 18 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Sample results indicated the presence of isopropylbenzene above its respective NADC in samples from wells MW-2R and 13R, and benzene, 4-isopropyltoluene and isopropylbenzene are present above their respective GCTLs and benzene may potentially be present above its respective GCTL in the sample from well MW-2R.

Ardaman recommended continuation of the semi-annual monitoring as well as conducting a vacuum extraction event to address free product in well MW-2R. FDEP concurred and a vacuum extraction event was conducted using wells MW-2R and 13R on December 26, 2019. Approximately 400 gallons was removed from wells MW-2R and MW-13R. Subsequently, the eighth semi-annual groundwater sampling event was conducted on January 22, 23 and 24, 2020. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17 and 18 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Sample results indicated the presence of isopropylbenzene above its NADC in samples from wells MW-1R and 13R, benzene above its GCTL in the sample from MW-13R, 4-isopropyltoluene above its NADC in the sample from MW-2R and benzene and isopropylbenzene may potentially be present above their respective GCTLs/NADCs in the sample from well MW-2R.

Contaminant concentrations after the vacuum extraction event were similar to prior sampling events. However, the vacuum extraction did remove the free product from well MW-2R from a thick film. Only a very light sheen was observed on the purged water in the bucket. Ardaman recommended conducting another vacuum extraction event at wells MW-2R and MW-13R as well as continuation of the semi-annual monitoring. FDEP reviewed the report and concurred with the recommendations.

FDEP had requested a laboratory that can calibrate for limonene be used for future analysis. The FDOH website indicates that no labs in Florida are certified for limonene and a local laboratory indicated that the standard can be purchased and instruments calibrated for it, but it's costly. FDEP agreed that we could continue to report limonene using the library scan unless limonene becomes a problem.

A second vacuum extraction event was conducted using wells MW-2R and 13R on June 29, 2020. Approximately 445 gallons was removed from wells MW-2R and MW-13R. Subsequently, the ninth semi-annual groundwater sampling event was conducted on August 3 and 4, 2020. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17 and 18 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Sample results indicated the presence of isopropylbenzene above its NADC in samples from wells MW-1R and 13R and 4-isopropyltoluene above its GCTL in the samples from wells MW-2R and MW-9R. 4-isopropyltoluene concentrations in well MW-9R have been below detection limits in the past and the well generally serves as an upgradient well. Resampling of well MW-9R confirmed the presence of 4-isopropyltoluene, although the concentration was 85% lower, but still over GCTLs.

Contaminant concentrations after the vacuum extraction event were similar to prior sampling events. However, the vacuum extraction did remove the free product from well MW-2R from a thick film. Ardaman recommended continuation of the semi-annual monitoring. The next semi-annual groundwater sampling event was conducted on February 11 and 12, 2021. Wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17 and 18 were sampled for analysis of volatile organic compounds (VOAs and VOHs) by EPA Test Method 8260, including limonene. Analysis indicated the presence of isopropylbenzene above its NADC in samples from wells MW-1R, 2R and 13R and 4-isopropyltoluene above its NADC in the sample from well MW-9R. 4-isopropyltoluene

concentrations in well MW-9R had been below detection limits until the August 2020 sampling and the well generally serves as an upgradient well. The presence of 4-isopropyltoluene in well MW-9R leaves the western edge of the groundwater plume undefined. An additional monitoring well and sampling was recommended to explore the plume to the west of MW-9R. FDEP reviewed the report on January 19, 2022 and concurred with the recommendations.

Following the February 2021 sampling event, Coca-Cola indicated that a new building may be constructed over the impacted area in about 12 to 18 months. Since access to the impacted media would be blocked, the site would need to be substantially remediated prior to construction. Source removal was the prevailing remedial method given the time constraint; however, prior to developing a Remedial Action Plan, supplemental soil assessment from within the smear zone was conducted to confirm the extents of impacted soils capable of leaching contaminants with the intent that removal of the core of the smear zone contamination would significantly reduce the groundwater contaminant concentrations.

Fourteen direct push soil borings were conducted in April 2021 to depths of 16 to 20 feet bls and twelve smear zone soil samples were collected from varying depths for direct leaching analysis by SPLP (EPA Method 1312/8260). Several remedial options were considered using the smear zone data, including conventional soil removal, soil removal with large diameter auger and injection of chemicals to degrade the contaminants. Each option had constraints, including the location of structures, railroad tracks and utilities nearby, the option to utilize sheet piling due to the depth of removal and not having the clearance to dig a 1:1 slope for conventional soil removal. Coca-Cola ultimately decided that the anticipated cost of each option was prohibitive, that the intended structure would not be constructed in this area at this time and Coca-Cola would continue with semi-annual monitoring. Therefore, no Remedial Action Plan was prepared.

Well MW-22, located northwest of MW-9R, was installed on April 30, 2021. Well MW-9R was sampled on May 20, 2021 and no contaminants of concern were detected above MDLs. The groundwater plume remains defined with newly installed MW-22.

On November 8 and 9, 2021, wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17, 18 and 22 were sampled. Benzene and 4-isopropyltoluene were not detected in the samples from the wells. Benzene was detected at the GCTL in the sample from well MW-13R. Isopropylbenzene was detected above the NADC in the sample from wells MW-1R, 2R and 13R. The November 9, 2021 groundwater elevation survey data indicated the groundwater flow direction was generally towards the east.

Ardaman recommended continuation of semi-annual monitoring since the plume is entirely within the Coca-Cola property, it is not approaching any property boundaries and there are no current plans to develop the study area. FDEP reviewed the November 2021 sampling report and a teleconference call was conducted on February 14, 2022 to discuss a pathway to site closure.

FDEP requested several items in order to determine the best closure option including obtaining the top-of-casing elevation in MW-22 to determine if the well is upgradient of MW-9R, obtaining a groundwater sample from MW-9R for 4-isopropyltoluene and overlying the geoprobe soil sample locations with the well locations.

The top-of-casing elevation at MW-22 was determined and while the groundwater flow direction survey from March 17, 2022 using Surfer version 16 shows MW-22 in the upgradient direction of MW-9R, the actual water level elevation of MW-22 is downgradient of MW-9R. Since MW-22 appears to be downgradient from MW-9R, FDEP requested an additional well west of MW-9R to delineate the groundwater plume. FDEP also requested that well MW-6R, located south of MW-9R, be sampled. This will be discussed further below.

FDEP also requested obtaining a groundwater sample from MW-9R for 4-isopropyltoluene and that if 4-isopropyltoluene remained below its GCTL, an organoleptic closure may be possible. If 4-isopropyltoluene had not been detected above its GCTL in MW-9R, the only contaminant remaining in the wells would have been isopropylbenzene, an organoleptic compound, and an organoleptic closure may have been possible based on the February 2, 2017 revision of Chapter 62-780.680, FAC, No Further Action, Risk Management Option 1. Ardaman sampled well MW-9R on March 17, 2022 and 4-isopropyltoluene was detected above the GCTL; therefore, negating the option of an organoleptic closure.

FDEP also indicated that continuation of NAM is only acceptable through the approval of a NAM Plan. Ardaman proposed continued NAM on a semi-annual basis, which would include the sampling of wells MW-1R, 2R, 5R, 7R, 9R, 12R, 13R, 16, 17, 18 and 22 for analysis of volatile organic compounds (VOCs) by EPA Test Method 8260, including limonene as the most cost effective option. FDEP indicated that NAM was not an option until the groundwater plume was delineated and that FDEP anticipated a semi-annual groundwater sampling report, which should include groundwater samples to the west and south of well MW-9R.

Ardaman sampled wells MW-1R, 2R, 5R, 6R, 7R, 9R, 12R, 13R, 16, 17, 18 and 22 on February 28, 2023 and March 1 and 2, 2023. The samples were submitted for analysis of volatile organic compounds (VOCs) by EPA Test Method 8260, including limonene. Benzene and 4-isopropyltoluene (commonly associated with peel oil) were not detected in the samples from the wells. Isopropylbenzene was detected above the GCTL in the sample from well MW-2R and above the NADC in the sample from wells MW-1R and 13R.

FDEP had previously suggested an organoleptic closure for isopropylbenzene, and organoleptic, based on the February 2, 2017 revision of Chapter 62-780.680, FAC, No Further Action, Risk Management Option 1 if 4-isopropyltoluene remained below its GCTL for an additional sampling event following the November 2021 results; however, 4-isopropyltoluene was detected above its GCTL during the March 2022 sampling event. During the March 2023 sampling event, no 4-isopropyltoluene was detected in the samples from the wells and one additional semi-annual event was recommended to determine if an organoleptic closure is appropriate.

The March 2023 sampling report was submitted to FDEP in January 2024 and review comments have not yet been issued. We have conducted another sampling event as detailed below.

FIELD EXPLORATION AND TEST RESULTS

The groundwater sampling program consisted of: 1) sampling twelve shallow monitoring wells for laboratory analyses of selected contaminants of concern and 2) performing relative elevation surveys of water surfaces in the wells to estimate groundwater flow direction. The field exploration program was conducted on February 7, 8 and 9, 2024.

Groundwater Sampling

Ardaman sampled wells MW-1R, 2R, 5R, 6R, 7R, 9R, 12R, 13R, 16, 17, 18 and 22 on February 7, 8 and 9, 2024. The samples were submitted for analysis of volatile organic compounds (VOCs) by EPA Test Method 8260, including limonene. No free product or sheen was observed on the water surface in the wells during this sampling events.

Approximately 3 to 5 well volumes were purged from each well at an average rate of approximately 0.1 gallons per minute. Temperature, conductivity and pH were stable at the end of purging. Dissolved oxygen was less than 20% of saturation at the end of purging and turbidity

was less than 20 NTUs at the end of purging except at wells MW-1R, 5R, 7R, 12R, 13R, 17 and 18. Five well volumes were purged from these wells and turbidity was stable at sampling. Slight to moderate odors were noted in wells MW-1R, 2R, 9R and 13R during purging.

The groundwater samples were preserved with ice and submitted to Eurofins Orlando Laboratory for analysis. A copy of the sampling logs is included in **Appendix I**.

Groundwater Analytical Results

The analytical results from wells sampled are summarized in **Table 2**. Results from each well are also presented graphically on **Figure 3**. A copy of the laboratory analytical reports is included in **Appendix I**.

As shown in **Table 2** and on **Figures 3 through 6**, benzene and 4-isopropyltoluene (commonly associated with peel oil) were not detected above their GCTLs in the samples from the wells. Isopropylbenzene was detected above the NADC in the samples from wells MW-1R, 2R and 13R, but it is an organoleptic. Additionally, the detection limit at MW-9R exceeds the GCTL though reported as not detected (to 3.4 μg/L). In the 2023 sample, the concentration was below the detection limit of 0.67 μg/L.

FDEP requested that limonene be included in the analyses for the groundwater samples from the wells sampled. The laboratory, ENCO, does not calibrate their GC/MS for limonene or run routine standards for it. ENCO therefore performed a “library scan” for volatiles, including limonene, which compares typical GC/MS responses to various volatiles. The library scan did not detect limonene in any of the samples. Other TICs were detected in the samples from the wells. TICs detected in this and previous groundwater samples are summarized in **Table 3**. No laboratories in Florida currently calibrate for limonene and Ardaman will continue to analyze limonene though the library scan.

Isoconcentration maps for the groundwater contaminants detected (or previously detected) above GCTLs, benzene, 4-isopropyltoluene and isopropylbenzene, are included as **Figures 4, 5 and 6**, respectively. The combined plume area is shown on **Figure 3**.

Discussion of Groundwater Analytical Results

Based on the analytical results, isopropylbenzene (organoleptic) is present above its NADC in the samples from wells MW-1R, 2R and MW-13R and 4-isopropyltoluene and benzene are below their respective GCTLs in the samples from all of the wells.

We note that matrix interference in the sample from MW-9R did not allow reporting of some contaminants below the cleanup target levels. The chromatograph peaks were covered by non-target compound peaks. Dilution required increasing the test detection levels and benzene and isopropylbenzene in the sample from MW-9R had a detection level higher than the GCTLs. However, isopropylbenzene is an organoleptic compound and not an issue for the organoleptic closure and benzene has never been detected in the samples from MW-9R since sampling began in 2011.

Since 4-ispropyltoluene and benzene have not been detected above their GCTLs during the last two sampling events, the site appears eligible for an organoleptic closure as the organoleptic isopropylbenzene is the only remaining contaminant.

Groundwater Table Elevation Survey

The depth-to-water was measured from the top of casings in the wells on February 7, 2024 and was converted to groundwater elevations. The February 7, 2024 groundwater elevation survey data indicated the groundwater flow direction was generally towards the east (**Figure 7**) which is most common for this site though flow direction has varied. Previous groundwater flow direction surveys have indicated a generally southeasterly and southerly direction in 2011 and January 2019, a generally east-southeasterly direction in August 2020, a generally easterly direction in May 2012, January 2013, May 2016, January 2018, July 2018, January 2020, February 2021, November 2021 and March 2023, a generally northerly to northeasterly groundwater flow direction in November 2014, April 2015 and July 2019, a generally south-southwesterly groundwater flow direction in September 2015, a generally northwesterly groundwater flow direction in November 2016 and a radial flow from MW-1R in June 2017.

CONCLUSIONS AND RECOMMENDATIONS

Twelve monitoring wells were sampled on February 7, 8 and 9, 2024. Analysis indicated the presence of isopropylbenzene above its NADC in samples from wells MW-1R, 2R and 13R. Additionally, the detection limit was higher than the GCTL for the sample from MW-9R, although the contaminant was reported as undetected. 4-isopropyltoluene and benzene concentrations in all wells sampled were below their GCTLs. Due to the matrix interference in the sample from well MW-9R, although undetected, the benzene detection limit was higher than the GCTL; however, no benzene has been detected in well MW-9R since sampling began in 2011. The plume is currently adequately defined by the existing wells.

FDEP had previously suggested an organoleptic closure based on the February 2, 2017 revision of Chapter 62-780.680, FAC, No Further Action, Risk Management Option 1 if 4-isopropyltoluene remained below its GCTL for an additional sampling event following the November 2021 results; however, 4-isopropyltoluene was detected above its GCTL during the March 2022 sampling event.

During the March 2023 and February 2024 sampling events, no 4-isopropyltoluene was detected in the samples from the wells. Since isopropylbenzene is the only remaining contaminant, an organoleptic closure is appropriate.

REQUEST FOR NO FURTHER ACTION WITHOUT CONDITIONS

Based on assessment and monitoring data previously obtained at this site and discussed above, the site qualifies for a No Further Action without Conditions in accordance with Chapter 62-780.680, FAC, (1) RMO Level I considering the organoleptic exception. Specifically, the required conditions are met as follows:

1. No free product is present at this site, as shown in **Table 4**.

2. Vadose zone soil contamination does not exist at the site. Moderate to very strong citrus-type odors and elevated net OVA readings were noted in vadose zone soil samples (to a depth of 12 feet bls) from borings TH-1 through TH-5 and from borings HAB-3 and HAB-4 during 2011 soil assessment. Eight soil samples were collected for laboratory analysis. TPH was detected in soil sample TH-3-12 at a concentration of 370 mg/Kg, which exceeded the leachability-based soil cleanup target level (LSCTL); however, since the soil sample was obtained at a depth of 12 feet bls, it is not considered vadose zone soil contamination (the top of the smear zone was estimated to be at a

depth of 12 feet). No COCs were detected above soil cleanup target levels (SCTLs) in samples HAB-3-4, HAB-4-4, TH-4-, TH-5-10 and TH-7-6 and no vadose zone soil contamination appeared to exist in the area of investigation.

3. Groundwater contamination is present but meets requirements for RMO I under organoleptic exception. The isopropylbenzene-groundwater plume is shown on **Figure 6. Table 4** summarizes contaminant concentrations from 2014 through February 2024. The isopropylbenzene plume is isolated to the property, present only at monitoring wells MW-1R, 2R and 13R and concentrations have been stable over the last few years.

   The February 2, 2017 revision of Chapter 62-780.680, FAC, No Further Action, Risk Management Option 1, states that groundwater can exceed the GCTLs derived from organoleptic considerations if the following additional criteria are met. The additional criteria states that 1) concentrations of all other contaminants have to meet all applicable health-based GCTLs provided in Chapter 62-777, FAC, Table 1, and Chapter 62-780, FAC, Table F, 2) a minimum of one year of groundwater monitoring data indicates that groundwater concentrations at the property boundary do not and will not exceed GCTLs, 3) the property has access to and is connected to an off-site water supply for domestic purposes and private wells are not used for domestic purposes and 4) the real property owner does not object to the No Further Action Proposal to the Department.

   Relative to additional criteria 1, all other contaminants are below detection levels and GCTLs. In addition, the health-based GCTL for isopropylbenzene is 700 µg/L. The highest groundwater concentration of isopropylbenzene at well MW-2R was 48 µg/L in February 2024, which is far below the health-based standard. Relative to additional criteria 2, groundwater monitoring has been conducted on a semi-annual or annual basis since 2014. Sufficient data is available to show that contaminant concentrations will not exceed GCTLs at the property boundary. Relative to additional criteria 3, the property utilizes City water and no potable wells are located on the property. Relative to additional criteria 4, the real property owner, Coca-Cola Co., does not object to the No Further Action Proposal.

4. Contaminated surface water is not present. No surface water is present on the property.

5. Contaminated sediment is not present. No contaminated sediment is present as no surface water features are present on the property.

Since all criteria have been met for RMO I, Ardaman recommends that a No Further Action without Conditions be approved for this site. Once approved, existing monitoring wells will be properly abandoned.

CLOSURE

This report has been prepared for the exclusive use of The Coca-Cola Company for specific application to this project in accordance with generally accepted engineering practices. No other warranty, expressed or implied, is made.

The analyses and conclusions submitted in this report are based upon the data obtained during our exploration. This study is a focus study limited to the specific methods of investigation. The results of the groundwater testing would only be applicable to the sample locations.

Our findings do not warrant the study area against any conditions unrelated to the analytes tested for. Ardaman appreciates the opportunity to assist The Coca-Cola Company, with this project. Should you have any questions, or if you would like to discuss this report, please contact us.

Very truly yours,

* - All TOC elevations in piezometer PZ-3 and wells MW-1 through 7, 8D and 9 through 12 were resurveyed on May 7, 2012.

** - All piezometer and wells were abandoned on February 2, 2014, prior to site demolition.

*** - Former wells MW-1 through 7, 8D, 9, 10 and 12 though 14 were reinstalled after construction activities were completed as MW-1R through 7R, 8D-R, 9R, 10R and 12R through 14R. The TOC elevations of these wells and newly installed wells MW-15 and MW-16 were surveyed on April 9, 2015.

1. Analysis of hydrocarbons at the site has demonstrated that the origin is non-petroleum. Therefore, TRPH results do not apply to this site.
2. Well Abandoned

I= The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL). J4= Estimated Result * - No standard.

50 Shaded bold result denotes concentration exceeding a GCTL
100 Shaded bold result denotes concentration exceeding a NAMDSC.

1. Analysis of hydrocarbons at the site has demonstrated that the origin is non-petroleum. Therefore, TRPH results do not apply to this site.
2. Well Abandoned

I= The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL). J4= Estimated Result * - No standard.

50 Shaded bold result denotes concentration exceeding a GCTL

100 Shaded bold result denotes concentration exceeding a NAMDSC.

I= The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).

U= Compound was analyzed for but not detected.

N= Presumptive evidence of presence of material.

* - No standard.

50 Shaded bold result denotes concentration exceeding a GCTL

100 Shaded bold result denotes concentration exceeding a NAMDSC.

ANALYTICAL REPORT

PREPARED FOR

Attn: Katie Minter
Ardaman & Associates Inc.
8008 South Orange Avenue
PO BOX 593003
Orlando, Florida 32809

Generated 2/15/2024 8:23:43 AM

JOB DESCRIPTION

Coca Cola

JOB NUMBER

670-34531-1

Eurofins Orlando
481 Newburyport Avenue
Altamonte Springs FL 32701

See page two for job notes and contact information.

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

Job ID: 670-34531-1
Project/Site: Coca Cola

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
J3	Estimated value; value may not be accurate. Spike recovery or RPD outside of criteria.
L	Off-scale high. Actual value is known to be greater than the value given.
U	Indicates that the compound was analyzed for but not detected.

GC/MS VOA TICs

Qualifier	Qualifier Description
N	Presumptive evidence of material.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Job Narrative
670-34531-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

GC/MS VOA
Method 8260D: Unless noted under *Tentatively Identified Compounds,* limonene (CAS No. 138-86-3) was not detected in the reported samples.

Receipt
The samples were received on 2/9/2024 4:23 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.3°C

GC/MS VOA
Method 8260D: The continuing calibration verification (CCV) associated with batch 670-75820 recovered above the upper control limit for Bromomethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is impacted: (CCVIS 670-75820/3).

Method 8260D: The continuing calibration verification (CCV) associated with batch 670-75820 recovered outside acceptance criteria, low biased, for Chloromethane. A reporting limit (RL) standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8260D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 670-75820 recovered outside control limits for the following analytes: Dichlorodifluoromethane. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The following sample was diluted to bring the concentration of target analytes within the calibration range: MW-9R (670-34531-2). Elevated reporting limits (RLs) are provided.

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 670-75820 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 8260D: The continuing calibration verification (CCV) associated with batch 670-76003 recovered above the upper control limit for Acetone, Chloroethane and Dichlorodifluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is impacted: (CCVIS 670-76003/3).

Method 8260D: The continuing calibration verification (CCV) associated with batch 670-76003 recovered outside acceptance criteria, low biased, for Acrolein. A reporting limit (RL) standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 670-76003 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Detection Summary

Client: Ardaman & Associates Inc.
Project/Site: Coca Cola

Accreditation/Certification Summary

Client: Ardaman & Associates Inc.
Job ID: 670-34531-1
Project/Site: Coca Cola

Laboratory: Eurofins Orlando

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Florida	NELAP	E83018	06-30-24

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
8260D		Water	Allyl chloride
8260D		Water	Benzyl chloride
8260D		Water	Chloroprene

Method Summary

Client: Ardaman & Associates Inc.
Project/Site: Coca Cola

Job ID: 670-34531-1

Method	Method Description	Protocol	Laboratory
8260D	Volatile Organic Compounds by GC/MS	SW846	EET ORL
5030C	Purge and Trap	SW846	EET ORL

Protocol References:

SW846 = "Test Methods For Evaluating Solid Waste, Physical/Chemical Methods", Third Edition, November 1986 And Its Updates.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Discharge Date: March 8, 2008 (AST 306)

Dear Ms. Brown:

The Department has reviewed the "Semi-Annual Groundwater Sampling Report Relative to Tank No. 306" that was created March 6, 2024 (Report). The Report was submitted on March 14, 2024 by Ardaman and Associates, Inc. (Ardaman) for the Special Products Department AST Site located at 2501 West Orange Avenue in Apopka, Orange County, Florida. All the documents submitted to date are adequate to meet the site assessment requirements of Rule 62-780.600, Florida Administrative Code (F.A.C.).

In addition, the person responsible for site rehabilitation has requested to address the contamination pursuant to subsection 376.30701(1)(b), Florida Statutes (F.S.) under the global risk-based corrective action (RBCA) program (not petroleum RBCA). Documentation submitted with the Report confirms that the only remaining contaminants (benzene, p-isopropyltoluene, isopropylbenzene and Total Petroleum Hydrocarbons (TPH)) exceed nuisance, organoleptic or aesthetic consideration criteria set forth in paragraphs 376.30701(2)(g)3.a-f, F.S. and Subsection 62-780.680(1)(c)1.a.(I)-(IV), F.A.C. In an October 3, 2013 letter, the Department agreed that the TPH analysis was not relevant to this site because hydrocarbon "fingerprinting" proved the TPH source to be trace amounts of terpanes and not petroleum. Please refer to the attached map[s] of the source property and analytical summary tables, Exhibits A and B respectively and hereby incorporated by reference. Due to the generic permit dewatering requirements found in Rule 62-621.300, F.A.C., information about the above facility will be maintained on the Department's Institutional Controls Registry website at: http://ca.dep.state.fl.us/mapdirect/?focus=icr. The

Report is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for contamination associated with the discharge referenced above, except as set forth below.

(1) In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Florida Department of Environmental Protection (Department) may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the Report or otherwise allowed by Chapter 62-780, F.A.C.

(2) Additionally, you are required to properly plug and abandon all monitoring wells, injection wells, extraction wells, and sparge wells within 60 days of receipt of this Order unless these wells are otherwise required for compliance with a local ordinance or another cleanup. The wells must be plugged and abandoned in accordance with the requirements of Subsection 62-532.500(5), F.A.C. A Well Plugging Report shall be submitted within 30 days of well plugging. Other State, county or city requirements for well abandonment may also apply.

NOTICE OF RIGHTS

This action is final and effective on the date filed with the Clerk of the Department unless a petition for an administrative hearing is timely filed under Sections 120.569 and 120.57, F.S., before the deadline for filing a petition. On the filing of a timely and sufficient petition, this action will not be final and effective until a subsequent order of the Department. Because the administrative hearing process is designed to formulate final agency action, the subsequent order may modify or take a different position than this action.

Petition for Administrative Hearing

A person whose substantial interests are affected by the Department's action may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57, F.S. Pursuant to Rules 28-106.201 and 28-106.301, F.A.C., a petition for an administrative hearing must contain the following information:

(a) The name and address of each agency affected and each agency's file or identification number, if known;
(b) The name, address, any e-mail address, any facsimile number, and telephone number of the petitioner, if the petitioner is not represented by an attorney or a qualified representative; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination;
(c) A statement of when and how the petitioner received notice of the agency decision;

(d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;
(e) A concise statement of the ultimate facts alleged, including the specific facts that the petitioner contends warrant reversal or modification of the agency's proposed action;
(f) A statement of the specific rules or statutes that the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and
(g) A statement of the relief sought by the petitioner, stating precisely the action that the petitioner wishes the agency to take with respect to the agency's proposed action.

The petition must be filed (received by the Clerk) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@FloridaDEP.gov. Also, a copy of the petition shall be mailed to the addressee for this order at the address indicated above at the time of filing.

Time Period for Filing a Petition

In accordance with Rule 62-110.106(3), F.A.C., petitions for an administrative hearing by the addressee for this order must be filed within **21** days of receipt of this written notice. Petitions filed by any persons other than the addressee for this order must be filed within **21** days of publication of the notice or within **21** days of receipt of the written notice, whichever occurs first. You cannot justifiably rely on the finality of this decision unless notice of this decision and the right of substantially affected persons to challenge this decision has been duly published or otherwise provided to all persons substantially affected by the decision. While you are not required to publish notice of this action, you may elect to do so pursuant Rule 62-110.106(10)(a).

The failure to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the discretion of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C. If you do not publish notice of this action, this waiver may not apply to persons who have not received a clear point of entry.

Extension of Time

Under Rule 62-110.106(4), F.A.C., a person whose substantial interests are affected by the Department's action may also request an extension of time to file a petition for an administrative hearing. The Department may, for good cause shown, grant the request for an extension of time. Requests for extension of time must be filed with the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@FloridaDEP.gov, before the deadline

for filing a petition for an administrative hearing. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

Mediation

Mediation is not available in this proceeding.

Judicial Review

Once this decision becomes final, any party to this action has the right to seek judicial review pursuant to Section 120.68, F.S., by filing a Notice of Appeal pursuant to Florida Rules of Appellate Procedure 9.110 and 9.190 with the Clerk of the Department in the Office of General Counsel (Station #35, 3900 Commonwealth Boulevard, Tallahassee, Florida 32399-3000) and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice must be filed within 30 days from the date this action is filed with the Clerk of the Department.

Questions

Any questions regarding the review of the Report should be directed to Johanna Leonard at (407) 897-4130. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is ERIC_12758. Please use this identification on all future correspondence with the Department.

EXECUTION AND CLERKING

1. Analysis of hydrocarbons at the site has demonstrated that the origin is non-petroleum. Therefore, TRPH results do not apply to this site.

2. Well Abandoned

I= The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL). J4= Estimated Result

* - No standard.

50 Shaded bold result denotes concentration exceeding a GCTL

100 Shaded bold result denotes concentration exceeding a NAMDSC.
